SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q18-Q23):

NEW QUESTION # 18

What is used to transfer stock transport orders from SAP ERP to SAP TM?

- A. Core interface
- B. Output Determination
- C. Post processing framework
- D. Workflow

Answer: D

NEW QUESTION # 19

Which of the following are master data elements in SAP TM? Note: There are 2 correct answers to this question.

- A. Carrier profile
- B. Calculation sheet
- C. Calculation profile
- D. Means of transport

Answer: A,D

NEW QUESTION # 20

Which attributes can you define in a purchase order to split the resulting freight unit into two stages?

Note; There are 2 correct answers to this question

- A. Handover location

- B. Transshipment location
- C. Stage profile
- D. Incoterm location

Answer: B,C

NEW QUESTION # 21

To which of the following can you assign instruction sets? Note: There are 2 correct answers to this question.

- A. Forwarding order type
- B. Freight order type
- C. Stage type
- D. Movement type

Answer: A,C

NEW QUESTION # 22

Your customer wants to use the cost distribution function to include transportation costs in the material valuation. Which of the following documents can support this requirement? Note: There are 3 correct answers to this question.

- A. Outbound delivery
- B. Inbound delivery
- C. Stock transport order
- D. Sales order
- E. Purchase order

Answer: B,C,E

Explanation:

In SAP S/4HANA Transportation Management, the cost distribution function allows transportation costs to be included in the material valuation, typically through integration with Materials Management (MM).

According to the SAP documentation, the following documents support this requirement:

* Purchase order (B): Purchase orders can include transportation costs as part of the procurement process, enabling these costs to be distributed to the material valuation in MM.

* Stock transport order (C): Stock transport orders, used for inter-plant or inter-company stock transfers, support the inclusion of transportation costs in the material valuation, as these costs are relevant to the transfer process.

* Inbound delivery (E): Inbound deliveries, which represent the receipt of goods, can incorporate transportation costs from freight settlement documents, allowing these costs to be distributed to the material valuation.

The other options are incorrect:

* Sales order (A) is used in sales and distribution to trigger transportation requirements but does not directly support cost distribution for material valuation.

* Outbound delivery (D) is relevant for shipping goods but is not typically used to distribute transportation costs to material valuation, as this is more applicable to inbound processes.
