SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q47-Q52):

NEW QUESTION # 47
In a strategic freight procurement process how can you influence that fuel surcharge do NOT Exceed the base charges quoted by a carrier?

- A. Define target shares
- B. Publish target rates
- C. Define business shares
- D. Enable bonus-malus logic

Answer: B

NEW QUESTION # 48
You have transferred an SAP ERP sales order to SAP TM. An order-based transportation requirement (OTR) was created which automatically created a freight unit.
You now create an SAP ERP outbound delivery for the sales order which is also automatically transferred to SAP TM to create a delivery-based transportation requirement (DTR).
How does this affect the associated documents in SAP TM? There are 2 correct answers to this question.

- A. The OTR is blocked for planning
- B. The existing freight unit is canceled and a new freight unit is created
- C. The OTR is consumed
- D. The freight unit is reassigned from the OTR to the DTR

Answer: C,D

NEW QUESTION # 49
A carrier has responded to your request for quotation but was NOT automatically assigned to the freight order. What could be reasons for this? Note: There are 2 correct answers to this question.

- A. The tendering process was set to "Direct Tendering - Send Freight Order Directly".
- B. The carrier responded after the response time had expired.
- C. The tendering profile contains a subsequent step.
- D. The program to evaluate freight quotations was NOT executed.

Answer: B,D

Explanation:
In SAP S/4HANA Transportation Management, automatic carrier assignment during the tendering process depends on specific conditions being met. According to the SAP documentation:

* The carrier responded after the response time had expired (A)prevents automatic assignment because the tendering process only considers responses received within the defined time window. Late responses are ignored for automatic assignment.
* The program to evaluate freight quotations was NOT executed (C)means that the system did not process the carrier's response to assign it to the freight order. The evaluation program (e.g., a background job) is required to analyze quotations and assign the carrier based on criteria like cost or priority.
The other options are incorrect:
* Direct Tendering - Send Freight Order Directly (B)bypasses the quotation process and assigns the freight order directly to a carrier, so it would not prevent automatic assignment.
* The tendering profile contains a subsequent step (D)affects the sequence of tendering but does not inherently prevent automatic assignment if the response is valid and evaluated.

NEW QUESTION # 50
How can a user consider carrier reliability when selecting a carrier for a freight order? Note: There are 2 correct answers to this question.

- A. Define costs for earliness/lateness in planning cost settings
- B. Use the Business Context Viewer to evaluate carrier performance
- C. Choose "Cost+Priority" in carrier selection settings
- D. Assign an event profile to the freight order type

Answer: A,C

NEW QUESTION # 51
When using dispute management, which activities can a carrier perform in SAP Business Network for Logistics? Note: There are 2 correct answers to this question.

- A. Change the document currency.
- B. Upload files.
- C. Change a charge line's calculation base.
- D. Add a detention charge.

Answer: D
