- A. To schedule downtime for system maintenance
- B. To plan marketing campaigns around new releases
- C. To synchronize data between test and production instances
- **D. To align with semi-annual innovation cycles**

- A. Development of the user adoption strategy
- B. Measurement of actual user adoption metrics
- C. Mapping of SAP roles to employees
- D. Conduction of a pulse check

Answer: B

Explanation:

The Run phase of the SAP Activate methodology focuses on operating, monitoring, and optimizing the SAP S/4HANA Cloud Public Edition system post-go-live. Certain change management activities are unique to this phase due to their reliance on live system usage.

* Option A: Mapping of SAP roles to employees Incorrect. Role mapping occurs in the Explore or Realize phases, when business roles are aligned with employee responsibilities. The SAP S/4HANA Cloud Security Guide states, "Role mapping is completed pre-go-live to ensure users have appropriate access upon system activation."

* Option B: Development of the user adoption strategy Incorrect. The user adoption strategy is developed in the Prepare or Explore phases to guide change management efforts. The SAP S/4HANA Cloud OCM Guide notes, "The user adoption strategy is defined early in the project to drive effective change management throughout the implementation."

* Option C: Measurement of actual user adoption metrics Correct. Measuring actual user adoption metrics, such as system usage or process adherence, can only occur in the Run phase when the system is live and users are actively engaging with it. The SAP Activate Methodology Guide explains, "In the Run phase, change management includes measuring actual user adoption metrics to assess the effectiveness of adoption efforts and identify areas for improvement."

* Option D: Conduction of a pulse check Incorrect. Pulse checks, which gauge stakeholder sentiment, can be conducted in multiple phases, including Prepare and Explore, to monitor change readiness. The SAP OCM Guide clarifies, "Pulse checks are performed throughout the project lifecycle to assess stakeholder engagement, not exclusively in the Run phase." Extract from Official Documentation:

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "The Run phase includes unique change management activities such as measuring actual user adoption metrics, which rely on live system data to evaluate the success of adoption initiatives."
