

# 1Z0-1122-25 Unlimited Exam Practice & 1Z0-1122-25 Guide

P.S. Free & New 1Z0-1122-25 dumps are available on Google Drive shared by Real4Prep: <https://drive.google.com/open?id=1ypPZIMEtDrHjZCObUDs848YyTowK7eKK>

Among all substantial practice materials with similar themes, our 1Z0-1122-25 practice materials win a majority of credibility for promising customers who are willing to make progress in this line. With excellent quality at attractive price, our 1Z0-1122-25 practice materials get high demand of orders in this fierce market with passing rate up to 98 to 100 percent all these years. We shall highly appreciate your acceptance of our 1Z0-1122-25 practice materials and your decision will lead you to bright future with highly useful certificates.

## Oracle 1Z0-1122-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Intro to Generative AI &amp; LLMs: This section tests the abilities of AI Developers to understand generative AI and large language models. It introduces the principles of generative AI, explains the fundamentals of large language models (LLMs), and discusses the core workings of transformers, prompt engineering, instruction tuning, and LLM fine-tuning for optimizing AI-generated content.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Intro to AI Foundations:</b> This section of the exam measures the skills of AI Practitioners and Data Analysts in understanding the fundamentals of artificial intelligence. It covers key concepts, AI applications across industries, and the types of data used in AI models. It also explains the differences between artificial intelligence, machine learning, and deep learning, providing clarity on how these technologies interact and complement each other.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Intro to OCI AI Services:</b> This section tests the expertise of AI Solutions Engineers in working with OCI AI services and related APIs. It provides insights into key AI services such as language processing, computer vision, document understanding, and speech recognition, allowing professionals to leverage Oracle's AI ecosystem for building intelligent applications.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Intro to DL Foundations:</b> This section assesses the expertise of Deep Learning Engineers in understanding deep learning frameworks and architectures. It covers fundamental concepts of deep learning, introduces convolutional neural networks (CNN) for image processing, and explores sequence models like recurrent neural networks (RNN) and long short-term memory (LSTM) networks for handling sequential data.</li> </ul>

## Pass Guaranteed Oracle 1Z0-1122-25 Oracle Cloud Infrastructure 2025 AI Foundations Associate First-grade Unlimited Exam Practice

The system of our 1Z0-1122-25 latest exam file is great. It is developed and maintained by our company's professional personnel and is dedicated to provide the first-tier service to the clients. Our system updates the 1Z0-1122-25 exam questions periodically and frequently to provide more learning resources and responds to the clients' concerns promptly. Our system will supplement new 1Z0-1122-25 Latest Exam file and functions according to the clients' requirements and surveys the clients' satisfaction degrees about our 1Z0-1122-25 cram materials. The 1Z0-1122-25 exam will be a piece of cake with our 1Z0-1122-25 exam prep.

### Oracle Cloud Infrastructure 2025 AI Foundations Associate Sample Questions (Q31-Q36):

#### NEW QUESTION # 31

Which capability is supported by the Oracle Cloud Infrastructure Vision service?

- A. Generating realistic images from text
- **B. Detecting vehicle number plates to issue speed citations**
- C. Analyzing historical data for unusual patterns
- D. Detecting and preventing fraud in financial transactions

**Answer: B**

Explanation:

The Oracle Cloud Infrastructure (OCI) Vision service is designed for image analysis tasks, which includes the capability to detect and recognize objects, such as vehicle number plates. This functionality is particularly useful for applications such as automated enforcement of traffic laws, where the system can identify vehicles exceeding speed limits and issue citations based on the detected number plates. This capability leverages advanced computer vision techniques to process and analyze visual data, making it suitable for applications in public safety, transportation, and law enforcement.

#### NEW QUESTION # 32

What would you use Oracle AI Vector Search for?

- A. Manage database security protocols.
- B. Query data based on keywords.
- C. Store business data in a cloud database.
- **D. Query data based on semantics.**

**Answer: D**

Explanation:

Oracle AI Vector Search is designed to query data based on semantics rather than just keywords. This allows for more nuanced and contextually relevant searches by understanding the meaning behind the words used in a query. Vector search represents data in a high-dimensional vector space, where semantically similar items are placed closer together. This capability makes it particularly powerful for applications such as recommendation systems, natural language processing, and information retrieval where the meaning and context of the data are crucial.

### NEW QUESTION # 33

How does Oracle Cloud Infrastructure Document Understanding service facilitate business processes?

- A. By transcribing spoken language
- B. By generating lifelike speech from documents
- C. By automating data extraction from documents
- D. By analyzing sentiment in text documents

**Answer: C**

Explanation:

Explanation:

### NEW QUESTION # 34

What is the primary benefit of using Oracle Cloud Infrastructure Supercluster for AI workloads?

- A. It offers seamless integration with social media platforms.
- B. It provides a cost-effective solution for simple AI tasks.
- C. It is ideal for tasks such as text-to-speech conversion.
- D. It delivers exceptional performance and scalability for complex AI tasks.

**Answer: D**

Explanation:

Oracle Cloud Infrastructure Supercluster is designed to deliver exceptional performance and scalability for complex AI tasks. The primary benefit of this infrastructure is its ability to handle demanding AI workloads, offering high-performance computing (HPC) capabilities that are crucial for training large-scale AI models and processing massive datasets. The architecture of the Supercluster ensures low-latency networking, efficient resource allocation, and high-throughput processing, making it ideal for AI tasks that require significant computational power, such as deep learning, data analytics, and large-scale simulations.

### NEW QUESTION # 35

What are Convolutional Neural Networks (CNNs) primarily used for?

- A. Image generation
- B. Text processing
- C. Image classification
- D. Time series prediction

**Answer: C**

Explanation:

Convolutional Neural Networks (CNNs) are primarily used for image classification and other tasks involving spatial data. CNNs are particularly effective at recognizing patterns in images due to their ability to detect features such as edges, textures, and shapes across multiple layers of convolutional filters. This makes them the model of choice for tasks such as object recognition, image segmentation, and facial recognition.

CNNs are also used in other domains like video analysis and medical image processing, but their primary application remains in image classification.

### NEW QUESTION # 36
