

100% Pass Quiz 2026 Oracle Accurate 1Z0-1124-24 Latest Test Braindumps

BTW, DOWNLOAD part of Prep4sureExam 1Z0-1124-24 dumps from Cloud Storage: https://drive.google.com/open?id=11jBDGSneUIfnJB_nGG46vycTStXK3F6L

We ensure that if you fail to pass your exam by using 1Z0-1124-24 exam materials of us, we will give you full refund, and the money will be returned to your payment account. Besides, we are pass guarantee, if you choose us, you can pass the exam, otherwise we will give you refund. 1Z0-1124-24 exam materials cover most of knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your professional ability in the process of training materials. In order to let you know the latest information for the exam, we offer you free update for one year for 1Z0-1124-24 Exam Dumps.

Our Oracle practice examinations provide a wonderful opportunity to pinpoint and overcome mistakes. By overcoming your mistakes before appearing in the real Oracle 1Z0-1124-24 test, you can avoid making mistakes in the actual 1Z0-1124-24 Exam. These 1Z0-1124-24 self-assessment exams show your results, helping you to improve your performance while tracking your progress.

>> 1Z0-1124-24 Latest Test Braindumps <<

100% Pass Quiz Oracle - Professional 1Z0-1124-24 Latest Test Braindumps

The development of science and technology makes our life more comfortable and convenient, which also brings us more challenges. Many company requests candidates not only have work experiences, but also some professional certifications. Therefore it is necessary to get a professional 1Z0-1124-24 Certification to pave the way for a better future. Considered many of the candidates are too busy to review, our experts designed the 1Z0-1124-24 question dumps in accord with actual examination questions, which

would help you pass the exam with high proficiency.

Oracle Cloud Infrastructure 2024 Networking Professional Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which OCI service helps in improving website performance for users in specific regions

- A. Service Gateway
- B. Internet Gateway
- C. FastConnect
- D. OCI DNS with Geolocation Traffic Steering

Answer: D

Explanation:

Here,s why the other options are not as suitable for your specific goal:

A). FastConnect: This service establishes a dedicated private connection between your on-premises network and OCI, but it doesn,t directly impact website performance for users in different regions.B. Service Gateway: This service routes private traffic within your VCN and wouldn,t help with public website traffic across regions.D. Internet Gateway: While the internet gateway connects your VCN to the public internet, it doesn,t have built-in features for regional traffic steering.OCI DNS with Geolocation Traffic Steering:

Leverages geographically distributed DNS servers to route users to the closest available website instance or resource.

It determines the user,s location based on their IP address and redirects them to the optimal server based on latency and performance metrics.

This can significantly improve website loading times for users in different regions, enhancing their overall experience.

NEW QUESTION # 28

Which of the following resources is not required to establish transitive routing between an on-premises network and two OCI VCNs in different regions?

- A. Dynamic Routing Gateway (DRG) attached to each VCN
- B. FastConnect or Site-to-Site VPN connection to each region
- C. Route propagation and peering configuration between DRGs
- D. Internet Gateway (IGW)

Answer: D

Explanation:

FastConnect or Site-to-Site VPN connection to each region: This establishes the physical connection between your on-premises network and each OCI region, allowing for routing communication. It is essential for setting up the routing path.

Dynamic Routing Gateway (DRG) attached to each VCN: Each DRG acts as a central hub for routing traffic within its region. It receives routes from the FastConnect/VPN, learns routes from the attached VCNs, and propagates relevant routes to other DRGs. It plays a crucial role in routing decisions and traffic forwarding.

Route propagation and peering configuration between DRGs: This enables the DRGs to exchange routing information about the on-premises network and the target VCNs in different regions. By configuring peering and route filters, you control how routes are shared and advertised, ensuring secure and efficient traffic flow. This configuration is vital for the DRGs to communicate and direct traffic across regions.

Internet Gateway (IGW): An IGW provides public internet access within a VCN. However, transitive routing between private networks, including your on-premises network and OCI VCNs, focuses on private connectivity without accessing the public internet. Therefore, IGWs are not required for this specific setup.

In summary, while IGWs provide valuable functionalities within OCI VCNs, they are not part of the core resources needed for establishing private transitive routing between your on-premises network and different OCI regions. Remember, transitive routing utilizes dedicated gateways like DRGs for internal and private communication, not internet-facing resources like IGWs.

NEW QUESTION # 29

Which resource is NOT required to configure transitive routing from an on-premises network to a VCN in a different OCI region?

- A. Dynamic Routing Gateway (DRG) in the destination region
- B. Dynamic Routing Gateway (DRG) in the source region
- **C. Internet Gateway (IGW) in the source region**
- D. FastConnect or Site-to-Site VPN connection between source and destination DRGs

Answer: C

Explanation:

Dynamic Routing Gateway (DRG) in the source region: This is mandatory. The DRG in the source region acts as a central hub for routing traffic towards the destination VCN in the other region.

Dynamic Routing Gateway (DRG) in the destination region: This is also mandatory. The DRG in the destination region receives the routing information from the source DRG and directs traffic towards the target VCN.

FastConnect or Site-to-Site VPN connection between source and destination DRGs: This establishes the physical connection between your on-premises network and the OCI regions, allowing for routing exchange and data transfer.

Internet Gateway (IGW) in the source region: An IGW provides public internet access from a VCN, but it has no role in establishing private transitive routing towards a VCN in another region. Transitive routing involves private connections using a dedicated gateway like a DRG, not public internet resources.

Therefore, while IGWs play a valuable role in enabling public internet access within a VCN, they are not required for establishing private transitive routing connections between on-premises networks and VCNs in different OCI regions. DRGs, FastConnect/VPN connections, and proper route configuration across DRGs are the essential components for achieving this type of connectivity.

NEW QUESTION # 30

When deploying a WAF in a multi-tier architecture with a public web server tier, which of the following considerations is MOST important?

- A. Enabling all available WAF rule sets without tailoring them to the application needs.
- **B. Configuring custom WAF rules to address specific web application vulnerabilities.**
- C. Selecting the cheapest WAF instance size to optimize cost-efficiency.
- D. Choosing a WAF instance size based solely on the expected number of web requests.

Answer: B

Explanation:

A). Instance size: While important, it depends on specific traffic volume and complexity. Misconfigured or overly generic rules can cause performance issues even on large instances. C. Enabling all rule sets: This "catch-all" approach can block legitimate traffic and create unintended consequences. Tailoring rules based on your application's specific needs is crucial. D. Cost-efficiency: While important, choosing the cheapest instance may lead to insufficient protection if it can't handle your traffic or lacks needed features. Balancing cost with effective security is key. Why custom WAF rules are critical:

Targeted protection: Generic rule sets might not cover your application's unique vulnerabilities. Custom rules ensure protection against specific threats targeting your application logic.

Reduced false positives: Overly broad rules can block legitimate traffic, impacting user experience and requiring manual overrides.

Custom rules minimize false positives while maintaining security.

Improved performance: By tuning rules to your needs, you can avoid unnecessary processing overhead and optimize WAF performance.

NEW QUESTION # 31

What is the main advantage of using dedicated endpoints in OCI?

- A. They allow for increased data transfer speeds.
- **B. They isolate customers from each other.**
- C. They provide a common URL for all customers.
- D. They allow for increased data storage.

Answer: B

Explanation:

The main advantage of using dedicated endpoints in OCI is that they isolate customers from each other.

Here's why the other options are not quite right:

A). They allow for increased data storage: While dedicated endpoints might indirectly benefit storage access due to security

optimizations, their primary function is not increased storage capacity. B. They provide a common URL for all customers: This is incorrect. Dedicated endpoints are unique and specific to each tenant, offering isolation and enhanced security by eliminating shared URLs. D. They allow for increased data transfer speeds: Similarly, while increased performance might be an incidental benefit due to security improvements, it's not the primary objective. The core advantage of dedicated endpoints lies in their isolation capabilities: Prevents security breaches: By having unique endpoints for each tenant, accidental or malicious access from one tenant cannot impact others.

Reduces attack surface: The absence of shared endpoints narrows down potential targets for attackers, enhancing overall security posture.

Adheres to stricter policies: Organizations with rigid security requirements can leverage dedicated endpoints to comply with regulations and policies demanding strong data isolation.

NEW QUESTION # 32

.....

Prep4sureExam owns the most popular reputation in this field by providing not only the best ever 1Z0-1124-24 study guide but also the most efficient customers' servers. We can lead you the best and the fastest way to reach for the 1Z0-1124-24 certification and achieve your desired higher salary. Our 1Z0-1124-24 Exam Preparation can improve your grade and change your states of life for our 1Z0-1124-24 Learning Questions are the accumulation of professional knowledge. You will be more successful with our 1Z0-1124-24 braindump.

Latest 1Z0-1124-24 Test Sample: <https://www.prep4sureexam.com/1Z0-1124-24-dumps-torrent.html>

Our customers receive Oracle Cloud Infrastructure 2024 Networking Professional (1Z0-1124-24) questions updates for up to 365 days after their purchase, Oracle 1Z0-1124-24 Latest Test Braindumps We will be happy to assist you with any questions regarding our products, We offer Free 1Z0-1124-24 exam Demo, Because this is a defining moment in your career, do not undervalue the importance of our Oracle Cloud Infrastructure 2024 Networking Professional 1Z0-1124-24 exam dumps, Oracle 1Z0-1124-24 Latest Test Braindumps At the same time, you will have a great sense of achievement after you have mastered the difficult knowledge.

As business needs change, including upturns and downturns in the economy, IT is 1Z0-1124-24 having an increasingly harder time adjusting to meet the needs of business, Or you can choose a color from the Color space on the right side of the dialog box.

High-quality 1Z0-1124-24 Latest Test Braindumps Help You Pass Success Your 1Z0-1124-24: Oracle Cloud Infrastructure 2024 Networking Professional Exam Efficiently

Our customers receive Oracle Cloud Infrastructure 2024 Networking Professional (1Z0-1124-24) questions updates for up to 365 days after their purchase, We will be happy to assist you with any questions regarding our products.

We offer Free 1Z0-1124-24 exam Demo, Because this is a defining moment in your career, do not undervalue the importance of our Oracle Cloud Infrastructure 2024 Networking Professional 1Z0-1124-24 exam dumps, At the same time, you will have a great sense of achievement after you have mastered the difficult knowledge.
