

Databricks-Certified-Data-Analyst-Associate인증덤프공 부자료인증시험은덤프로고고싱

Databricks인증 Databricks-Certified-Data-Analyst-Associate시험패스 공부방법을 찾고 있다면 제일 먼저Fast2test를 추천 해드리고 싶습니다. Databricks인증 Databricks-Certified-Data-Analyst-Associate시험이 많이 어렵다는것은 모두 알고 있는 것입니다. Fast2test에서 출시한 Databricks인증 Databricks-Certified-Data-Analyst-Associate덤프는 실제시험을 대비 하여 연구제작된 멋진 작품으로서 Databricks인증 Databricks-Certified-Data-Analyst-Associate시험적중율이 최고입니다. Databricks인증 Databricks-Certified-Data-Analyst-Associate시험패스를 원하신다면Fast2test의 제품이 고객님의 소원을 들어줄것입니다.

Fast2test를 검색을 통해 클릭하게된 지금 이 순간 IT인증자격증취득Databricks Databricks-Certified-Data-Analyst-Associate시험은 더는 힘든 일이 아닙니다. 다른 분들이Databricks Databricks-Certified-Data-Analyst-Associate시험준비로 수없는 고민을 할때 고객님의 저희 Databricks Databricks-Certified-Data-Analyst-Associate덤프로 제일 빠른 시일 내에 시험을 패스하여 자격증을 손에 넣을수 있습니다.

>>> Databricks-Certified-Data-Analyst-Associate인증덤프공부자료 <<<

Databricks-Certified-Data-Analyst-Associate퍼펙트 인증덤프자료, Databricks-Certified-Data-Analyst-Associate자격증공부

Databricks인증 Databricks-Certified-Data-Analyst-Associate시험은 중요한 IT인증자격증을 취득하는 필수시험과목입니다.Databricks인증 Databricks-Certified-Data-Analyst-Associate시험을 통과해야만 자격증 취득이 가능합니다.자격증을 많이 취득하면 자신의 경쟁율을 높여 다른능력자에 의해 대체되는 일은 면할수 있습니다.Fast2test에서는Databricks인증Databricks-Certified-Data-Analyst-Associate시험대비덤프를 출시하여 여러분이 IT업계에서 더 높은 자리에 오르도록 도움드립니다. 편한 덤프공부로 멋진 IT전문가의 꿈을 이루세요.

최신 Data Analyst Databricks-Certified-Data-Analyst-Associate 무료샘플문제 (Q47-Q52):

질문 # 47

A data analyst has a managed table `table_name` in database `database_name`. They would now like to remove the table from the database and all of the data files associated with the table. The rest of the tables in the database must continue to exist. Which of the following commands can the analyst use to complete the task without producing an error?

- A. `DROP TABLE table_name FROM database_name;`
- B. `DROP TABLE database_name.table_name;`
- C. `DROP DATABASE database_name;`
- D. `DELETE TABLE database_name.table_name;`
- E. `DELETE TABLE table_name FROM database_name;`

정답: B

질문 # 48

The stakeholders.customers table has 15 columns and 3,000 rows of data. The following command is run:

After running `SELECT * FROM stakeholders.eur_customers`, 15 rows are returned. After the command executes completely, the user logs out of Databricks.

After logging back in two days later, what is the status of the stakeholders.eur_customers view?

- A. The view remains available and `SELECT * FROM stakeholders.eur_customers` will execute correctly.
- B. The view is not available in the metastore, but the underlying data can be accessed with `SELECT * FROM delta.`stakeholders.eur_customers``.
- C. The view remains available but attempting to `SELECT` from it results in an empty result set because data in views are automatically deleted after logging out.
- D. The view has been converted into a table.
- E. The view has been dropped.

정답: E

설명:

The command you sent creates a TEMP VIEW, which is a type of view that is only visible and accessible to the session that created it. When the session ends or the user logs out, the TEMP VIEW is automatically dropped and cannot be queried anymore.

Therefore, after logging back in two days later, the status of the stakeholders.eur_customers view is that it has been dropped and `SELECT * FROM stakeholders.eur_customers` will result in an error. The other options are not correct because:

A) The view does not remain available, as it is a TEMP VIEW that is dropped when the session ends or the user logs out.

C) The view is not available in the metastore, as it is a TEMP VIEW that is not registered in the metastore. The underlying data cannot be accessed with `SELECT * FROM delta.stakeholders.eur_customers`, as this is not a valid syntax for querying a Delta Lake table. The correct syntax would be `SELECT * FROM delta.dbfs:/stakeholders/eur_customers`, where the location path is enclosed in backticks. However, this would also result in an error, as the TEMP VIEW does not write any data to the file system and the location path does not exist.

D) The view does not remain available, as it is a TEMP VIEW that is dropped when the session ends or the user logs out. Data in views are not automatically deleted after logging out, as views do not store any data. They are only logical representations of queries on base tables or other views.

E) The view has not been converted into a table, as there is no automatic conversion between views and tables in Databricks. To create a table from a view, you need to use a `CREATE TABLE AS` statement or a similar command. Reference: [CREATE VIEW | Databricks on AWS](#), [Solved: How do temp views actually work? - Databricks - 20136](#), [temp tables in Databricks - Databricks - 44012](#), [Temporary View in Databricks - BIG DATA PROGRAMMERS](#), [Solved: What is the difference between a Temporary View and ...](#)

질문 # 49

What does Partner Connect do when connecting Power BI and Tableau?

- A. Creates a Personal Access Token, downloads and installs an ODBC driver, and downloads a configuration file for connection by Power BI or Tableau to a SQL Warehouse (formerly known as a SQL Endpoint).
- B. Downloads a configuration file for connection by Power BI or Tableau to a SQL Warehouse (formerly known as a SQL Endpoint).
- C. Downloads and installs an ODBC driver.
- D. Creates a Personal Access Token for authentication into Databricks SQL and emails it to you.

정답: A

설명:

When connecting Power BI and Tableau through Databricks Partner Connect, the system automates several steps to streamline the integration process:

Personal Access Token Creation: Partner Connect generates a Databricks personal access token, which is essential for authenticating and establishing a secure connection between Databricks and the BI tools.

ODBC Driver Installation: The appropriate ODBC driver is downloaded and installed. This driver facilitates communication between the BI tools and Databricks, ensuring compatibility and optimal performance.

Configuration File Download: A configuration file tailored for the selected BI tool (Power BI or Tableau) is provided. This file contains the necessary connection details, simplifying the setup process within the BI tool.

By automating these steps, Partner Connect ensures a seamless and efficient integration, reducing manual configuration efforts and potential errors.

질문 # 50

A data analyst has created a Query in Databricks SQL, and now they want to create two data visualizations from that Query and add both of those data visualizations to the same Databricks SQL Dashboard.

Which of the following steps will they need to take when creating and adding both data visualizations to the Databricks SQL Dashboard?

- A. They will need to add two separate visualizations to the dashboard based on the same Query.
- B. They will need to decide on a single data visualization to add to the dashboard.
- C. They will need to copy the Query and create one data visualization per query.
- D. They will need to create two separate dashboards.
- E. They will need to alter the Query to return two separate sets of results.

정답: A

설명:

A data analyst can create multiple visualizations from the same query in Databricks SQL by clicking the + button next to the Results tab and selecting Visualization. Each visualization can have a different type, name, and configuration. To add a visualization to a dashboard, the data analyst can click the vertical ellipsis button beneath the visualization, select + Add to Dashboard, and choose an existing or new dashboard. The data analyst can repeat this process for each visualization they want to add to the same dashboard. Reference: Visualization in Databricks SQL, Visualize queries and create a dashboard in Databricks SQL

질문 # 51

Data professionals with varying responsibilities use the Databricks Lakehouse Platform Which role in the Databricks Lakehouse Platform use Databricks SQL as their primary service?

- A. Platform architect
- B. Data engineer
- C. Business analyst
- D. Data scientist

정답: C

설명:

In the Databricks Lakehouse Platform, business analysts primarily utilize Databricks SQL as their main service. Databricks SQL provides an environment tailored for executing SQL queries, creating visualizations, and developing dashboards, which aligns with the typical responsibilities of business analysts who focus on interpreting data to inform business decisions. While data scientists and data engineers also interact with the Databricks platform, their primary tools and services differ; data scientists often engage with machine learning frameworks and notebooks, whereas data engineers focus on data pipelines and ETL processes. Platform architects are involved in designing and overseeing the infrastructure and architecture of the platform. Therefore, among the roles listed, business analysts are the primary users of Databricks SQL.
