

# Certification Esri EAEP2201 Exam Dumps, EAEP2201 Latest Braindumps Files

DOWNLOAD the newest ValidVCE EAEP2201 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=10QP7SZKTMZEMTavoaWhHUGanthTwU6C4>

We sincerely suggest you to try these demos of our EAEP2201 study guide and make a well-content choice. Different demos have different functions and each version has its advantages during the process of learning. Our EAEP2201 Preparation exam is suitable for various consumer groups in the world we assure that after having a knowledge of those demos, you can purchase the most suitable EAEP2201 exam materials.

Our EAEP2201 test braindumps can help you improve your abilities. Once you choose our learning materials, your dream that you have always been eager to get EAEP2201 certification which can prove your abilities will realized. You will have more competitive advantages than others to find a job that is decent. We are convinced that our EAEP2201 Exam Questions can help you gain the desired social status and thus embrace success. When you start learning, you will find a lot of small buttons, which are designed carefully. You can choose different ways of operation according to your learning habits to help you learn effectively.

## EAEP2201 Latest Braindumps Files | Latest EAEP2201 Test Vce

Through years of efforts and constant improvement, our EAEP2201 exam materials stand out from numerous study materials and become the top brand in the domestic and international market. Our company controls all the links of EAEP2201 training materials which include the research, innovation, survey, production, sales and after-sale service strictly and strives to make every link reach the acme of perfection. Our company pays close attentions to the latest tendency among the industry and the clients' feedback about our EAEP2201 Certification guide.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q13-Q18):

### NEW QUESTION # 13

A GIS administrator has a group of users who share maintenance responsibilities for a critical application. The administrator needs to allow all users to edit the application without transferring ownership.

Which option should the administrator use?

- A. A public group
- B. A collaboration group
- **C. A shared update group**
- D. An administrative group

**Answer: C**

Explanation:

A shared update group allows group members to edit each other's items without needing to transfer ownership. This is ideal for collaborative editing and shared responsibility for applications, maps, or dashboards.

From Esri documentation:

"Shared update groups allow multiple members to update items shared with the group, even if they do not own the items."

\* Option B doesn't exist as a group type in ArcGIS Enterprise.

\* Option C allows viewing, but not editing others' content.

\* Option D applies to distributed collaboration, not shared editing.

Reference: ArcGIS Enterprise - Group Settings for Collaborative Management

#### NEW QUESTION # 14

A single Linux machine deployment of ArcGIS Enterprise has a home partition of 20 GB, a /data partition of 150 GB, and an /opt partition of 75 GB.

Where should the configuration store and directories be located?

- **A. /data**
- B. /home
- C. /opt

**Answer: A**

Explanation:

The configuration store and server directories for ArcGIS Enterprise should be placed in a partition with ample disk space and stable read/write performance, as these directories store logs, cache, uploads, and critical site configuration information.

In this scenario:

\* The /home partition (20 GB) is insufficient for growth and operational overhead.

\* The /opt partition (75 GB) is moderately sized but still smaller than the /data partition.

\* The /data partition (150 GB) provides the most space, making it the best choice to ensure scalability and system reliability.

Best practice from ArcGIS Enterprise documentation recommends placing server directories and configuration stores on high-capacity partitions like /data when available.

Reference Source: ArcGIS Enterprise Installation Guide - File system and storage planning on Linux

#### NEW QUESTION # 15

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- **A. Open ArcGIS Server statistics to create a report for commonly used items.**
- B. Use ArcGIS Monitor to capture desired information over a period of time in a report.
- C. Run usage reports in Portal for ArcGIS to determine the effect on the organization.

**Answer: A**

#### NEW QUESTION # 16

A GIS administrator uses a data connection file (SDE file) for a Microsoft SQL Server database to add a user-maintained data store item to Portal for ArcGIS.

Now, the administrator must ensure that five users can access the data store item to publish to federated servers. The administrator shares the SDE file with coworkers.

Which additional step must be taken?

- A. Set the data store to public access
- B. Give the coworkers a custom administrator role
- C. Upload the SDE file in Server Manager
- **D. Share the portal item to a group of the coworkers**

**Answer: D**

Explanation:

In ArcGIS Enterprise, data store items added via the Portal (such as those using .sde files for SQL Server) are represented as portal items. To allow other users to publish using that data store, the administrator must share the item with them, typically via a group.

From the official documentation:

"To allow other users to publish with a user-maintained data store, share the item with a group to which they belong. Users must have access to the data store item in the portal to publish services using it."

- \* Option A is not required—users don't need admin rights to publish.
- \* Option C refers to registering data in Server Manager, not managing access.
- \* Option D is not a valid setting for data store items.

Reference: ArcGIS Enterprise - Sharing Data Store Items for Publishing

### NEW QUESTION # 17

A client has an internet-accessible ArcGIS Enterprise deployment with the Web Adaptors in the DMZ, and the remaining components are on an internal network behind a firewall. A user on the internet must access a web map in that environment. Which ports must be open in the firewall between the DMZ and the internal network?

- A. 2443 and 6443
- B. 443 and 6443
- **C. 6443 and 7443**
- D. 80 and 443

**Answer: C**

Explanation:

Web Adaptors in the DMZ must forward requests to internal components (Portal and Server). These internal services operate over HTTPS via ports:

- \* 7443 for Portal for ArcGIS
- \* 6443 for ArcGIS Server

Therefore, the firewall must allow traffic over ports 6443 and 7443 from the Web Adaptors (DMZ) to the respective internal services.

From ArcGIS Enterprise security documentation:

"When using Web Adaptors in the DMZ, make sure ports 6443 and 7443 are open between the Web Adaptors and the internal ArcGIS Server and Portal components respectively."

- \* Option B is partially correct but leaves out Portal (7443).
- \* Option C is for HTTP/HTTPS access from the public, not internal communications.
- \* Option D includes the Data Store admin port (2443), which isn't required here.
