

2026 High Pass-Rate VMware 3V0-24.25: Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Training For Exam

DOWNLOAD the newest Getcertkey 3V0-24.25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1imml1ISyYA-5yYgKJm80E6QK63IVwlR>

Our web-based practice exam software is an online version of the VMware 3V0-24.25 practice test. It is also quite useful for instances when you have internet access and spare time for study. To study and pass the VMware 3V0-24.25 Certification Exam on the first attempt, our VMware 3V0-24.25 practice test software is your best option.

One of the biggest challenges of preparing for a VMware 3V0-24.25 certification exam is staying motivated. It is easy to get bogged down by all the material you need to learn and lose sight of your goal. That is why our VMware 3V0-24.25 PDF and practice tests are designed to be engaging and easy to understand.

>> 3V0-24.25 Training For Exam <<

Pass Guaranteed 2026 VMware 3V0-24.25: Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Latest Training For Exam

The valid updated, and real VMware 3V0-24.25 PDF questions and both practice test software are ready to download. Just take the best decision of your professional career and get registered in VMware 3V0-24.25 certification exam and start this journey with Getcertkey 3V0-24.25 exam PDF dumps and practice test software. All types of VMware Exam Questions formats are available at the best price. It will enable you to perform well in the final 3V0-24.25 Exam. Getcertkey offers 3V0-24.25 exam study material in the three best formats. VMware 3V0-24.25 Exam Questions, Web-based and desktop practice exam software. All these formats play a vital role in your VMware 3V0-24.25 exam preparation process.

VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q51-Q56):

NEW QUESTION # 51

A Platform Engineer is designing a Blue/Green Deployment model for a critical application using Contour Ingress Controller.

Goal:

- * v1 of the app is live.
- * v2 is deployed but receives no traffic.
- * The engineer wants to shift 10% of the traffic to v2 for testing (Canary) before a full switch.

Which Contour Custom Resource Definition (CRD) should be used instead of the standard Kubernetes Ingress object to achieve this weighted traffic splitting?

- A. VirtualService
- B. IngressRoute
- C. NetworkPolicy

- D. ServiceEntry
- E. HTTPProxy

Answer: E

NEW QUESTION # 52

An administrator is deploying vSphere Kubernetes Service (VKS) to support containerized workloads across multiple regions. Each region hosts a dedicated Workload Domain with Supervisor instances deployed on vSphere Distributed Switch (VDS) networking. The organization's security policy requires that pod-to-pod and pod-to-service communications be fully observable and controllable at the Kubernetes layer, without introducing additional licensing or overlay complexity.

When deploying a Supervisor, which CNI should the administrator select as the default supported option?

- A. Flannel
- B. Cilium
- C. Calico
- D. Antrea

Answer: D

Explanation:

VCF 9.0 explicitly documents that VKS supports two CNI options: Antrea and Calico, and that the system-defined default CNI is Antrea. This directly eliminates Flannel and Cilium as default supported options for VKS clusters on Supervisor in this context. VCF 9.0 also describes how a vSphere administrator can view or change this setting in the vSphere Client under Supervisor Management → Configure → Kubernetes Service → Default CNI, further reinforcing that Antrea is the baseline/default choice.

From a policy perspective in the question, the requirement is Kubernetes-layer observability and control of pod communications "without additional licensing or overlay complexity." Antrea is presented in VCF 9.0 as the default CNI and is implemented using Open vSwitch, with networking and network policy capabilities provided at the Kubernetes layer for pods and services. Because it is the documented default (and supported) option for new VKS clusters, selecting Antrea best aligns with the "default supported option" requirement.

NEW QUESTION # 53

What is a characteristic of a Kubernetes pod?

- A. A pod is the smallest deployable unit in Kubernetes.
- B. A pod can contain only one container.
- C. A pod is deployed directly on the virtual machine.
- D. A pod is the smallest entity managed by Docker.

Answer: A

Explanation:

VCF 9.0 explains pod fundamentals by describing how Workload Management introduces vSphere Pods, stating a vSphere Pod is "equivalent of a Kubernetes pod" and that it "runs one or more Linux containers." This directly eliminates option B, because a pod can include one or more containers (not only one).

The vSphere 9.0 documentation further defines a Kubernetes Pod as "a group of one or more containerized applications that share such resources as storage and network," and notes the containers inside a pod are "started, stopped, and replicated as a group." That definition reflects Kubernetes' scheduling and lifecycle model: Kubernetes treats the pod as the primary unit it places and manages together, which is why a pod is regarded as the smallest deployable unit for running containerized workloads in Kubernetes. Options C and D are incorrect because pods are Kubernetes objects (not "managed by Docker" as a smallest entity), and Kubernetes abstracts the underlying runtime/host so pods are not defined as being "deployed directly on the virtual machine" as a characteristic.

NEW QUESTION # 54

An administrator is tasked with installing Istio Service Mesh for VMware vSphere Kubernetes Service (VKS). Which command installs Istio?

- A. Use `vcf package install` to install the Istio package.
- B. Use `curl` to download and install Istio.
- C. Use `docker build istioctl`.

- D. Use `kubectl istioctl install`.

Answer: A

Explanation:

VCF 9.0 describes a standardized approach to deploying optional capabilities on VKS clusters via standard packages. In the VCF Automation cloud services overview, VMware lists Istio among the packages that "can be optionally installed" for VKS. For installing those packages, the VCF CLI provides a dedicated package plugin that "works on a workload cluster" and exposes explicit install workflows.

The VCF CLI command reference shows the syntax for installing a package:

`vcf package install INSTALLED_PACKAGE_NAME --package PACKAGE_NAME --version VERSION` (with optional values files and overlays). This is the supported, VCF-aligned way to install standard packages such as Istio onto a VKS workload cluster in a controlled, declarative manner, including tracking reconciliation status and providing configuration via a values file.

Options that rely on ad-hoc downloads (`curl`) or building tooling (`docker build`) do not match the documented VCF package-management workflow for VKS standard packages. Therefore, the correct command family is `vcf package install`.

NEW QUESTION # 55

A VI Administrator wants to configure the Cluster Autoscaler behavior for a specific TKG cluster to be less aggressive when scaling down nodes, to prevent "flapping" during short lulls in traffic.

Which of the following are valid configuration methods or parameters to tune the scale-down behavior in vSphere with Tanzu? (Select all that apply.)

- A. Edit the HorizontalPodAutoscaler definition to reduce the stabilization window.
- B. Adjust the `cluster-api-autoscaler-node-group-scale-down-delay-after-add` annotation (or equivalent global setting if exposed) to increase the cooldown period after a scale-up event.
- C. It is not possible to tune autoscaler parameters; the default values are hardcoded in the Supervisor services.
- D. Configure the `scale-down-unnneeded-time` parameter (often passed via `TkgServiceConfiguration` or specific cluster annotations depending on version) to define how long a node must be unnecessary before it is terminated.
- E. Set the `min-size` equal to the `max-size` to disable scale down entirely.

Answer: B,D,E

NEW QUESTION # 56

.....

The product we provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the 3V0-24.25 study materials by the method which is convenient for you. They check the update every day, and we can guarantee that you can get a free update service from the date of purchase. Once you have any questions and doubts about the VMware exam questions we will provide you with our customer service before or after the sale, you can contact us if you have question or doubt about our exam materials and the professional personnel can help you solve your issue about using 3V0-24.25 Study Materials.

Exam 3V0-24.25 Study Guide: https://www.getcertkey.com/3V0-24.25_braindumps.html

As you can find on our website, we have three different versions of our 3V0-24.25 exam questions: the PDF, Software and APP online, VMware 3V0-24.25 Training For Exam We use traffic log cookies to identify which pages are being used, For candidates who want to pass the exam just one time, the valid 3V0-24.25 study materials are quite necessary, A lot of IT professional know that VMware certification 3V0-24.25 exam can help you meet these aspirations.

That, my friends, we can do, As part of the State Latest 3V0-24.25 Exam Price of Independence research we conducted a cluster analysis looking at why people become and stay independent workers self employed, freelancers, 3V0-24.25 etc. Much like lite beer, there were two key motivations flexibility and fulfilling work.

Getcertkey VMware 3V0-24.25 Exam Questions are Verified by Subject Matter Experts

As you can find on our website, we have three different versions of our 3V0-24.25 Exam Questions: the PDF, Software and APP online, We use traffic log cookies to identify which pages are being used.

For candidates who want to pass the exam just one time, the valid 3V0-24.25 study materials are quite necessary, A lot of IT

professional know that VMware certification 3V0-24.25 exam can help you meet these aspirations.

Purchase this updated VMware 3V0-24.25 exam practice material today and start your journey to a shining career.
