Scrum framework is one of the most popular agile approaches used in software development. It is a flexible and adaptable method that emphasizes team collaboration, adaptive planning, and continuous improvement. One key role in this framework is the Product Owner, who is responsible for defining and prioritizing the product backlog, ensuring the team is working on the right things at the right time. As such, the role of the Product Owner is critical to the success of any Scrum team.

## Scrum Professional Scrum Product Owner I Sample Questions (Q123-Q128):

### NEW QUESTION # 123

True or False: Sprint Reviews are an opportunity to collect stakeholder feedback.

- A. False
- **B. True**

**Answer: B**

Explanation:

Explanation

\* The Sprint Review is an event that occurs at the end of each Sprint, where the Scrum Team and the stakeholders inspect the Increment and adapt the Product Backlog if needed. The Sprint Review is an

\* opportunity for the Product Owner to validate that the Increment meets their expectations and delivers value to the customers and users. The Sprint Review is also an opportunity for the Developers to demonstrate their work and receive feedback from the Product Owner and the stakeholders.

\* Stakeholders are people external to the Scrum Team who have a stake or interest in the product, such as customers, users, sponsors, managers, or other teams. Stakeholders provide valuable input, feedback, and insights to the Scrum Team regarding the product vision, goals, value proposition, requirements, features, functions, quality, usability, or market conditions.

\* Collecting stakeholder feedback is one of the main purposes of the Sprint Review. Stakeholder feedback can help the Scrum Team to:

\* Assess the value and quality of the product Increment and identify any gaps or issues that need to be addressed.

\* Understand the needs and expectations of the customers and users and discover new opportunities or ideas for improvement or innovation.

\* Align and collaborate with the stakeholders on the product direction and priorities and ensure transparency and trust.

\* Adapt the Product Backlog based on the feedback and data and plan for the next Sprint.

### NEW QUESTION # 124

A new Developer is having continuing conflicts with existing members of the Scrum Team, which is impacting the delivery of the Increment. If necessary, who is responsible for removing the Developer from the Scrum Team?

(choose the best answer)

- A. The hiring manager is responsible, they hired the Developer.
- B. The Scrum Master is responsible, they remove impediments.
- C. The Product Owner is responsible, they control the return on investment (ROI).
- **D. The Scrum Team is responsible.**

**Answer: D**

Explanation:

The Scrum Team is a self-managing unit that organizes its own work and delivers a valuable product<sup>1</sup>. The Scrum Team consists of one Scrum Master, one Product Owner, and Developers<sup>2</sup>. The Scrum Team is accountable for creating a valuable, useful Increment every Sprint<sup>[3][3]</sup>. If a Developer is having conflicts with other team members that affect the delivery of the Increment, the Scrum Team is responsible for resolving the issue and deciding whether to remove the Developer from the team or not. The Product Owner, the Scrum Master, and the hiring manager do not have the authority to remove a Developer from the Scrum Team, as this would violate the principle of self-management<sup>4</sup>.

### NEW QUESTION # 125

Which of the following are appropriate topics for discussion during a Sprint Retrospective?  
(choose the best two answers)

- A. Identifying high priority process improvements for the next Sprint.
- B. The order of items in the Product Backlog.
- C. How the team collaborates.
- D. Documenting acceptance criteria for items in the next Sprint.

**Answer: A,C**

Explanation:

Explanation

The Sprint Retrospective is an event for the Scrum Team to inspect how the last Sprint went with regards to individuals, interactions, processes, tools, and their Definition of Done<sup>1</sup>. The purpose of the Sprint Retrospective is to plan ways to increase quality and effectiveness for the next Sprint<sup>2</sup>. Therefore, appropriate topics for discussion during a Sprint Retrospective are:

Identifying high priority process improvements for the next Sprint. The Scrum Team should identify the most important things that went well and the potential improvements, and create a plan for implementing some of them in the next Sprint<sup>[3][3]</sup>. This way, the Scrum Team can continuously improve their performance and deliver more value.

How the team collaborates. The Scrum Team should reflect on how they work together as a self-managing unit, and how they can enhance their skills, tools, and relationships<sup>4</sup>. This way, the Scrum Team can foster a culture of trust, respect, and collaboration.

The other options are not appropriate topics for discussion during a Sprint Retrospective, as they are either related to the Product Backlog or the Sprint Backlog, which are not the focus of the Sprint Retrospective. The order of items in the Product Backlog is the responsibility of the Product Owner, who manages the Product Backlog based on the value, risk, and dependencies of the items<sup>5</sup>.

The Product Owner may seek input from the Scrum Team or the stakeholders, but the final decision is up to the Product Owner.

Documenting acceptance criteria for items in the next Sprint is part of the Product Backlog refinement, which is an ongoing activity throughout the Sprint, not a specific event. The Scrum Team should collaborate on refining the Product Backlog items and adding more details, such as acceptance criteria, as they become more clear and ready for selection in a Sprint Planning.

### NEW QUESTION # 126

Which three of the following are feedback loops in Scrum?

- A. Sprint Retrospective
- B. Release Planning
- C. Product Backlog Refinement
- D. Sprint Review
- E. Daily Scrum

**Answer: A,D,E**

### NEW QUESTION # 127

Which of the following is required by Scrum?

(choose the best answer)

- A. Developers must stand up at the Daily Scrum.
- B. Sprint Retrospective.
- C. Sprint Burndown Chart.
- D. All of the above.

- E. Release Planning.

**Answer: B**

Explanation:

The Sprint Retrospective is one of the five events defined by Scrum. It is a formal opportunity for the Scrum Team to inspect itself and create a plan for improvements to be enacted during the next Sprint. The purpose of the Sprint Retrospective is to adapt the way of working so that it becomes more effective and enjoyable. The other options are not required by Scrum, but may be useful practices depending on the context. Developers do not have to stand up at the Daily Scrum, they can choose any format that works for them. A Sprint Burndown Chart is a common way to visualize the remaining work in a Sprint, but it is not mandated by Scrum. Release Planning is a topic that falls under the broader competency of Managing Products with Agility, but it is not a prescribed event in Scrum.
