

I27001F Vorbereitung - I27001F Fragen Beantworten

Wenn Sie unsere Softwaren benutzen, können Sie wissen, dass die CertiProf I27001F zu bestehen nicht so schwer ist. Sie können in die Unterlagen, die unsere ITZert bietet, die Geschicklichkeit des Bestehens der CertiProf I27001F Prüfung finden. Um Sie beruhigt kaufen zu lassen, bieten wir Ihnen kostenlose demo der CertiProf I27001F für dich. Sie können nach des Downloads mal probieren.

CertiProf I27001F Exam Overview:

Certification Vendor:	CertiProf
Exam Name:	Certified ISO/IEC 27001:2022 Foundation
Exam Number:	I27001F
Exam Format:	Multiple Choice
Related Certifications:	ISO27001F
Exam Duration:	60 minutes
Certificate Validity Period:	Exam Voucher Validity: 6 Months
Real Exam Qty:	40
Available Languages:	English, Spanish, Portuguese
Exam Price:	USD 200
Passing Score:	80% (32/40)
Sample Questions:	CertiProf I27001F Sample Questions
Exam Way:	Online (Proctored)
Pre Condition:	None. Designed for IT professionals, compliance officers, risk analysts, business managers, and security-aware practitioners.
Official Syllabus URL:	https://certiprof.com/products/certified-iso-iec-27001-foundation-i27001f

I27001F Prüfungsressourcen: Certified ISO/IEC 27001:2022 Foundation & I27001F Reale Fragen

Wenn Ihr Budget beschränkt ist und Sie brauchen vollständiges Schulungsunterlagen, versuchen Sie mal unsere Schulungsunterlagen zur CertiProf I27001F Zertifizierungsprüfung von ITZert. Sie können Ihren Erfolg in der Prüfung garantieren. ITZert ist eine populäre Website für Schulungsmaterialien zur Zeit im Internet. I27001F Prüfung wird ein Meilenstein in Ihrem Berufsleben sein. Sie ist wichtiger als je zuvor in der konkurrenzfähigen Gesellschaft. Wir versprechen, dass Sie nur einmal CertiProf I27001F Prüfung ganz leicht bestehen können. Und Ihre späte Arbeit und Alltagsleben werden sicher interessanter sein. Außerdem können Sie auch neue Gelegenheiten und Wege finden. Es ist wirklich preiswert. Der Wert, den ITZert Ihnen verschafft, ist sicher viel mehr als den Preis.

CertiProf I27001F Prüfungsplan:

Thema	Einzelheiten
Thema 1	• How to Develop an ISMS: This section focuses on the process of establishing and implementing an Information Security Management System (ISMS). It includes planning, risk assessment, and applying appropriate controls to protect information assets.
Thema 2	• ISO 27001:2022 Annex A: This domain outlines the set of security controls listed in Annex A of the standard. It explains how these controls are selected and applied to mitigate identified risks within an ISMS.
Thema 3	• Principles, concepts and the requirements of ISO • IEC 27001:2022: This domain covers the core principles, key concepts, and mandatory requirements of the ISO • IEC 27001:2022 standard. It explains how information security is structured, managed, and aligned with organizational objectives.

CertiProf Certified ISO/IEC 27001:2022 Foundation I27001F Prüfungsfragen mit Lösungen (Q19-Q24):

19. Frage

What are the three main aspects of information security?

- A. Confidentiality, recoverability, integrity
- B. Durability, auditability, confidentiality
- C. Non-repudiation, authenticity, accountability
- **D. Confidentiality, integrity, availability**

Antwort: D

Begründung:

The three fundamental properties of information security are confidentiality, integrity, and availability, often referred to as the CIA triad. Confidentiality means information is accessible only to authorized persons or entities. Integrity means safeguarding the accuracy and completeness of information. Availability means information and associated assets are accessible and usable when required. These principles are foundational within ISO/IEC 27001 and ISO/IEC 27002. Therefore, option B is correct.

20. Frage

According to ISO/IEC 27001:2022 clause 4.3, what aspects must be considered when determining the scope of the Information Security Management System?

- A. Assets and resources
- B. Threats and vulnerabilities
- C. Risks and opportunities
- **D. External and internal issues, and interfaces and dependencies**

Antwort: D

Begründung:

Clause 4.3 of ISO/IEC 27001:2022 requires the organization to determine the boundaries and applicability of the ISMS. When determining the scope, the organization must consider the external and internal issues referred to in clause 4.1, the requirements referred to in clause 4.2, and interfaces and dependencies between activities performed by the organization and those performed by other organizations. Therefore, option D is the correct answer.

21. Frage

Annex A of ISO/IEC 27001:2022 consists of:

- A. A comprehensive list of controls grouped by themes
- B. None of the above
- C. Elements necessary for a good design and implementation of the ISMS
- D. Guidelines for risk management

Antwort: A

Begründung:

Annex A of ISO/IEC 27001:2022 contains the reference set of information security controls used to support risk treatment decisions. In the 2022 edition, these controls are organized into four themes: organizational, people, physical, and technological controls. Annex A is not a set of ISMS implementation steps and it is not a risk management guideline. Its role is to provide a structured set of control objectives and controls that may be selected as part of risk treatment. Therefore, option A is the correct answer.

22. Frage

Which of the following aspects is considered a critical success factor in the implementation of an Information Security Management System?

- A. Completely avoiding all information security incidents
- B. Increasing the confidence of interested parties in the organization
- C. Promoting good information security practices
- D. Satisfying social needs and expectations

Antwort: B

Begründung:

A well-implemented ISMS helps build trust and confidence among interested parties by demonstrating that information security risks are being managed systematically and effectively. Completely preventing all incidents is unrealistic and not required by ISO/IEC 27001:2022. Promoting good practices is important, but the broader organizational outcome recognized as a major success factor is increased confidence by customers, partners, regulators, and other interested parties. Therefore, option B is the best answer.

23. Frage

During the operation of the ISMS, what is a requirement for information security objectives?

- A. Ensure that the objectives are consistent with the information security policy
- B. Establish objectives for relevant functions and levels
- C. Maintain documented information about the objectives
- D. Develop improvement plans using ISO/IEC 27002 to achieve the information security objectives

Antwort: A

Begründung:

ISO/IEC 27001:2022 requires information security objectives to be established at relevant functions and levels, to be consistent with the information security policy, to be measurable if practicable, and to be monitored, communicated, and updated as appropriate. It also requires documented information on the objectives. Among the answer choices, option A is the best single answer because it

expresses one of the core mandatory characteristics of the objectives. Even though options B and D are also requirements, the question asks for one answer only, and option C is the most fundamental wording in the set.

24. Frage
