

# NCP-US-6.5 Latest Practice Questions & Detailed NCP-US-6.5 Study Dumps

P.S. Free 2026 Nutanix NCP-US-6.5 dumps are available on Google Drive shared by GuideTorrent:  
[https://drive.google.com/open?id=13aWzoHBTqeoqW\\_O8rjcKnjCWgK3sv4kd](https://drive.google.com/open?id=13aWzoHBTqeoqW_O8rjcKnjCWgK3sv4kd)

The learning material is available in three different easy-to-use forms. The first one is a PDF form. The students can save the NCP-US-6.5 questions by taking out their prints or can access them on their smartphones, tablets, and laptops. The PDF form can be used anywhere anytime and is essential for applicants who like to learn from their smart devices. The second form is Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) web-based practice test which can be taken from browsers like Firefox, Microsoft Edge, Google Chrome, and Safari.

## Nutanix NCP-US-6.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Configure and Utilize Nutanix Unified Storage</li> <li>• Identify the steps to deploy Nutanix Objects</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Troubleshoot issues related to Nutanix Objects</li> <li>• Troubleshoot issues related to Nutanix Volumes</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Deploy and Upgrade Nutanix Unified Storage</li> <li>• Perform upgrades</li> <li>• maintenance for Files</li> <li>• Objects implementations</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Analyze and Monitor Nutanix Unified Storage</li> <li>• Describe the use of Data Lens for data security</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Identify the steps to deploy Nutanix Files</li> <li>• Given a scenario, determine product and sizing parameters</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Configure Nutanix Files with advanced features</li> <li>• Determine the appropriate method to ensure data availability</li> <li>• recoverability</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Configure Nutanix Objects</li> <li>• Describe how to monitor performance and usage</li> </ul>

**Nutanix NCP-US-6.5 Exam Prep Material Are Available In Multiple Formats**

As the authoritative provider of NCP-US-6.5 actual exam, we always pursue high pass rate compared with our peers to gain more attention from those potential customers. We guarantee that if you follow the guidance of our NCP-US-6.5 learning materials, you will pass the exam without a doubt and get a certificate. Our NCP-US-6.5 Exam Practice is carefully compiled after many years of practical effort and is adaptable to the needs of the NCP-US-6.5 exam

## Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Sample Questions (Q82-Q87):

### NEW QUESTION # 82

An administrator is required to place all iSCSI traffic on an isolated network. How can the administrator meet this requirement?

- A. Configure the Data Services IP on an isolated network.
- B. Create a new network interface on the CVMs via ncli.
- C. Create a Volumes network in Prism Central.
- D. Configure network segmentation for Volumes.

**Answer: A**

### NEW QUESTION # 83

What best describes the data protection illustrated in the exhibit?

- A. Availability Zones
- B. NearSync
- C. Metro Availability
- D. Smart DR

**Answer: D**

Explanation:

The data protection illustrated in the exhibit is Smart DR. Smart DR is a feature that allows share-level replication between active file server instances for disaster recovery. Smart DR can replicate shares from a primary FSI to one or more recovery FSIs on different clusters or sites. Smart DR can also perform failover and failback operations in case of a disaster or planned maintenance. The exhibit shows a Smart DR configuration with one primary FSI and two recovery FSIs. Reference: Nutanix Files Administration Guide, page 79; Nutanix Files Solution Guide, page 9

### NEW QUESTION # 84

An administrator is tasked with deploying a Microsoft Server Failover Cluster for a critical application that uses shared storage. The failover cluster instance will consist of VMs running on an AHV-hosted cluster and bare metal servers for maximum resiliency. What should the administrator do to satisfy this requirement?

- A. Create a Bucket with Objects.
- B. Create an SMB Share with Files.
- C. Provision a new Storage Container.
- D. Provision a Volume Group with Volume.

**Answer: D**

Explanation:

Nutanix Volumes allows administrators to provision a volume group with one or more volumes that can be attached to multiple VMs or physical servers via iSCSI. This enables the creation of a Microsoft Server Failover Cluster that uses shared storage for a critical application. The volume group can be attached to VMs running on an AHV-hosted cluster and bare metal servers for maximum resiliency. Reference: Nutanix Volumes Administration Guide

### NEW QUESTION # 85

An administrator is tasked with performing an upgrade to the latest Objects version. What should the administrator do prior to upgrade Objects Manager?

- A. Upgrade Objects service
- **B. Upgrade AOS**
- C. Upgrade Lifecycle Manager
- D. Upgrade MSP

**Answer: B**

Explanation:

Before upgrading Objects Manager, the administrator must upgrade AOS to the latest version. AOS is the core operating system that runs on each node in a Nutanix cluster and provides the foundation for Objects Manager and Objects service. Upgrading AOS will ensure compatibility and stability for Objects components. Reference: Nutanix Objects Administration Guide, Acropolis Operating System Upgrade Guide

#### NEW QUESTION # 86

An administrator has connected 100 users to multiple Files shares to perform read and write activity. The administrator needs to view audit trails in File Analytics of these 100 users. From which two Audit Trail options can the administrator choose to satisfy this task? (Choose two.)

- **A. Share Name**
- B. Directory
- C. Folders
- **D. Client IP**

**Answer: A,D**

Explanation:

Nutanix File Analytics, part of Nutanix Unified Storage (NUS), provides audit trails to track user activities within Nutanix Files shares. Audit trails include details such as who accessed a file, from where, and what actions were performed. The administrator needs to view the audit trails for 100 users, which requires filtering or grouping the audit data by relevant criteria.

Analysis of Options:

\* Option A (Share Name): Correct. Audit trails in File Analytics can be filtered by Share Name, allowing the administrator to view activities specific to a particular share. Since the 100 users are connected to multiple shares, filtering by Share Name helps narrow down the audit trails to the shares being accessed by these users, making it easier to analyze their activities.

\* Option B (Client IP): Correct. File Analytics audit trails include the Client IP address from which a user accesses a share (as noted in Question 14). Filtering by Client IP allows the administrator to track the activities of users based on their IP addresses, which can be useful if the 100 users are accessing shares from known IPs, helping to identify their read/write activities.

\* Option C (Directory): Incorrect. While audit trails track file and directory-level operations, "Directory" is not a standard filter option in File Analytics audit trails. The audit trails can show activities within directories, but the primary filtering options are more granular (e.g., by file) or higher-level (e.g., by share).

\* Option D (Folders): Incorrect. Similar to "Directory," "Folders" is not a standard filter option in File Analytics audit trails. While folder-level activities are logged, the audit trails are typically filtered by Share Name, Client IP, or specific files, not by a generic "Folders" category.

Selected Options:

\* A: Filtering by Share Name allows the administrator to focus on the specific shares accessed by the 100 users.

\* B: Filtering by Client IP enables tracking user activities based on their IP addresses, which is useful for identifying the 100 users' actions across multiple shares.

Exact Extract from Nutanix Documentation:

From the Nutanix File Analytics Administration Guide (available on the Nutanix Portal):

"File Analytics Audit Trails allow administrators to filter user activities by various criteria, including Share Name and Client IP.

Filtering by Share Name enables viewing activities on a specific share, while filtering by Client IP helps track user actions based on their source IP address."

:

Nutanix File Analytics Administration Guide, Version 4.0, Section: "Using Audit Trails in File Analytics" (Nutanix Portal).

Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Section: "Nutanix File Analytics Audit Features".

#### NEW QUESTION # 87

.....

As the saying goes, practice makes perfect. We are now engaged in the pursuit of Craftsman spirit in all walks of life. Professional

and mature talents are needed in each field, similarly, only high-quality and high-precision Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 qualification question can enable learners to be confident to take the qualification examination so that they can get the certificate successfully, and our NCP-US-6.5 Learning Materials are such high-quality learning materials, it can meet the user to learn the most popular test site knowledge. Because our experts have extracted the frequent annual test centers are summarized to provide users with reference.
