- C. Just in time (JIT) VM access
- D. Azure Active Directory (Azure AD) Identity Protection

Answer: D

NEW QUESTION # 95

You need to provide the Azure administrator with the values to complete the Azure Resource Manager template.

Which values should you provide for diskCount, StorageAccountType, and domainName? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

diskCount:

	▼
0	
1	
2	
4	

storageAccountType:

	▼
Premium_LRS	
Standard_GRS	
Standard_LRS	

domainName:

	▼
ad.contoso.com	
ad.contoso.onmicrosoft.com	
contoso.com	
contoso.onmicrosoft.com	

Answer:

Explanation:

Microsoft

diskCount:

	▼
0	
1	
2	
4	

storageAccountType:

	▼
Premium_LRS	
Standard_GRS	
Standard_LRS	

domainName:

	▼
ad.contoso.com	
ad.contoso.onmicrosoft.com	
contoso.com	
contoso.onmicrosoft.com	

Explanation:

diskCount:

	▼
0	
1	
2	
4	

storageAccountType:

	▼
Premium_LRS	
Standard_GRS	
Standard_LRS	

domainName:

	▼
ad.contoso.com	
ad.contoso.onmicrosoft.com	
contoso.com	
contoso.onmicrosoft.com	

Microsoft

Box 1: 4

Scenario: the Azure Resource Manager template that will be used to provision the production application servers. Ensure that each production application server has four 1-TB data disks.

Box 2: Standard_LRS

Scenario: Minimize costs whenever possible.

Box 3: contoso.onmicrosoft.com

The network contains an on-premises Active Directory domain named ad.contoso.com

The Initial domain: The default domain (onmicrosoft.com) in the Azure AD Tenant. For example, contoso.onmicrosoft.com

NEW QUESTION # 96

You have a large and complex SAP environment on Azure.

You are designing a training landscape that will be used 10 times a year.

You need to recommend a solution to create the training landscape. The solution must meet the following requirements:

Minimize the effort to build the training landscape.

Minimize costs.

In which order should you recommend the actions be performed for the first training session? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Build the training landscape	 Microsoft
Create a custom image by using the snapshot	
Deliver the training	
Take a snapshot of the virtual machine disks	
Shut down and delete the virtual machines	

Navigation icons: Left arrow, Right arrow, Up arrow, Down arrow.

Answer:

Explanation:

Answer Area
Build...
Snapshot...
Custom Image...
Deliver Training....
Shutdown

- 1 - Build...
- 2 - Snapshot...
- 3 - Custom Image...
- 4 - Deliver Training...
- 5 - Shutdown

NEW QUESTION # 98

You have an SAP environment on Azure.

You use Azure Recovery Services to back up an SAP application server.

You need to test the restoration process of a file on the server.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Download and run the mount disk executable

From Azure Cloud Shell, run the `Get-AzBackupItem` cmdlet

From Azure Recovery Vault, select **File Recovery**

Recover the file and unmount the disk

From Azure Cloud Shell, run the `Get-AzBackupRecoveryPoint` cmdlet

Answer Area

Answer:

Explanation:

Actions

Download and run the mount disk executable

From Azure Cloud Shell, run the `Get-AzBackupItem` cmdlet

From Azure Recovery Vault, select **File Recovery**

Recover the file and unmount the disk

From Azure Cloud Shell, run the `Get-AzBackupRecoveryPoint` cmdlet

Answer Area

From Azure Recovery Vault, select **File Recovery**

Download and run the mount disk executable

Recover the file and unmount the disk

Microsoft

Explanation

From Azure Recovery Vault, select
File Recovery

Download and run the mount disk
executable

Recover the file and unmount the disk

Step 1: From Azure Recover Vault, select File Recovery

To restore files or folders from the recovery point, go to the virtual machine and choose the desired recovery point.

Step 2: Download and run the mount disk executable

Step 3: recover the file and unmount the disk

File Recovery
/2win2012r2

✓ **Step 1: Select recovery point**

7/20/2017, 1:36:40 PM [Latest] (AppCo... ▼

→ **Step 2: Download script to browse and recover files**

This script will mount the disks from the selected recovery point **as local drives on the machine where it is run**. These drives will remain mounted for 12 hours.

Download Executable *

Requires password to run

→ **Step 3: Unmount the disks after recovery**

Unmount disks and close the connection to the recovery point.

Unmount Disks

* Run this script on the machine where you want to copy the files

* To restore files larger than 10GB, restore entire VM to an alternate location or restore disks using PowerShell

* Data transfer rate: up to 1GB/Hr
