## Questions (Q95-Q100):

### NEW QUESTION # 95

Which ONE of the following roles is responsible for mediating, managing time, and generating a safe review environment in which everyone can speak freely?

- A. Review leader
- B. Reviewer
- C. Manager
- **D. Moderator**

**Answer: D**

Explanation:

The Moderator (D) plays a key role in informal reviews by facilitating discussions, ensuring that reviews stay on track, and creating an open environment for feedback. The Manager (A) is responsible for overseeing the testing process but does not directly facilitate reviews. The Reviewer (B) is responsible for examining the work product, while the Review Leader (C) organizes reviews but does not necessarily mediate them.

### NEW QUESTION # 96

The acceptance criteria associated with a user story:

- A. must be written in one of the two following formats: scenario-oriented or rule-oriented
- B. are often documented following in rule-oriented format using the following template: "As a [role], I want [feature], so that I can [benefit]"
- C. are often written in a rule-oriented format using the template referred to as "Given/When/Then"
- **D. can be written in different formats and represent an aspect of a user story referred to as 'confirmation' of the so called '3 C's'**

**Answer: D**

Explanation:

The acceptance criteria associated with a user story are the conditions that must be met for the user story to be considered done and to deliver the expected value to the user. They are often written in different formats, such as rule-oriented, scenario-oriented, or table-oriented, depending on the nature and complexity of the user story. They represent an aspect of a user story referred to as confirmation, which is one of the so called "3 C's" of user stories. The other two aspects are card and conversation. Card refers to the concise and informal description of the user story, usually following the template: "As a [role], I want [feature], so that I can [benefit]". Conversation refers to the ongoing dialogue between the stakeholders and the team members to clarify and refine the user story and its acceptance criteria. Therefore, option C is the correct answer.

### NEW QUESTION # 97

Which of the following lists factors That contribute to PROJECT risks?

- A. poor software quality characteristics; software does not perform its intended functions.
- **B. skill and staff shortages; problems in defining the right requirements, contractual issues.**
- C. problems in defining the right requirements; contractual issues; poor software quality characteristics.
- D. skill and staff shortages; software does not perform its intended functions; problems in defining the right requirements.

**Answer: B**

Explanation:

Project risks are the uncertainties or threats that may affect the project objectives, such as scope, schedule, cost, and quality.

According to the ISTQB Certified Tester Foundation Level (CTFL) v4.0 syllabus, some of the factors that contribute to project risks are:

\* Skill and staff shortages: This factor refers to the lack of adequate or qualified human resources to perform the project tasks. This may result in delays, errors, rework, or low productivity.

\* Problems in defining the right requirements: This factor refers to the difficulties or ambiguities in eliciting, analyzing, specifying,

validating, or managing the requirements of the project. This may result in misalignment, inconsistencies, gaps, or changes in the requirements, affecting the project scope and quality.

\* Contractual issues: This factor refers to the challenges or disputes that may arise from the contractual agreements between the project parties, such as clients, suppliers, vendors, or subcontractors. This may result in legal, financial, or ethical risks, affecting the project delivery and satisfaction.

The other options are not correct because they list factors that contribute to PRODUCT risks, not project risks. Product risks are the uncertainties or threats that may affect the quality or functionality of the software product or system. Some of the factors that contribute to product risks are:

\* Poor software quality characteristics: This factor refers to the lack of adherence or compliance to the quality attributes or criteria of the software product or system, such as reliability, usability, security, performance, or maintainability. This may result in defects, failures, or dissatisfaction of the users or stakeholders.

\* Software does not perform its intended functions: This factor refers to the deviation or discrepancy between the expected and actual behavior or output of the software product or system. This may result in errors, faults, or malfunctions of the software product or system.

References = ISTQB Certified Tester Foundation Level (CTFL) v4.0 syllabus, Chapter 1: Fundamentals of Testing, Section 1.5: Risks and Testing, Pages 14-16.

### NEW QUESTION # 98

Scenario 2 "Big Drop":

The management of the company "The Big Drop" has instructed the Product Team to configure the discounts in the sales terminals so that frequent customers receive an additional discount on top of a bulk discount, based on the following table:

BULK DISCOUNTS		
PURCHASE VOLUME		DISCOUNT
1 to 100 units		0%
101 to 1000 units		5%
More than 1000 units		10%
DISCOUNT FOR FREQUENT CUSTOMERS		
FREQUENT CUSTOMER	PURCHASE VOLUME	DISCOUNT
YES	Independent of quantity	5%
NO	Independent of quantity	0%

Question:

You must design test cases to represent all POSSIBLE and REAL business scenarios. Test cases should be generated using the input data provided in the table above.

How many POSSIBLE decision rules can be extracted from the table above?

- A. 8 decision rules
- B. 5 decision rules
- C. 6 decision rules
- D. 32 decision rules

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

This is a classic application of the Decision Table Testing technique.

We are combining two conditions:

\* Purchase Volume, which has 3 equivalence classes:

\* 1 to 100 units # 0%

\* 101 to 1000 units # 5%

\* More than 1000 units # 10%

\* Customer Type, which has 2 categories:

\* Frequent Customer = YES # 5% extra

\* Frequent Customer = NO # 0%

This gives:

$3 \text{ (bulk discount levels)} \times 2 \text{ (frequent customer options)} = 6 \text{ unique decision rules}$  Each combination of these input conditions defines a separate test scenario with its own outcome.

"Decision table testing is used to identify the different combinations of inputs and their associated outputs.

Each unique combination of input values defines a rule."

(ISTQB CTFL Syllabus v4.0, Section 4.2.3 - Decision Table Testing, Page 40) Thus, Option D (6 decision rules) is the correct answer.

### NEW QUESTION # 99

Which ONE of the following elements is TYPICALLY NOT part of a test progress report?

- A. A detailed assessment of product quality
- B. New or changed risks
- C. Test metrics to show the current status of the test process
- D. Obstacles and their workarounds

**Answer: A**

Explanation:

A test progress report provides an overview of testing activities, metrics, and identified risks. It focuses on tracking testing progress rather than evaluating overall product quality (B), which is typically included in a test summary report after testing is completed.

\* (A) is correct because obstacles (challenges) are reported to ensure test execution stays on track.

\* (C) is correct as test metrics help stakeholders track execution progress.

\* (D) is correct because new or changed risks impact test focus and priorities.

A test progress report tracks execution and informs stakeholders about ongoing testing activities.

### NEW QUESTION # 100

.....

As we all know, famous companies use certificates as an important criterion for evaluating a person when recruiting. The number of certificates you have means the level of your ability. CTFL\_Syll\_4.0 practice materials are an effective tool to help you reflect your abilities. With our study materials, you do not need to have a high IQ, you do not need to spend a lot of time to learn, you only need to follow the method CTFL\_Syll\_4.0 Real Questions provide to you, and then you can easily pass the exam. Our study material is like a tutor helping you learn, but unlike a tutor who make you spend too much money and time on learning.
