PECB Certified ISO/IEC 27001 Lead Auditor exam Sample Questions (Q38-Q43):

NEW QUESTION # 38

Please match the roles to the following descriptions:

1. The organisation or person requesting an audit	<input type="text"/>
2. The organisation as a whole or parts thereof being audited	<input type="text"/>
3. A person who provides specific knowledge or expertise relating to the organisation, activity, process, product, service or discipline to be audited	<input type="text"/>
4. A person who accompanies the audit team but does not act as an auditor	<input type="text"/>

Audit team leader	Audit client	Observer	Auditee	Technical expert	Auditor
-------------------	--------------	----------	---------	------------------	---------

To complete the table click on the blank section you want to complete so that it is highlighted in red, and then click on the applicable test from the options below. Alternatively, you may drag and drop each option to the appropriate blank section.

Answer:

Explanation:

1. The organisation or person requesting an audit	<input type="text" value="Audit client"/>
2. The organisation as a whole or parts thereof being audited	<input type="text" value="Auditee"/>
3. A person who provides specific knowledge or expertise relating to the organisation, activity, process, product, service or discipline to be audited	<input type="text" value="Technical expert"/>
4. A person who accompanies the audit team but does not act as an auditor	<input type="text" value="Observer"/>

Audit team leader	Audit client	Observer	Auditee	Technical expert	Auditor
-------------------	--------------	----------	---------	------------------	---------

Explanation

1. The organisation or person requesting an audit	<input type="text" value="Audit client"/>
2. The organisation as a whole or parts thereof being audited	<input type="text" value="Auditee"/>
3. A person who provides specific knowledge or expertise relating to the organisation, activity, process, product, service or discipline to be audited	<input type="text" value="Technical expert"/>
4. A person who accompanies the audit team but does not act as an auditor	<input type="text" value="Observer"/>

* The auditee is the organization or part of it that is subject to the audit. The auditee could be internal or external to the audit client . The auditee should cooperate with the audit team and provide them with access to relevant information, documents, records, personnel, and facilities .

* The audit client is the organization or person that requests an audit. The audit client could be internal or external to the auditee . The audit client should define the audit objectives, scope, criteria, and programme, and appoint the audit team leader .

* The technical expert is a person who provides specific knowledge or expertise relating to the organization, activity, process, product, service, or discipline to be audited. The technical expert could be internal or external to the audit team . The technical expert should support the audit team in collecting and evaluating audit evidence, but should not act as an auditor .

* The observer is a person who accompanies the audit team but does not act as an auditor. The observer could be internal or external to the audit team . The observer should observe the audit activities without interfering or influencing them, unless agreed otherwise by the audit team leader and the auditee .

NEW QUESTION # 39

In which order is an Information Security Management System set up?

- A. Implementation, operation, maintenance, establishment
- B. Implementation, operation, improvement, maintenance
- C. Establishment, implementation, operation, maintenance
- D. Establishment, operation, monitoring, improvement

Answer: C

Explanation:

Explanation

The establishment phase of an ISMS involves defining the scope, context, objectives, and leadership commitment for information security management within an organization. It also involves identifying and assessing the risks and opportunities related to information security and selecting the appropriate controls to treat them. The implementation phase of an ISMS involves executing the plans and actions to achieve the information security objectives and implement the selected controls. It also involves ensuring the availability of resources and competencies for information security management. The operation phase of an ISMS involves monitoring and measuring the performance and effectiveness of the ISMS and reporting on the results. It also involves addressing nonconformities and taking corrective actions to prevent recurrence. The maintenance phase of an ISMS involves reviewing and evaluating the ISMS at planned intervals and identifying opportunities for improvement. It also involves updating the ISMS as necessary to reflect changes in the internal and external context of the organization. Therefore, an ISMS is set up in the following order:

establishment, implementation, operation, maintenance. References: ISO/IEC 27001:2022, clauses 6-10; ISO/IEC 27000:2022, clause 4.

NEW QUESTION # 40

_____ is a software used or created by hackers to disrupt computer operation, gather sensitive information, or gain access to private computer systems.

- A. Trojan
- B. Operating System
- C. Malware
- D. Virus

Answer: C

Explanation:

Malware is a software used or created by hackers to disrupt computer operation, gather sensitive information, or gain access to private computer systems. Malware is a general term that covers various types of malicious software, such as viruses, worms, trojans, ransomware, spyware, adware, etc. Malware can cause serious damage to the organization's information assets and reputation, and may lead to legal or regulatory consequences. Therefore, the organization should implement appropriate controls to prevent, detect and remove malware, as specified in ISO/IEC 27001:2022 clause 12.2.1. Reference: [CQI & IRCA Certified ISO/IEC 27001:2022 Lead Auditor Training Course], ISO/IEC 27001:2022 Information technology - Security techniques - Information security management systems - Requirements, What is malware?

NEW QUESTION # 41

Which two of the following options do not participate in a first-party audit?

- A. An audit team from an accreditation body
- B. An auditor from a consultancy organisation
- C. An auditor trained in the CQI and IRCA scheme
- D. An auditor certified by CQI and IRCA
- E. An auditor trained in the organization

- **F. A certification body auditor**

Answer: A,F

Explanation:

Explanation

A first-party audit is an internal audit in which the organization's own staff or contractors check the conformity and effectiveness of the ISMS. A certification body auditor and an audit team from an accreditation body are external auditors who conduct audits for the purpose of certification or accreditation.

They do not participate in a first-party audit, but rather in a third-party audit. References: First & Second Party Audits - operational services, The ISO 27001 Audit Process | Blog | OneTrust, The ISO 27001 Audit Process | A Beginner's Guide - IAS USA

NEW QUESTION # 42

During a third-party certification audit, you are presented with a list of issues by an auditee. Which four of the following constitute 'internal' issues in the context of a management system to ISO 27001:2022?

- **A. Increased absenteeism as a result of poor management**
- **B. A fall in productivity linked to outdated production equipment**
- C. A reduction in grants as a result of a change in government policy
- D. Inability to source raw materials due to government sanctions
- E. A rise in interest rates in response to high inflation
- **F. Poor morale as a result of staff holidays being reduced**
- G. Higher labour costs as a result of an aging population
- **H. Poor levels of staff competence as a result of cuts in training expenditure**

Answer: A,B,F,H

Explanation:

According to ISO 27001:2022 clause 4.1, the organisation shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system (ISMS)¹² External issues are factors outside the organisation that it cannot control, but can influence or adapt to. They include political, economic, social, technological, legal, and environmental factors that may affect the organisation's information security objectives, risks, and opportunities¹² Internal issues are factors within the organisation that it can control or change. They include the organisation's structure, culture, values, policies, objectives, strategies, capabilities, resources, processes, activities, relationships, and performance that may affect the organisation's information security management system¹² Therefore, the following issues are considered 'internal' in the context of a management system to ISO

27001:2022:

* Poor levels of staff competence as a result of cuts in training expenditure: This is an internal issue because it relates to the organisation's capability, resource, and process of developing and maintaining the competence of its personnel involved in the ISMS. The organisation can control or change its training expenditure and its impact on staff competence¹²

* Poor morale as a result of staff holidays being reduced: This is an internal issue because it relates to the organisation's culture, value, and relationship with its employees. The organisation can control or

* change its staff holiday policy and its impact on staff morale¹²

* Increased absenteeism as a result of poor management: This is an internal issue because it relates to the organisation's performance, structure, and accountability of its management. The organisation can control or change its management practices and its impact on staff absenteeism¹²

* A fall in productivity linked to outdated production equipment: This is an internal issue because it relates to the organisation's capability, resource, and process of ensuring the availability and suitability of its production equipment. The organisation can control or change its equipment maintenance and upgrade and its impact on productivity¹² The following issues are considered 'external' in the context of a management system to ISO 27001:2022:

* Higher labour costs as a result of an aging population: This is an external issue because it relates to the social and demographic factor that affects the availability and cost of labour in the market. The organisation cannot control or change the aging population, but can influence or adapt to its impact on labour costs¹²

* A rise in interest rates in response to high inflation: This is an external issue because it relates to the economic and monetary factor that affects the cost and availability of capital in the market. The organisation cannot control or change the interest rates or inflation, but can influence or adapt to its impact on capital costs¹²

* A reduction in grants as a result of a change in government policy: This is an external issue because it relates to the political and legal factor that affects the availability and conditions of public funding for the organisation. The organisation cannot control or change the government policy, but can influence or adapt to its impact on grants¹²

* Inability to source raw materials due to government sanctions: This is an external issue because it relates to the political and legal

factor that affects the availability and cost of raw materials in the market. The organisation cannot control or change the government sanctions, but can influence or adapt to its impact on raw materials¹² References:
