Arch-303 Simulation Questions - Arch-303 Practice Questions

Our Arch-303 practice materials made them enlightened and motivated to pass the exam within one week, which is true that someone did it always. The number is real proving of our Arch-303 exam questions rather than spurious made-up lies. And you can also see the comments on the website to see how our loyal customers felt about our Arch-303 training guide. They all highly praised our Arch-303 learning prep and got their certification. So will you!

Salesforce Certified B2C Commerce Architect Sample Questions (Q27-Q32):

NEW QUESTION # 27

During discovery, the customer required a feature that is not inducted in the standard Storefront Reference Architecture CSFRA). In order to save budget, the Architect needs to find the quickest way to implement this feature.

What is the primary resource the Architect should use to search for an existing community Implementation of the requested feature?

- A. Salesforce Commerce Cloud GitHub repository
- B. Salesforce B2C Commerce Documentation
- C. Salesforce Trailblazer Portal
- D. Salesforce Commerce Cloud Trailblazer community

Answer: A

Explanation:

When seeking a community implementation of a feature not included in the standard Storefront Reference Architecture (SFRA), the primary resource should be the Salesforce Commerce Cloud GitHub repository (Answer A). This repository often contains projects and code samples contributed by other developers in the community, which might include custom implementations that could be adapted to meet the customer's requirements. This approach not only leverages existing solutions that have been shared publicly but also can significantly save time and resources in development.

NEW QUESTION # 28

The Client is creating a new Storefront and their requirements include:

- * ApplePay support
- * Log in through a standard OAuth2 social media account
- * One Click checkout process
- * A/B testing for promotions

Which two items require technical documentation for customizing the Storefront Reference Architecture?

Choose 2 answers

- A. A/B testing for promotions
- **B. One Click checkout process**
- C. ApplePay support
- **D. log in through a standard OAuth2 social media account**

Answer: B,D

Explanation:

For customizing the Storefront Reference Architecture to meet specific requirements, the following items would require detailed technical documentation:

- * Option A (One Click checkout process): Implementing a one-click checkout process involves significant customization to streamline the checkout flow, potentially requiring integration with payment providers and modifications to the user session management.
- * Option C (Log in through a standard OAuth2 social media account): Integrating OAuth2 for social media logins involves handling authentication tokens, user sessions, and potentially syncing user data with the B2C Commerce profiles, all of which require detailed security and integration documentation.

These customizations require careful planning and implementation to ensure they work seamlessly with existing Storefront Reference Architecture components and meet security standards.

NEW QUESTION # 29

A company manages its regional operations as separate businesses. The regional sites (Site A and Site B) operate with:

- * Separate realms
- * Different code bases
- * Different category navigation menus
- * Frequent updates on category structure

The requirement from the business is to provide hreflang link tags on category pages pointing to the same category on the other regional site. Example HTML for one of these links as displayed on Site A is:

Which solution should the Architect choose while keeping performance in mind?

- **A. Create a new custom object type. Populate the hreflang mapping for each category and locale in this custom object. Use the custom object to display the hreflang link tag.**
- B. Create a new custom attribute on the Category. Populate the attribute with the other entire site URLs corresponding to locales in JSON Format. Use the attribute to display the hreflang link tag.
- C. Create a custom Business Manager module. Ask the business to maintain the hreflang link tags for each regional site in this Business Manager module.
- D. Create additional locales in all realms. Create a new custom attribute on the category that is localized. Populate the attribute with the other site URLs and use it to display the hreflang tag.

Answer: A

Explanation:

For a multi-regional setup with different realms and frequent updates, using a custom object to manage hreflang mappings offers flexibility and scalability. Custom objects can efficiently store URL mappings for each category across different locales, making it easier to manage and update as category structures change.

This method allows for centralized control over hreflang mappings and simplifies maintenance compared to other options which might involve more complex integrations or manual updates.

NEW QUESTION # 30

A Retailer has a single storefront site and a Product Management System (PIM). The PIM is generating the master catalog and storefront categorization catalog every day and it uploading them to SFTP. How should the Architect configure the import job flows following the best practices?

- A. 1st flow is global to download the files from SFTP. 2nd flow is global to import the master catalog. 3rd flow is global to import the storefront catalog.
- B. 1st flow is global to download the files from SFTP. 2nd flow is global to import the storefront catalog. 3rd flow is global to import the master catalog.
- C. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to import the storefront catalog. 3rd flow is global to import the master catalog.
- D. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to import the master catalog. 3rd flow is global to import the storefront catalog.

Answer: B

Explanation:

For optimal job flow concerning data import from a PIM system, the sequence should begin with downloading files globally from an SFTP site, followed by importing data into the B2C Commerce platform:

* First flow: Download files, ensuring all required files are available and ready for import.

* Second flow: Import the storefront catalog which likely has dependencies on the master catalog but is generally smaller and can be updated more rapidly.

* Third flow: Import the master catalog, as it typically contains the foundational data needed for various site functionalities.

This sequence respects data dependency and integrity, ensuring that the storefront reflects the most current and accurate information after all relevant data is imported.

NEW QUESTION # 31

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.

Which version of aliases, JSON file below will accomplish this task?

- A.
- B.
- C.
- D.

Answer: C

Explanation:

Option C correctly addresses the requirement for showing the same maintenance page across multiple locales by having each different domain alias ("nto.eu", "nto.at", "nto.de") mapped to the same www domain ("www.

nto.eu"). This setup allows all traffic, regardless of the original locale-specific domain, to be directed to a single, unified maintenance page hosted under the "www.nto.eu" domain. This ensures consistency in the maintenance message presented to all users, irrespective of their regional domain.

NEW QUESTION # 32

.....

The desktop practice test format comes with all features of the web-based practice exam. Actual4test has made all of the different formats so the exam applicants won't face any additional issues and prepare themselves with the real questions and crack Salesforce Arch-303 Certification test for the betterment of their futures. One can set the time and questions numbers of practice exams

(desktop and web-based) according to their needs. Actual4test is giving multiple mock exams to the customers so they can practice and make themselves perfect.
