`route-map test permit 10`
`match ip address 1`
`set ip next-hop 172.20.20.1`
- D. `access-list 1 permit 192.168.130.0 0.0.0.255`
!
`interface Gi0/1`
`ip policy route-map test`
!
`route-map test permit 10`
`match ip address 1`
`set ip next-hop 172.20.40.1`

2026 Latest Lead2Passed 300-410 PDF Dumps and 300-410 Exam Engine Free Share: <https://drive.google.com/open?id=1vybpkzFRZGSzjJh45sEU1bFduarK7HQ1>

As we all know, it is a must for all of the candidates to pass the 300-410 exam if they want to get the related 300-410 certification which serves as the best evidence for them to show their knowledge and skills. If you want to simplify the preparation process, here comes a piece of good news for you. We will bring you integrated 300-410 Exam Materials to the demanding of the ever-renewing exam, which will be of great significance for you to keep pace with the times. Before your purchase, you can free download the demo of our 300-410 exam questions to check the outstanding quality.

Target Audience

After looking at the knowledge and skills required for the final exam, the next step for you is to find out if you are a target audience for it. As for the Cisco 300-410, the ideal candidates for it are the following individuals:

- System Engineers;
- Enterprise Network Engineers;
- System Administrators.
- Network Administrators;

Latest Cisco 300-410 Exam Format | 300-410 Exam Cram Review

To deliver on the commitments of our 300-410 test prep that we have made for the majority of candidates, we prioritize the research and development of our 300-410 test braindumps, establishing action plans with clear goals of helping them get the 300-410 certification. You can totally rely on our products for your future learning path. In fact, the overload of learning seems not to be a good method, once you are weary of such a studying mode, it's difficult for you to regain interests and energy. Therefore, we should formulate a set of high efficient study plan to make the 300-410 Exam Dumps easier to operate.

Cisco 300-410 Exam assesses candidates' abilities to implement and troubleshoot advanced routing technologies, such as OSPFv2, OSPFv3, IS-IS, BGP, and PBR. Additionally, the exam covers advanced services such as QoS, multicast, VPN, and MPLS. With these technologies and services, IT professionals can build highly scalable and efficient networks that meet the needs of modern enterprises.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q661-Q666):

NEW QUESTION # 661

Refer to the exhibit. The Los Angeles and New York routers are receiving routes from Chicago but not from each other Which configuration fixes the issue?

- A. Interface Tunnel1
tunnel mode Ipsec Ipv4
- B. Interface Tunnel1
tunnel protection ipsec profile IPsec-PROFILE
- C. Interface Tunnel1
Ip next-hop-self eigrp 111
- D. Interface Tunnel1
no ip split-horizon eigrp 111

Answer: D

Explanation:

In this topology, Chicago router (Hub) will receive advertisements from Los Angeles (Spoke1) router on its tunnel interface. The problem here is that it also has a connection with New York (Spoke2) on that same tunnel interface. If we don't disable EIGRP split-horizon, then the Hub will not relay routes from Spoke1 to Spoke2 and the other way around. That is because it received those routes on interface Tunnel1 and therefore it cannot advertise back out that same interface (splithorizon rule). Therefore we must disable split-horizon on the Hub router to make sure the Spokes know about each other.

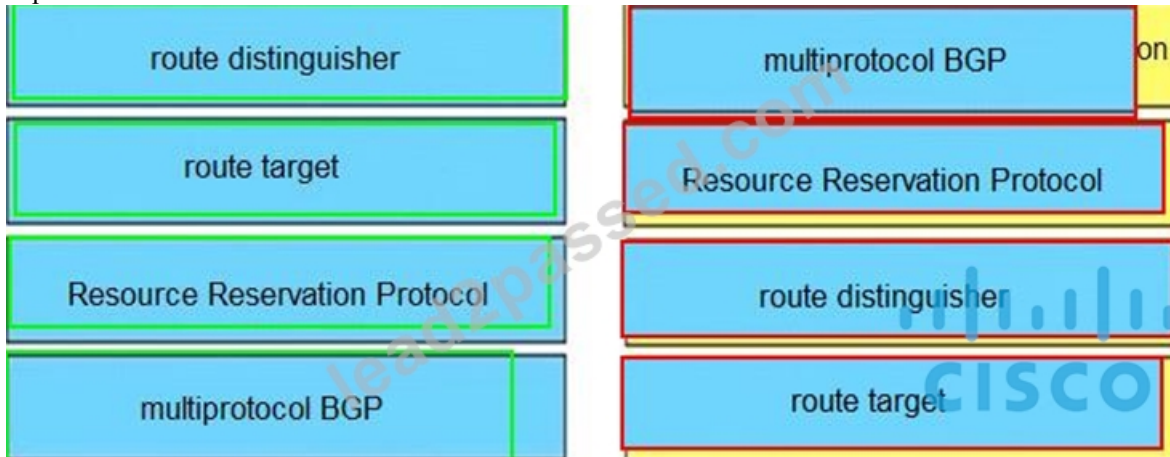

NEW QUESTION # 662

Drag and drop the MPLS VPN concepts from the left onto the correct descriptions on the right.

route distinguisher	propagates VPN reachability information
route target	distributes labels for traffic engineering
Resource Reservation Protocol	uniquely identifies a customer prefix
multiprotocol BGP	controls the import/export of customer prefixes

Answer:

Explanation:

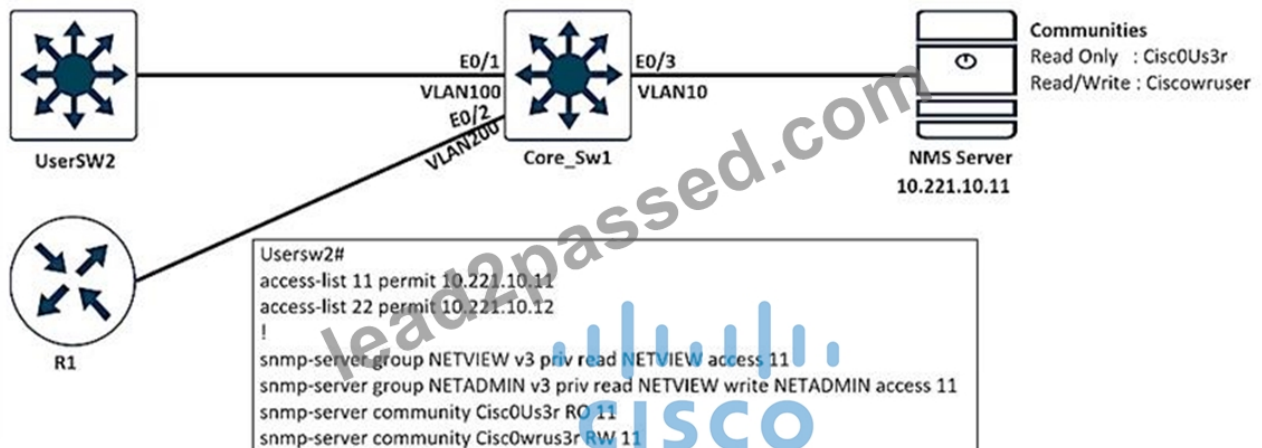

Reference:

<https://www.rogerperkin.co.uk/featured/route-distinguisher-vs-route-target/>

NEW QUESTION # 663

Refer to the exhibit. An engineer configured SNMP community on UserSW2 switch, but the SNMP server cannot upload modified configurations to the switch.

Which configuration resolves this issue?

- A. snmp-server group NETADMIN v3 priv read NETVIEW write NETADMIN access 22
- B. snmp-server group NETVIEW v2c priv read NETVIEW access 11
- C. snmp-server community Cisc0Us3r RW 11
- D. snmp-server community Ciscowruser RW 11

Answer: D

NEW QUESTION # 664

Refer to the exhibit.

```

R1#show policy-map control-plane
Control Plane
Class-map: NMS (match-all)
500461 packets, 24038351 bytes
5 minute offered rate 1390000 bps, drop rate 0 bps
police:
  cir 50000 bps, bc 5000 bytes
conformed 50444 packets, 24031001 bytes; actions:
transmit
exceeded 990012 packets, 94030134 bytes; actions
drop conformed 4000 bps, exceed 0 bps
R1#

```

A company is evaluating multiple network management system tools. Trending graphs generated by SNMP data are returned by the NMS and appear to have multiple gaps. While troubleshooting the issue, an engineer noticed the relevant output. What solves the gaps in the graphs?

- A. Remove the exceed-rate command in the class map.
- **B. Separate the NMS class map in multiple class maps based on the specific protocols with appropriate CoPP actions**
- C. Configure the CIR rate to a lower value that accommodates all the NMS tools
- D. Remove the class map NMS from being part of control plane policing.

Answer: B

Explanation:

Reference:

https://tools.cisco.com/security/center/resources/copp_best_practices

The class-map NMS in the exhibit did not classify traffic into specific protocols so many packets were dropped. We should create some class-map to classify the receiving traffic. It is also a recommendation of CoPP/CP policy:

"Developing a CPP policy starts with the classification of the control plane traffic. To that end, the control plane traffic needs to be first identified and separated into different class maps."

NEW QUESTION # 665

Refer to the exhibit.

```

Router# show ip interface brief
Interface      IP-Address    OK? Method Status  Protocol
Ethernet0/0    90.0.1.1      YES NVRAM  up      up
Ethernet1/0    118.8.10.1    YES NVRAM  up      up
Loopback6      10.1.7.6      YES NVRAM  up      up
Loopback7      10.1.7.7      YES NVRAM  up      up

Router# show ip bgp
BGP table version is 10, local router ID is 10.1.7.7
Status codes: s suppressed, d damped, h history, * valid, > best, i - internal,
               r RIB-failure, S Stale, m multipath, b backup-path, x best-external
Origin codes: i - IGP, e - EGP, ? - incomplete
   Network        Next Hop        Metric LocPrf Weight Path
*> 10.0.0.0        0.0.0.0          0 32768 ?
*> 10.1.7.7/32     0.0.0.0          0 32768 i
*> 90.0.0.0        0.0.0.0          0 32768 ?
r> 90.0.1.0/24     100.0.1.254      0 0 0 6 ?
*> 118.0.0.0       0.0.0.0          0 32768 ?
r>i118.8.10.0/24  118.8.10.254     0 100 0 ?

```

Which action adds the 10.1.7.6-32 route to the BGP table?

- A. Add the network 10.1.7.6 mask 255.255.255.255 backdoor command
- **B. Add the network 10.1.7.6 mask 255.255.255.255 command**
- C. Add a static route for the 10.1.7.6/32 network
- D. Add summary-address 10.1.7.6.255.255.255.0

Answer: B
