ISM Supply Management Integration Sample Questions (Q112-Q117):

NEW QUESTION # 112

The supply manager for a semiconductor company receives an emergency phone call from the firm's factory manager, who states that the manufacturing equipment is down and that a replacement part is needed as soon as possible. The supply manager checks the stock for this part but finds nothing. In this situation, the supply manager should do which of the following?

- A. Verify with the warehouse manager if there is an extra spare part in stock that was not correctly registered in the stock database system
- B. Ask the factory manager to perform an equipment failure analysis in order to understand the root cause of the equipment failure
- **C. Contact the equipment supplier and ask it to coordinate an expedited delivery of the part as soon as possible**
- D. Perform a cost analysis to examine if it is better to expedite the part or wait for the part's scheduled arrival date

Answer: C

Explanation:

In urgent situations, expediting replacement parts minimizes downtime and maintains production flow. Direct communication with the supplier is critical for fast resolution. Reference: Bowersox, D. J., Closs, D. J., & Cooper, M. B. (2013). Supply Chain Logistics Management.

NEW QUESTION # 113

GHI, Inc. is a U.S.-based company with an expanding product line. GHI widens its sourcing of components to global suppliers, including suppliers in countries which are not included in trading blocs or bilateral agreements with the United States. Compliance with which of the following will MOST likely reduce GHI's administrative burden of cargo inspections on materials imported from these sources?

- A. Global Environmental Management Initiative (GEMI)
- **B. Customs-Trade Partnership Against Terrorism (C-TPAT)**
- C. United Nations Convention on Contracts for the International Sale of Goods (CISG)
- D. Foreign Corrupt Practices Act (FCPA)

Answer: B

Explanation:

GHI, Inc. would benefit most from compliance with the Customs-Trade Partnership Against Terrorism (C-TPAT) (Option D). This initiative helps reduce the administrative burden of cargo inspections by establishing security guidelines and facilitating faster customs processing for participating companies. By aligning with C-TPAT, GHI can ensure smoother import procedures, even when dealing with countries outside of specific trading blocs. Reference: U.S. Customs and Border Protection information on C-TPAT.

NEW QUESTION # 114

Which of the following buying strategies refers to planning inbound material purchases and flows without the need for significant inventory levels?

- **A. Buying to requirements**
- B. Hedging
- C. Spot buying
- D. Forward buying

Answer: A

Explanation:

Buying to requirements involves planning purchases based on actual needs, minimizing inventory levels. This strategy supports lean inventory practices and reduces carrying costs, aligning procurement with just-in-time principles to enhance efficiency and responsiveness in supply chain operations.

NEW QUESTION # 115

A company saves packaging from incoming shipments and utilizes the cartons to sort parts and pad outgoing pallets. This can BEST be described as

- A. reclamation
- **B. reuse**
- C. reduction
- D. recycling

Answer: B

Explanation:

Utilizing packaging from incoming shipments for sorting parts and padding outgoing pallets is best described as reuse. This process involves using materials multiple times before disposal, reducing waste and resource consumption. References: Reuse is a key principle in sustainable supply chain practices, emphasizing the extension of product life cycles.

NEW QUESTION # 116

Which of the following will likely offer the BEST incentive for a supplier to make continuous improvements in its supply chain performance?
