OGA-031 Learning Mode | OGA-031 Test Quiz

We provide 24-hours online customer service which replies the client's questions and doubts about our OGA-031 training quiz and solve their problems. Our professional personnel provide long-distance assistance online. If the clients can't pass the OGA-031 Exam we will refund them immediately in full at one time. So there is nothing to worry about our OGA-031 exam questions. And it is totally safe to buy our OGA-031 learning guide.

The Open Group, which administers the exam, provides a range of resources to help candidates prepare for the ArchiMate 3 Part 1 Exam. These resources include study guides, practice exams, and training courses. Candidates can also join online forums and communities to connect with other individuals who have taken the exam and share study tips and resources.

The Open Group, a renowned industry consortium, offers this certification program to professionals who want to validate their skills and knowledge of the ArchiMate modeling language. ArchiMate 3 Part 1 Exam certification exam is based on the ArchiMate 3.1 modeling language, which is a widely adopted standard for enterprise architecture modeling. OGA-031 Exam evaluates one's ability to use this modeling language to design and communicate enterprise architecture concepts.

The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q70-Q75):

NEW QUESTION # 70

What relationship is allowed from a technology function to an application function?

- A. Aggregation
- B. Realization
- C. Influence
- **D. Assignment**

Answer: D

Explanation:

According to the ArchiMate 3.2 Specification¹, an application function describes the internal behavior of an application component, and an application component may be assigned to an application function, which means that the application component performs the application function. Therefore, the correct answer is A. Assignment. This relationship indicates that an instance of a technology function performs (part of) the behavior of an instance of an application function¹.

NEW QUESTION # 71

Consider the following symbol, which represents information about a transformation project at ArchiSurance involving systems and business processes:

Which of the following statements correctly expresses the meaning of the symbol?

- A. The transformed systems will store information of interest to the Board of Directors
- B. The Board of Directors will use the transformed systems
- **C. The Board of Directors has concerns about the project**
- D. The Board of Directors has a business role in the project

Answer: C

NEW QUESTION # 72

What are external active structure elements also called?

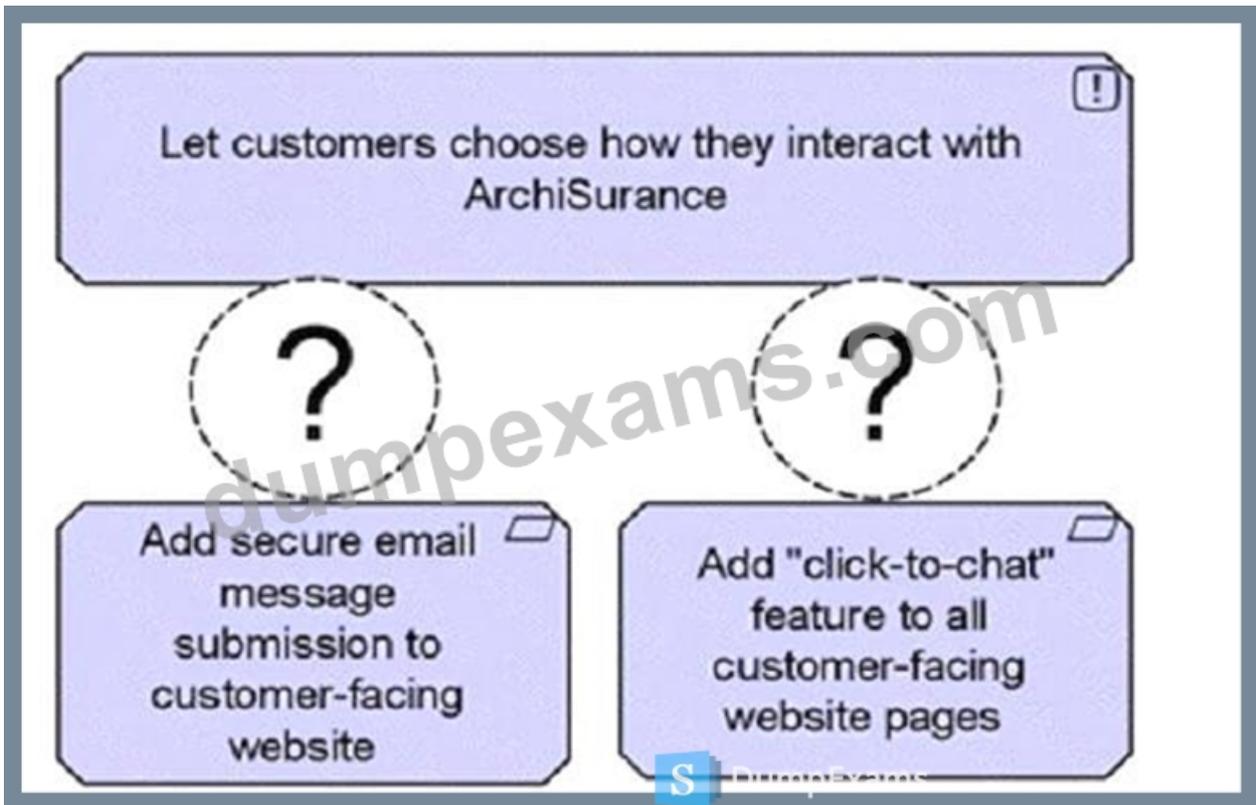

- A. Capabilities
- B. Services
- **C. Interfaces**
- D. Resources

Answer: C

Explanation:

According to the ArchiMate 3.2 Specification¹, external active structure elements are also called interfaces. An interface represents a point of access where one or more services are offered by an active structure element to its environment¹. Therefore, the correct answer is B. Interfaces.

NEW QUESTION # 73

Which of the following is the correct relationship between the bottom elements and the top element?

- A. Specialization
- B. Realization
- C. Access
- D. Aggregation

Answer: D

Explanation:

Based on the ArchiMate 3 documents or objectives, an aggregation relationship indicates that an element groups a number of other concepts. The aggregation relationship has been inspired by the aggregation relationship in UML class diagrams. Unlike composition, aggregation does not imply an existence dependency between the aggregating and aggregated concepts. The notation for an aggregation relationship is a solid line with an empty diamond at the end that points to the whole element. The diagram uses an aggregation relationship from the bottom elements to the top element to indicate that the top element groups the bottom elements. NEW QUESTION # 74

Consider the following diagram showing a system used for settling injury claims:
