## **HOT 100-160 Latest Dumps Ppt - High-quality Cisco Cisco Certified Support Technician (CCST) Cybersecurity - 100-160 Valid Exam Sample**

It is very important for us to keep pace with the changeable world and update our knowledge if we want to get a good job, a higher standard of life and so on. First, we need to get a good 100-160 quiz prep. Because we only pass 100-160 exam and get a certificate, we can have the chance to get a decent job and make more money. But there are question is that how you can pass the 100-160 Exam and get a certificate. The best answer is to download and learn our 100-160 quiz torrent. Our products will help you get what you want in a short time.

### **Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q78-Q83):**

#### **NEW QUESTION # 78**

Which of the following is an example of a source of evidence (artifact) in a cybersecurity investigation?

- A. Security policy documents.
- **B. Firewall logs recording network traffic.**
- C. Configuration files of network devices.
- D. Training materials for security awareness.

**Answer: B**

Explanation:

In a cybersecurity investigation, evidence or artifacts play a crucial role in determining the nature of an incident. Firewall logs recording network traffic can provide valuable information regarding communication between systems, including IP addresses, ports, protocols, and timestamps. Analyzing these logs can help identify potential threats or suspicious activities within a network.

#### **NEW QUESTION # 79**

Which of the following password policies is considered a best practice?

- A. Allowing users to set easily guessable passwords
- B. Storing passwords in plain text format
- **C. Enforcing a minimum password length and complexity requirements**
- D. Requiring passwords to be changed every 5 years

**Answer: C**

Explanation:

Enforcing a minimum password length and complexity requirements is considered a best practice for password policies. This helps to ensure that passwords are not easily guessable and increases the security of user accounts.

#### **NEW QUESTION # 80**

Which of the following is a common technique used by malware to evade detection?

- A. Implementation of strong firewalls
- B. Continuous monitoring of network traffic
- **C. Encryption of communication channels**
- D. Frequent system scans and updates

**Answer: C**

Explanation:

Malware often utilizes encryption techniques to make its communication with command and control servers difficult to detect. Encryption helps in disguising the communication and prevents network security measures from intercepting or analyzing the malicious traffic.

**NEW QUESTION # 81**

Which of the following is a key role of a Cisco Certified Support Technician (CCST) in cybersecurity?

- A. Conducting penetration testing
- **B. Managing network infrastructure**
- C. Designing user interfaces
- D. Developing software applications

**Answer: B**

Explanation:

A CCST in cybersecurity is primarily responsible for managing and maintaining network infrastructure to ensure the security of data and systems. They handle tasks such as monitoring network traffic, configuring firewalls, implementing security protocols, and troubleshooting network vulnerabilities.

**NEW QUESTION # 82**

What is configuration management in the context of cybersecurity?

- A. Establishing role-based access controls
- B. Managing and securing access to network devices
- C. Protecting the physical infrastructure of an organization
- **D. Ensuring consistency and control over the configuration of IT systems**

**Answer: D**

Explanation:

Configuration management in cybersecurity refers to the practice of ensuring consistency and control over the configuration of IT systems, including hardware, software, and network devices. This involves establishing and enforcing standardized configurations, monitoring and managing changes, and maintaining an accurate inventory of system configurations. Proper configuration management helps reduce the risk of configuration-related issues, vulnerabilities, and unauthorized changes that could compromise the security of IT systems.

**NEW QUESTION # 83**
