the PrepAwayExam platform. And the purpose of our study material is to allow students to pass the professional qualification exams that they hope to see with the least amount of time and effort.

## SAP Certified Associate - Security Administrator Sample Questions (Q80-Q85):

### NEW QUESTION # 80

When planning an authorization concept for your SAP S/4HANA Cloud Public Edition implementation, what rules must you consider? Note: There are 2 correct answers to this question.

- A. Business roles can be assigned directly to a business user.
- B. Business catalogs can be assigned directly to a business user.
- C. SAP Fiori apps, dashboards, and displays can be assigned directly to a business role.
- D. Business catalogs can be assigned directly to a business role.

**Answer: A,D**

Explanation:

In SAP S/4HANA Cloud Public Edition, the authorization concept revolves around business roles and catalogs. Business roles, which group authorizations for specific business processes, can be directly assigned to business users to grant access to relevant applications and data. Similarly, business catalogs, which contain collections of SAP Fiori apps and other functionalities, can be directly assigned to business roles to define the scope of access. However, business catalogs cannot be assigned directly to users; they must be linked through business roles. Additionally, individual SAP Fiori apps, dashboards, or displays are not directly assigned to business roles; they are included within business catalogs. This structured approach ensures a scalable and manageable authorization framework tailored to business needs.

### NEW QUESTION # 81

When planning an authorization concept for your SAP S/4HANA Cloud Public Edition implementation, what rules must you consider? Note: There are 2 correct answers to this question.

- A. Business roles can be assigned directly to a business user.
- B. Business catalogs can be assigned directly to a business user.
- C. SAP Fiori apps, dashboards, and displays can be assigned directly to a business role.
- D. Business catalogs can be assigned directly to a business role.

**Answer: A,D**

### NEW QUESTION # 82

What happens to data within SAP Enterprise Threat Detection during the aggregation process? Note: There are 3 correct answers to this question.

- A. It is enriched.
