Online CV0-004 Bootcamps, CV0-004 Dumps Collection

BraindumpsIT provides a high-quality CompTIA CV0-004 practice exam. The best feature of the CompTIA CV0-004 exam dumps is that they are available in PDF and a web-based test format. CompTIA offer updated CompTIA CV0-004 Exam products to our valuable customers. Real CompTIA CV0-004 exam questions along with answers are being provided in two formats.

CompTIA Cloud+ (2025) Sample Questions (Q328-Q333):

NEW QUESTION # 328

An administrator needs to adhere to the following requirements when moving a customer's data to the cloud:

- The new service must be geographically dispersed.
- The customer should have local access to data
- Legacy applications should be accessible.

Which of the following cloud deployment models is most suitable?

- A. Private
- B. On-premises
- C. Public
- **D. Hybrid**

Answer: D

Explanation:

A hybrid cloud deployment model is most suitable given the requirements. This model combines on-premises infrastructure (or private cloud) with public cloud services, providing geographic dispersion while allowing local access to data. It also facilitates the use of legacy applications that might not be well-suited for a full public cloud environment.

NEW QUESTION # 329

A cloud security analyst is concerned about security vulnerabilities in publicly available container images. Which of the following is the most appropriate action for the analyst to recommend?

- **A. Using CIS-hardened images**
- B. Using images that have an application firewall
- C. Using digitally signed images
- D. Using watermarked images

Answer: A

NEW QUESTION # 330

Which of the following is the best tool to deploy template-based, containerized workloads on premises and on the cloud?

- A. Git
- B. Jenkins
- C. Docker
- **D. Terraform**

Answer: D

Explanation:

Terraform is designed to deploy and manage infrastructure as code, including template-based, containerized workloads across both on-premises and cloud environments.

NEW QUESTION # 331

A cloud engineer is designing a high-performance computing cluster for proprietary software. The software requires low network latency and high throughput between cluster nodes.

Which of the following would have the greatest impact on latency and throughput when designing the HPC infrastructure?

- A. Node NIC
- **B. Node placement**

- C. Node size
- D. Node OS

Answer: B

Explanation:

Node placement is critical in high-performance computing (HPC) clusters where low network latency and high throughput are required. Proper placement of nodes within the network infrastructure, including proximity to each other and to key network components, can significantly reduce latency and increase throughput. Ensuring that nodes are physically close and well-connected can facilitate faster data transfer rates between them. Reference: CompTIA Cloud+ Certification Study Guide (Exam CV0-004) by Scott Wilson and Eric Vanderburg

NEW QUESTION # 332

A CI/CD pipeline is used to deploy VMs to an IaaS environment. Which of the following can be used to harden the operating system once the VM is running?

- A. Git
- **B. Ansible**
- C. Kubernetes
- D. Docker

Answer: B

Explanation:

Ansible can be used to harden the operating system once the VM is running. It is an automation tool that can configure systems, deploy software, and orchestrate more advanced IT tasks such as continuous deployments or zero downtime rolling updates. References: Ansible and other configuration management tools are part of the cloud management strategies discussed in the CompTIA Cloud+ certification material.

NEW QUESTION # 333

.....

You can easily download these formats of CompTIA CV0-004 actual dumps and use them to prepare for the CompTIA CV0-004 certification test. You don't need to enroll yourself in expensive CV0-004 Exam Training classes. With the CompTIA CV0-004 valid dumps, you can easily prepare well for the actual CompTIA CV0-004 exam at home.
