Earning the Salesforce Sharing-and-Visibility-Architect Certification is a significant achievement that can help you advance your career in the Salesforce ecosystem. It demonstrates your expertise in designing and implementing complex sharing and visibility solutions in Salesforce, and sets you apart from other Salesforce professionals.

Salesforce Sharing-and-Visibility-Architect (Salesforce Certified Sharing and Visibility Architect) Exam is an advanced certification exam offered by Salesforce that focuses on designing and implementing complex sharing and visibility solutions. Sharing-and-Visibility-Architect Exam is intended for experienced Salesforce architects who have a deep understanding of sharing and visibility concepts and are capable of designing and implementing custom solutions that meet the unique needs of their organization. To pass Sharing-and-Visibility-Architect exam, candidates must demonstrate their ability to design, implement, and troubleshoot complex sharing and visibility solutions, as well as their understanding of best practices and industry standards.

## Salesforce Certified Sharing and Visibility Architect Sample Questions (Q18-Q23):

## NEW QUESTION # 18

Universal Containers has recently implemented an integration that is populating 50 custom fields on the account object. They would like these fields to be available to Managers for reporting but do not want them to clutter the page layouts. What should the Architect recommend as a solution?

- A. Add the fields to the Managers' Account Page Layout; mark the page layout section as Collapsed.
- B. Grant the Managers access to the fields using a Role-Based Sharing Rule; leave them hidden on the page layout.
- C. Add the fields to a Custom Report; grant the Managers' Role access to the report folder.
- D. Grant Managers access to the fields using Field-Level Security; do not add them to a page layout.

**Answer: D**

Explanation:
Explanation
The best solution for this scenario is to grant managers access to the fields using field-level security, and do not add them to a page layout. This way, the managers can see the fields in reports, but not on the account record detail page. The other options are either not feasible or not effective.

## NEW QUESTION # 19

Universal Containers (UC) is a non-profit organization and has over 20,000,000 members (donors). The company decided to assign those accounts to Donations Reps based on them regions. Donations Reps ended up owning over 50,000 donors each. The donation reps started to see significant degradation of the system performance. What could be the reason for this problem?

- A. The Account (donor) object OWD is Private.
- B. There is an Account ownership data skew problem.
- C. Salesforce sharing recalculation kicked off.
- D. The Donations Reps access to the assigned accounts.

**Answer: B**

## NEW QUESTION # 20

Universal Containers (UC) implemented Sales Cloud and requested that sales agents have access to products the company sells and be able to create opportunities for its customers.
What should the Organization-Wide Defaults (OWD) be for pricebook?

- A. View
- B. Public Read Only
- C. Use
- D. Pubic Read Write

**Answer: C**

Explanation:
Explanation
The OWD for pricebook should be set to Use, which means that users can only view and use price books that are shared with them. This way, sales agents can have access to products and create opportunities for their customers. Option A is incorrect, since Public Read Only would give access to all price books to all users.
Option B is incorrect, since Public Read Write would give access and edit rights to all price books to all users.
Option C is incorrect, since View is not a valid OWD setting for pricebook.

## NEW QUESTION # 21

Universal Containers has selected a small and diverse group of users to review inactive accounts. Given the Private sharing model, a public group was created and made available to this group of users. A sharing rule was created to make inactive accounts visible to the public group. However, some of these users are reporting they do not see any of the accounts that were shared with the public group.
What is the underlying issue for these users?

- A. The page layout assigned to these users is different than the Account owner.

- B. The accounts arc owned by users higher in the Role Hierarchy.
- C. The users are in profiles that have no access to the Account object.

**Answer: C**

**NEW QUESTION # 22**
Universal containers (UC) has a partner community for its 200 distributors. UC customer accounts are ..
organization-wide default setting for the custom Delivery object is private.
How can an architect advise UC to grant all users at a distributor access to delivery records for all customer distributor?

- A. Give ownership of the delivery record to a distributor user.
- B. Create a criteria-based sharing rule that shares delivery records matching the Distributor to user distributor.
- C. Create a Sharing set for the Distributor profile to grant access to the Delivery object.
- D. Create a criterion- based sharing rule that shares delivery records matching the Distributor to users of a Public Group created for the distributor.

**Answer: C**

Explanation:
Explanation
Creating a Sharing set for the Distributor profile to grant access to the Delivery object is the correct way to share records with users in a partner community. Sharing sets allow you to share records based on a common account or contact2. Criteria-based sharing rules are not available for partner communities3.
