Come to buy our PEGACPDC25V1 practice test in a cheap price.

Pegasystems Certified Pega Decisioning Consultant 25 Sample Questions (Q71-Q76):

NEW QUESTION # 71
A financial institution's NBA team discovers that they need to modify their risk assessment strategy and edit a scorecard used for loan approvals. The team lead reviews the available options in 1:1 Operations Manager to determine the most appropriate approach to implementing these changes.
Which approach should the team lead use to implement these strategy and scorecard modifications?

- A. Submit an Update existing action request in 1:1 Operations Manager
- B. Create a new revision in 1:1 Operations Manager, followed by a new change request in the Customer Decision Hub portal
- C. Submit an Other request type in the Customer Decision Hub portal
- D. Submit a Create new action request in 1:1 Operations Manager

Answer: C

NEW QUESTION # 72

Which of the following reasons explains why a customer might receive an action that they already accepted?

- A. The volume constraint is not set to exclude previously accepted offers.
- B. The actions are filtered based on eligibility.
- C. The suppression rules are not defined to exclude previously accepted actions.
- D. The action suitability conditions are not defined.

Answer: A

Explanation:
A customer might receive an action that they already accepted if the volume constraint for that action is not configured to exclude previously accepted offers. This option can be enabled by selecting the Exclude previously accepted actions checkbox in the volume constraint configuration. The action suitability conditions are used to determine whether an action is suitable for a customer based on their propensity, priority, or other criteria, not based on their previous responses. The suppression rules are used to exclude customers from receiving an action based on certain conditions, such as opt-out preferences or recent purchases, not based on their previous responses. The actions are filtered based on eligibility before applying the volume constraints, so this option does not explain why a customer might receive an action that they already accepted. Verified References: Certified Pega Decisioning Consultant | Pega Academy, Volume constraints

NEW QUESTION # 73

What is the name of the property that the system computes automatically when you use an Adaptive Model decision component?

- A. Priority
- B. Propensity
- C. Rank
- D. Order

Answer: B

Explanation:
Propensity is the name of the property that the system computes automatically when you use an Adaptive Model decision component. Propensity is a measure of how likely a customer is to accept an action, based on their past behavior and profile. An Adaptive Model component uses machine learning to calculate the propensity for each action and store it in a property with the same name as the action. NEW QUESTION # 74

GlobalRetail operates in a fast-changing digital marketplace where customer preferences and competitor offers change weekly. Their marketing team struggles with lengthy approval processes that prevent quick responses to market trends, often causing them to miss critical engagement opportunities.
What does agility represent in the context of customer engagement projects?

- A. An organization's ability to react quickly to marketplace changes and emerging trends
- B. Eliminating all testing requirements to completely accelerate software deployment cycles
- C. Outsourcing decision-making processes to external vendors for faster implementation speeds
- D. Automating all business processes through artificial Intelligence and machine learning algorithms

Answer: A

NEW QUESTION # 75

As a decisioning architect, you advise the board on the business issues for which they must use the Next-Best- Action strategy.
Which three business issues do you recommend? (Choose Three)

- A. Service

- B. Collections
- C. Accounting
- D. Retention
- E. Resource Planning

Answer: A,B,D

Explanation:
The Next-Best-Action strategy is a customer-centric approach that aims to deliver the most relevant and valuable proposition for each customer at any given moment. You can use the Next-Best-Action strategy to address various business issues that involve customer interactions, such as service, retention, and collections.
Service is the process of providing assistance and support to customers who have questions or problems.
Retention is the process of preventing customers from leaving or switching to competitors. Collections is the process of recovering unpaid debts from customers who are delinquent or defaulting on their obligations.
These are all business issues that can benefit from using the Next-Best-Action strategy. Verified References:
