

# SC-100 exam preparatory: Microsoft Cybersecurity Architect & SC-100 actual lab questions

BTW, DOWNLOAD part of GuideTorrent SC-100 dumps from Cloud Storage: <https://drive.google.com/open?id=1IU6Y9Kpyr6sPCfflws6qr6jREqZteUWd>

Are you worried about your poor life now and again? Are you desired to gain a decent job in the near future? Do you dream of a better life? Do you want to own better treatment in the field? If your answer is yes, please prepare for the SC-100 exam. It is known to us that preparing for the exam carefully and getting the related certification are very important for all people to achieve their dreams in the near future. It is a generally accepted fact that the SC-100 Exam has attracted more and more attention and become widely acceptable in the past years.

Microsoft SC-100 (Microsoft Cybersecurity Architect) exam is designed to test an individual's knowledge and skills in the area of cybersecurity architecture. SC-100 exam is intended for individuals who are interested in pursuing a career in cybersecurity and want to validate their skills and knowledge in this field. The Microsoft SC-100 Exam is suitable for individuals who have a background in IT and cybersecurity, and who are looking to enhance their skills and knowledge in this area.

## Free SC-100 Updates, SC-100 Latest Dumps Questions

Microsoft provides the most reliable and authentic Microsoft SC-100 Exam prep material there is. The 3 kinds of Microsoft SC-100 Preparation formats ensure that there are no lacking points in a student when he attempts the actual SC-100 exam.

Microsoft SC-100 (Microsoft Cybersecurity Architect) Certification Exam is a comprehensive test designed to evaluate a candidate's knowledge and skills in cybersecurity architecture. Microsoft Cybersecurity Architect certification is ideal for IT professionals who are responsible for planning, designing, and implementing security solutions for organizations. SC-100 Exam is intended to validate the candidate's expertise in various areas of cybersecurity, including threat protection, identity and access management, cloud security, and compliance.

## Microsoft Cybersecurity Architect Sample Questions (Q167-Q172):

### NEW QUESTION # 167

Your company has a Microsoft 365 E5 subscription.

The Chief Compliance Officer plans to enhance privacy management in the working environment.

You need to recommend a solution to enhance the privacy management. The solution must meet the following requirements:

- Identify unused personal data and empower users to make smart data handling decisions.
- Provide users with notifications and guidance when a user sends

personal data in Microsoft Teams.

- Provide users with recommendations to mitigate privacy risks.

What should you include in the recommendation?

- A. Microsoft Viva Insights
- B. Advanced eDiscovery
- C. Privacy Risk Management in Microsoft Priva
- D. communication compliance in insider risk management

**Answer: C**

Explanation:

Privacy Risk Management in Microsoft Priva gives you the capability to set up policies that identify privacy risks in your Microsoft 365 environment and enable easy remediation. Privacy Risk Management policies are meant to be internal guides and can help you:

- Detect overexposed personal data so that users can secure it.
- Spot and limit transfers of personal data across departments or regional borders.
- Help users identify and reduce the amount of unused personal data that you store.

### NEW QUESTION # 168

You have an Azure SQL database named DB1 that contains customer information.

A team of database administrators has full access to DB1.

To address customer inquiries, operators in the customer service department use a custom web app named App1 to view the customer information.

You need to design a security strategy for DB1. The solution must meet the following requirements:

\* When the database administrators access DB1 by using SQL management tools, they must be prevented from viewing the content of the Credit Card attribute of each customer record.

\* When the operators view customer records in App1, they must view only the last four digits of the Credit Card attribute.

What should you include in the design? To answer, select the appropriate options in the answer area. NOTE:

Each correct selection is worth one point.

For the database administrators:

- Always Encrypted
- Always Encrypted
- Dynamic data masking
- Row-level security (RLS)
- Transparent Data Encryption (TDE)

For the operators:

- Row-level security (RLS)
- Always Encrypted
- Dynamic data masking
- Row-level security (RLS)
- Transparent Data Encryption (TDE)

**Answer:**

Explanation:

Answer Area

For the database administrators:

- Always Encrypted
- Always Encrypted
- Dynamic data masking
- Row-level security (RLS)
- Transparent Data Encryption (TDE)

For the operators:

- Row-level security (RLS)
- Always Encrypted
- Dynamic data masking
- Row-level security (RLS)
- Transparent Data Encryption (TDE)

Explanation:

Answer Area

Microsoft

For the database administrators: Always Encrypted

For the operators: Row-level security (RLS)

### NEW QUESTION # 169

You need to recommend a solution to meet the security requirements for the InfraSec group. What should you use to delegate the access?

- A. a resource group
- **B. a custom role-based access control (RBAC) role**
- C. a management group
- D. a subscription

**Answer: B**

Explanation:

Topic 2, Litware, inc. Case Study 2

Overview

Litware, inc. is a financial services company that has main offices in New York and San Francisco. Litware has 30 branch offices and remote employees across the United States. The remote employees connect to the main offices by using a VPN.

Litware has grown significantly during the last two years due to mergers and acquisitions. The acquisitions include several companies based in France.

Existing Environment

Litware has an Azure Active Directory (Azure AD) tenant that syncs with an Active Directory Domain Services (AD DS) forest named Utvare.com and is linked to 20 Azure subscriptions. Azure AD Connect is used to implement pass-through authentication. Password hash synchronization is disabled, and password writeback is enabled. All Litware users have Microsoft 365 E5 licenses. The environment also includes several AD DS forests, Azure AD tenants, and hundreds of Azure subscriptions that belong to the subsidiaries of Litware.

Planned Changes

Litware plans to implement the following changes:

- \* Create a management group hierarchy for each Azure AD tenant.
- \* Design a landing zone strategy to refactor the existing Azure environment of Litware and deploy all future Azure workloads.
- \* Implement Azure AD Application Proxy to provide secure access to internal applications that are currently accessed by using the VPN.

Business Requirements

Litware identifies the following business requirements:

- \* Minimize any additional on-premises infrastructure.
- \* Minimize the operational costs associated with administrative overhead.

Hybrid Requirements

Litware identifies the following hybrid cloud requirements:

- \* Enable the management of on-premises resources from Azure, including the following:
- \* Use Azure Policy for enforcement and compliance evaluation.
- \* Provide change tracking and asset inventory.
- \* Implement patch management.
- \* Provide centralized, cross-tenant subscription management without the overhead of maintaining guest accounts.

Microsoft Sentinel Requirements

Litware plans to leverage the security information and event management (SIEM) and security orchestration automated response (SOAR) capabilities of Microsoft Sentinel. The company wants to centralize Security Operations Center (SOC) by using Microsoft Sentinel.

Identity Requirements

Litware identifies the following identity requirements:

- \* Detect brute force attacks that directly target AD DS user accounts.
- \* Implement leaked credential detection in the Azure AD tenant of Litware.
- \* Prevent AD DS user accounts from being locked out by brute force attacks that target Azure AD user accounts.
- \* Implement delegated management of users and groups in the Azure AD tenant of Litware, including support for:
  - \* The management of group properties, membership, and licensing
  - \* The management of user properties, passwords, and licensing
  - \* The delegation of user management based on business units.

## Regulatory Compliance Requirements

Litware identifies the following regulatory compliance requirements:

- \* Insure data residency compliance when collecting logs, telemetry, and data owned by each United States- and France-based subsidiary.
- \* Leverage built-in Azure Policy definitions to evaluate regulatory compliance across the entire managed environment.
- \* Use the principle of least privilege.

## Azure Landing Zone Requirements

Litware identifies the following landing zone requirements:

- \* Route all internet-bound traffic from landing zones through Azure Firewall in a dedicated Azure subscription.
- \* Provide a secure score scoped to the landing zone.
- \* Ensure that the Azure virtual machines in each landing zone communicate with Azure App Service web apps in the same zone over the Microsoft backbone network, rather than over public endpoints.
- \* Minimize the possibility of data exfiltration.
- \* Maximize network bandwidth.

The landing zone architecture will include the dedicated subscription, which will serve as the hub for internet and hybrid connectivity.

Each landing zone will have the following characteristics:

- \* Be created in a dedicated subscription.
- \* Use a DNS namespace of litware.com.

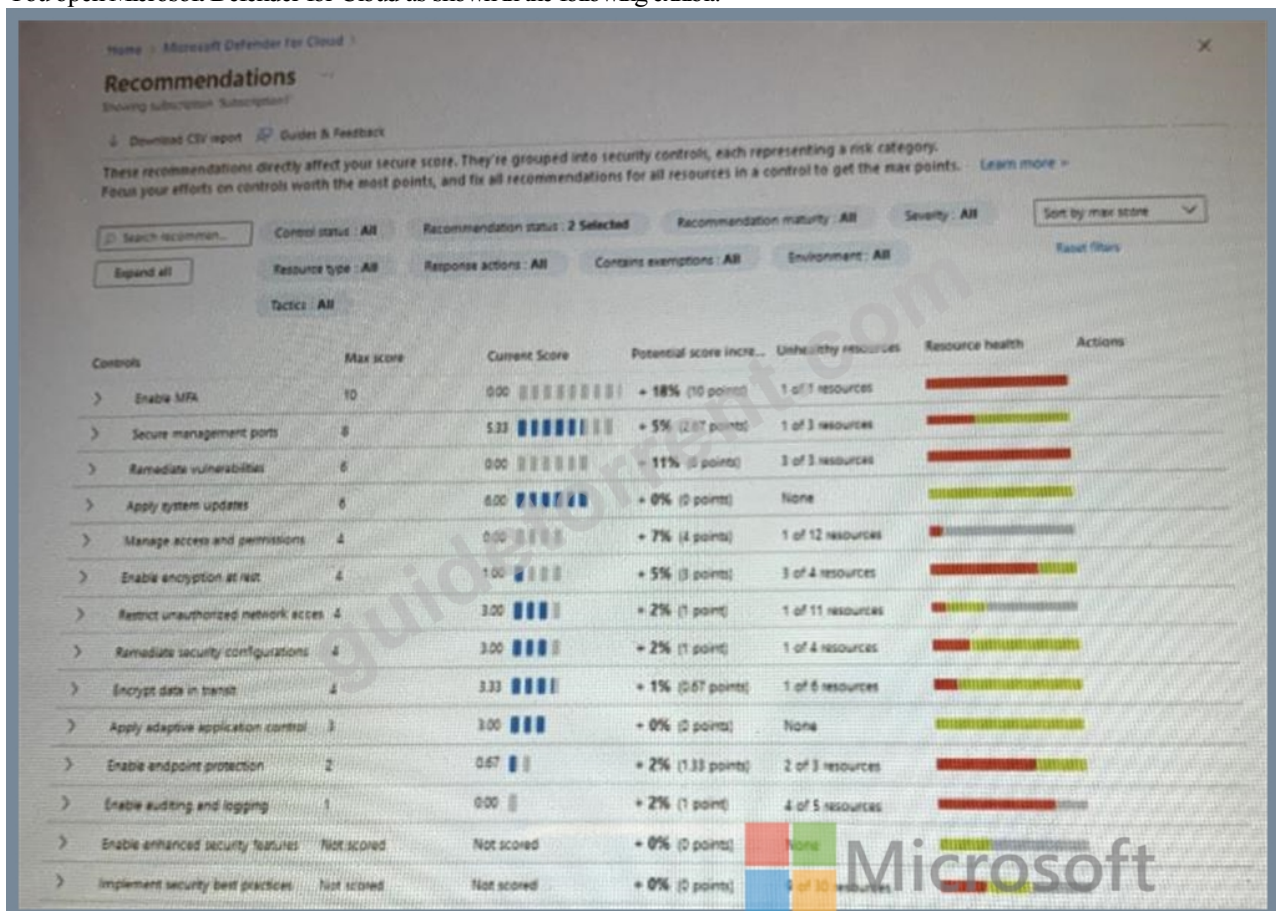

## Application Security Requirements

Litware identifies the following application security requirements:

- \* Identify internal applications that will support single sign-on (SSO) by using Azure AD Application Proxy.
- \* Monitor and control access to Microsoft SharePoint Online and Exchange Online data in real time.

## NEW QUESTION # 170

You open Microsoft Defender for Cloud as shown in the following exhibit.

Use the drop-down menus to select the answer choice that complete each statements based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

To increase the score for the Restrict unauthorized network access control, implement [answer choice].

Azure Active Directory (Azure AD) Conditional Access policies
Azure Web Application Firewall (WAF)
network security groups (NSGs)

To increase the score for the Enable endpoint protection control, implement [answer choice].

Microsoft Defender for Resource Manager
Microsoft Defender for servers
private endpoints

**Answer:**

**Explanation:**

To increase the score for the Restrict unauthorized network access control, implement [answer choice].

Azure Active Directory (Azure AD) Conditional Access policies
Azure Web Application Firewall (WAF)
network security groups (NSGs)

To increase the score for the Enable endpoint protection control, implement [answer choice].

Microsoft Defender for Resource Manager
Microsoft Defender for servers
private endpoints

**NEW QUESTION # 171**

A customer has a hybrid cloud infrastructure that contains a Microsoft 365 E5 subscription and an Azure subscription. All the on-premises servers in the perimeter network are prevented from connecting directly to the internet. The customer recently recovered from a ransomware attack. The customer plans to deploy Microsoft Sentinel.

You need to recommend configurations to meet the following requirements:

- \* Ensure that the security operations team can access the security logs and the operation logs.
- \* Ensure that the IT operations team can access only the operations logs, including the event logs of the servers in the perimeter network.

Which two configurations can you include in the recommendation? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Use the Azure Monitor agent with the multi-homing configuration.
- B. Create a custom collector that uses the Log Analytics agent.
- C. Configure Azure Active Directory (Azure AD) Conditional Access policies.
- D. Implement resource-based role-based access control (RBAC) in Microsoft Sentinel.

**Answer: A,D**

**Explanation:**

Topic 1, Litware, inc.  
Overview

Litware, inc. is a financial services company that has main offices in New York and San Francisco. litware has 30 branch offices and remote employees across the United States. The remote employees connect to the main offices by using a VPN.
