We guarantee that after you purchase our XSOAR-Engineer exam dumps, if you fail the XSOAR-Engineer exam certification, we will give a full refund.

Palo Alto Networks XSOAR Engineer Sample Questions (Q131-Q136):

NEW QUESTION # 131

When re-assigning an existing incident to a new incident type, an engineer is concerned about the preservation of critical data currently stored in fields that are only associated to the original incident type.

Upon making the change, in which state will the critical data be in the now unassociated fields?.

- A. Visible with Context Data, grayed out, and fully accessible.
- B. Hidden from Context Data and no longer accessible.
- **C. Visible within Context Data and fully accessible.**
- D. Hidden from the Context Data but accessible.

Answer: C

Explanation:

XSOAR separates Context Data from Incident Layout fields. When an incident field is populated, its value is stored in Context, even if the incident type later changes. The Admin Guide clearly states that context is persistent and not dependent on whether a field belongs to the new incident type.

If an incident is reassigned to a different incident type, fields not included in the new type's layout are no longer visible in the UI, but the data is fully retained in Context. Analysts can still retrieve the values through playbooks, scripts, or JSON view. This ensures investigations are not disrupted and historical information is never lost due to schema changes.

The data is not deleted, nor is it hidden from context (ruling out options A and D). It also does not appear grayed out in the UI (C), because the fields no longer appear at all unless re-added to the layout.

Thus, per XSOAR's data retention model, the correct state is B: Visible within Context Data and fully accessible.

NEW QUESTION # 132

In which two ways can data be transferred between playbooks and sub-playbooks? (Choose two.)

- **A. From context data, if context is shared globally**
- B. Automatically extracted by sub-playbooks
- **C. Inputs and outputs**
- D. Through integration context

Answer: A,C

NEW QUESTION # 133

Which two causes may be occurring if an integration test is working, but the integration is not fetching incidents? (Choose two.)

- **A. There are no new events from the external service**
- B. It can take up to 1-hour before incidents are initially fetched
- C. The first fetch should be manually triggered to start the fetching process
- **D. The 'Fetches Incidents' option may not have been enabled**

Answer: A,D

NEW QUESTION # 134

An XSOAR Engineer has developed a playbook and would like to contribute it to the XSOAR Marketplace to share with other users.

Which two options are available to the Engineer for contributing to the Marketplace? (Choose two.)

- A. Open a ticket with the XSOAR support team
- **B. Contribute through the XSOAR UI**
- C. Send an email to contributions@xsoar.com
- **D. Create a pull request directly on Github**

Answer: B,D

NEW QUESTION # 135

Inside the Incidents table view, which actions can be performed on the selected incidents? (Choose two.)

- A. Export incidents as JSON and change incident status
- **B. Run Command, Export, and Close and Delete for all selected incidents regardless of their status**
- **C. Assign, Edit, and Mark as Duplicate for all selected incidents regardless of their status**
- D. Run Command for all selected incidents having Active status

Answer: B,C

NEW QUESTION # 136

.....

It is a common sense that only high quality and accuracy XSOAR-Engineer training prep can relive you from those worries. It is our communal wish to reap successful fruits.
