For candidates who are going to buy the exam dumps for the exam, the quality must be one of the most standards while choosing the exam dumps. ZDTA exam dumps are high quality and accuracy, since we have a professional team to research the first-rate information for the exam. We have reliable channel to ensure that ZDTA Exam Materials you receive is the latest one. We offer you free update for one year, and the update version for ZDTA exam materials will be sent to your automatically. We have online and offline service, and if you have any questions for ZDTA exam dumps, you can consult us.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 2	<ul style="list-style-type: none">• Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.

Topic 3	<ul style="list-style-type: none"> • Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 4	<ul style="list-style-type: none"> • Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS • SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.
Topic 5	<ul style="list-style-type: none"> • Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.

2026 Excellent ZDTA Valid Exam Testking | 100% Free ZDTA Vce Free

Some of our customers are white-collar workers with no time to waste, and need a Zscaler certification urgently to get their promotions, meanwhile the other customers might aim at improving their skills. So we try to meet different requirements by setting different versions of our ZDTA question dumps. The first one is online ZDTA engine version. As an online tool, it is convenient and easy to study, supports all Web Browsers and system including Windows, Mac, Android, iOS and so on. You can practice online anytime and check your test history and performance review, which will do help to your study. The second is ZDTA Desktop Test Engine. As an installable ZDTA software application, it simulated the real ZDTA exam environment, and builds 200-125 exam confidence. The third one is Practice PDF version. PDF Version is easy to read and print. So you can study anywhere, anytime.

Zscaler Digital Transformation Administrator Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which of the following methods can be used to notify an end-user of a potential DLP violation in Zscaler's Workflow Automation solution?

- A. Automated phone call
D Twitter post with custom hashtan
- B. SMS text message.
- C. Notifications in MS Teams / Slack

Answer: C

Explanation:

Zscaler's Workflow Automation integrates with collaboration platforms like Microsoft Teams and Slack to send real-time DLP violation alerts directly to end-users.

NEW QUESTION # 20

How does Zscaler Risk360 quantify risk?

- A. A risk score is computed for each of the four stages of breach.
- B. A risk score is computed based on the number of remediations needed compared to the industry peer average.
- C. The number of risk events is totaled by location and combined.
- D. Time to mitigate each identified risk is totaled, averaged, and tracked to show ongoing trends.

Answer: A

Explanation:

Zscaler Risk360 quantifies risk by computing a risk score that is based on the number of remediations needed in comparison to the

industry peer average. This approach allows organizations to understand their relative security posture by evaluating how many issues require remediation and benchmarking that against peers in the industry. This methodology enables prioritized risk management and provides context around the urgency and scale of remediation activities necessary to reduce risk. Unlike simply counting risk events or focusing on time to mitigate, Risk360 uses this comparative remediation-based scoring to give a comprehensive view of risk. It does not compute separate scores for each of the four breach stages but rather aggregates remediation efforts and benchmarks them to industry standards. This is confirmed by the study guide's explanation of Risk360's scoring method, highlighting the use of remediation counts compared to peers as the basis for risk scoring.

NEW QUESTION # 21

Which of the following are types of device posture?

- A. Certificate Trust, File Path, Full Disk Encryption
- **B. Unauthorized Modification, OS Version, License Key**
- C. Detect Crowdstrike, Crowdstrike ZTA score, First name
- D. Domain Joined, Process Check, Deception Check

Answer: B

Explanation:

Types of device posture typically include attributes that reflect the security and compliance status of a device.

This includes Unauthorized Modification, which checks if the device has unauthorized changes; OS Version, verifying if the operating system is up-to-date; and License Key, confirming the validity of software licenses on the device. These attributes help in assessing device trustworthiness for access control.

Other options include some irrelevant attributes such as "First name" or product-specific detections not generally categorized as device posture in Zscaler's framework.

NEW QUESTION # 22

According to the Zero Trust Exchange Functional Services Diagram, which services does Antivirus belong to?

- **A. Security Services**
- B. Access Control Services
- C. Advanced Threat Prevention Services
- D. Platform Services

Answer: A

Explanation:

In the Zscaler Zero Trust Exchange Functional Services Diagram, Antivirus is categorized under Security Services. Security Services include tools and mechanisms that inspect and enforce security on traffic, such as antivirus scanning, firewall controls, and data loss prevention. These services are core components for detecting and mitigating threats across internet-bound traffic.

NEW QUESTION # 23

SSH use or tunneling was detected and blocked by which feature?

- A. URL Filtering
- **B. Cloud App Control**
- C. Advanced Threat Protection
- D. Mobile Malware Protection

Answer: B

Explanation:

SSH tunneling falls under unsanctioned protocol use, which Zscaler's Cloud App Control feature detects via deep packet inspection and then blocks according to policy.
