## **ITIL 4 Strategist: Direct, Plan and Improve (DPI) Sample Questions (Q34-Q39):**

### **NEW QUESTION # 34**

A legacy financial system requires the user to manually enter the time and date of transactions to meet regulatory requirements. A recent internal audit has shown that these fields are often blank.

Which are TWO effective controls that could improve compliance?

- \* Modify the application to automatically add the current date and time when a transaction is entered
- \* Establish a communication plan to remind users of the importance of including the date and time on transactions
- \* Develop a goals cascade so that all staff know their role in achieving company goals
- \* Create a report showing non-compliant records and take appropriate action to correct them

- A. 1 and 2

- B. 1 and 4
- C. 3 and 4
- D. 2 and 3

**Answer: B**

Explanation:

In DPI, controls are mechanisms to ensure compliance and mitigate risks. Modifying the system to auto- capture date/time (1) is a preventive control, while reporting and correcting non-compliant records (4) is a detective control. Together, these are effective and practical. Communication plans (2) and goals cascades (3) improve awareness but do not guarantee compliance. DPI stresses that technical and reporting controls are stronger than relying on human reminders.

(Reference: ITIL 4 Strategist DPI, section on "Controls - preventive and detective mechanisms in governance")

**NEW QUESTION # 35**

Which type of plan would outline the organizational vision for a multi-year infrastructure expansion?

- A. Project
- B. Strategic
- C. Tactical
- D. Operational

**Answer: B**

Explanation:

According to ITIL DPI, planning occurs at strategic, tactical, and operational levels. A strategic plan defines long-term direction, including multi-year infrastructure expansion that aligns with business goals. Tactical plans break this down into departmental objectives, while operational plans manage day-to-day execution.

Project plans are temporary and specific but not long-term vision documents.

(Reference: ITIL 4 Strategist DPI, section on "Planning levels - strategic, tactical, operational")

**NEW QUESTION # 36**

A company has a new, global line of business that has changed how the IT department supports the systems.

Recognizing the need for two-way communication for the required changes, IT managers need better ways of obtaining feedback. Which describes the BEST approach for establishing effective feedback channels?

- A. Publish a printed weekly newsletter that clearly and consistently communicates change
- B. Establish office hours where staff are encouraged to visit without appointments and discuss their concerns
- C. Research how individual teams communicate internally and use the most popular collaboration tools to collect feedback
- D. Initiate a project to select and implement a collaboration tool to facilitate two-way communication with staff

**Answer: C**

Explanation:

DPI emphasizes using existing, familiar, and effective communication channels to encourage staff feedback and engagement. By leveraging collaboration tools that teams already use (Option A), managers minimize resistance and maximize participation. Option B is localized and limited in scale. Option C delays feedback until a project is implemented. Option D is one-way communication, not interactive.

(Reference: ITIL 4 Strategist DPI, section on "OCM - communication and feedback channels")

**NEW QUESTION # 37**

An IT department is functioning as a service provider for the company it is a part of.

Which statement about this provider's governance is CORRECT?

- A. An internal service provider's governance is limited to external factors such as regulations and legislation
- B. An internal service provider is not subject to governance because they are part of the same company
- C. An internal service provider must use the service value system instead of governance
- D. An internal service provider cannot govern itself unless it has specifically delegated the authority by the company's governing body

**Answer: D**

Explanation:

DPI clarifies that governance always comes from the organization's governing body. Internal service providers do not operate independently; they must follow the governance structures of the parent organization. They may only self-govern if explicitly delegated authority. Option A is incorrect (governance covers internal and external). Option B is false—governance always applies. Option D is misleading; the SVS supports governance, not replaces it.

(Reference: ITIL 4 Strategist DPI, section on "Governance in internal and external service provider contexts")

**NEW QUESTION # 38**

A service provider has experienced a number of problems with their cloud storage service that have caused service outages. Problem management has successfully identified the cause of each incident, but further improvements to the service are considered necessary.

Which is the BEST example of using the 'continual improvement model' to guide improvements to the service?

- A. Use the model to identify and prioritize improvements to the cloud storage service
- B. Use the model to identify and compare improvements to the 'problem management' practice
- C. Use the model to assess and authorize changes to improve the cloud storage service
- D. Use the model to restore and recover the cloud storage service each time the service fails

**Answer: A**

Explanation:

The continual improvement model is applied to evaluate, prioritize, and implement improvements across services, practices, and processes. Here, the focus is the cloud storage service, not just the practice of problem management. Option B reflects the model's purpose—identify improvement opportunities, assess priorities, and act to prevent recurrence of failures. Options A, C, and D misapply the model to either specific practices or operational recovery, not holistic improvement.

(Reference: ITIL 4 Strategist DPI, section on "Applying the continual improvement model to services and practices")

**NEW QUESTION # 39**

.....

Firstly, we can give you 100% pass rate guarantee on the ITIL4-DPI exam. Our ITIL4-DPI practice quiz is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. Secondly, during the period of using ITIL4-DPI learning guide, we also provide you with 24 hours of free online services, which help to solve any problem for you on the ITIL4-DPI exam questions at any time and sometimes mean a lot to our customers.

**ITIL4-DPI Exam Materials:** <https://www.prep4king.com/ITIL4-DPI-exam-prep-material.html>
