Adapt to the network society, otherwise, we will take the risk of being obsoleted. Our PEGACPSSA23V1 qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the PEGACPSSA23V1 Study Tool. You can trust us and let us be your honest cooperator in your future development. Here are several advantages about our PEGACPSSA23V1 exam for your reference.

## Pegasystems PEGACPSSA23V1 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Mobile: This topic differentiates between mobile delivery options and designs applications for mobile use, including certificate sets. |
| Topic 2 | • Reporting: Reporting involves designing reports with multiple data sources, including associations and joins. |

| Topic 3 | • Case Management: The section on case management involves work groups, queues, and organizational structures. It covers parallel case processing, locking strategies, and pre<br>• post-processing for efficient case flow. Service-level agreement configurations are also extended and managed. |
| --- | --- |
| Topic 4 | • Data and Integration: Data validation, keyed data pages, and data exchange are key sub-topics. This topic also includes the management of integration settings and addressing connector errors for seamless data transfer. Exposing applications through web services is also covered. |
| Topic 5 | • User Experience: Creating and authenticating Pega Web Mashups is the focus of this brief topic. |
| Topic 6 | • Security: Access control methods, case attachment management, and data encryption are explored. This topic ensures data security and access management. |

## HOT Detail PEGACPSSA23V1 Explanation - High-quality Pegasystems Certified Pega Senior System Architect 23 - Reliable PEGACPSSA23V1 Study Materials

Mercenary men lust for wealth, our company offer high quality PEGACPSSA23V1 practice engine rather than focusing on mercenary motives. They are high quality and high effective PEGACPSSA23V1 training materials and our efficiency is expressed clearly in many aspects for your reference. The first one is downloading efficiency. The second is expressed in content, which are the proficiency and efficiency of PEGACPSSA23V1 Study Guide. You will love our PEGACPSSA23V1 exam questions as long as you have a try!

## Pegasystems Certified Pega Senior System Architect 23 Sample Questions (Q59-Q64):

**NEW QUESTION # 59**
A hospital uses a case type to manage the treatment of patients visiting the Emergency Room (ER). Cases are created when the patient checks in at the registration desk, and are resolved when the patient is released from the hospital. Stakeholders identify the following security requirements for the case type.
* Patients access cases on a read-only basis.
* Patients can only access their own cases.
* Doctors and nurses can modify cases throughout the case life cycle.
* Only doctors are allowed to write prescriptions.
Which configuration allows doctors and nurses to modify cases while complying with all identified security requirements?

- A. Create a single access role for both doctors and nurses, and set the modify action to 1.
- B. Create a single access role for both doctors and nurses, and set the modify action to 5.
- C. Create two access roles, one for doctors and one for nurses, and set the modify action for each to 5.
- D. Create two access roles, one for doctors and one for nurses, and set the modify action for each to 1.

**Answer: B**

Explanation:
To allow both doctors and nurses to modify cases while complying with the identified security requirements, the best approach is to create a single access role for both doctors and nurses (C) and set the modify action to 5. This configuration grants both user groups the necessary permissions to modify cases throughout the case life cycle. By using a single access role with a high level of access for modifications, the application simplifies role management while ensuring that both doctors and nurses can perform their duties effectively, without compromising the security and integrity of patient cases. Reference: Pega Community documentation on Access Role to Object and case management best practices.

**NEW QUESTION # 60**

On which type of rule can you configure edit validate rules?

- A. Activities
- B. Properties
- C. Flow actions
- D. Case types

**Answer: B**

Explanation:
Edit validate rules are associated with properties to validate the property value when a user inputs data. Edit validate rules contain a Java function that is called to check the property value for correctness. Reference: Pega Platform Help - Edit validate rules.

## NEW QUESTION # 61
Which statement is true about services?

- A. Services return all data in XML format.
- B. Services may process outbound requests.
- C. Services require a REST connector to function.
- D. Services may use a listener that runs in the background.

**Answer: D**

Explanation:
Services in Pega Platform can be configured to listen for incoming requests using background listeners. These listeners are continuously running processes that wait for requests on specific ports or addresses. When a request is received, the service processes it accordingly. This capability is crucial for enabling asynchronous communication and integration with external systems, where Pega services can act upon requests without requiring manual initiation of these interactions.References: Pega Community documentation on service types and listeners.

## NEW QUESTION # 62
Which two options do you consider when creating a pre-processing data transform? (Choose Two)

- A. The effect if the flow action is reloaded
- B. The timing of the commit for the flow action
- C. The security setting for the flow action
- D. The potential reuse of the flow action

**Answer: A,D**

Explanation:
When creating a pre-processing data transform, you should consider the timing of the commit for the flow action and the effect if the flow action is reloaded. These factors can impact how the data transform processes data and how it integrates with the flow action's lifecycle. References: Pega Platform Help - Data Transforms.

## NEW QUESTION # 63
A courier company wants a mobile app to scan and track the parcels collected from remote areas with no internet access. Which mobile app do you develop to fulfill the requirement?

- A. Native app
- B. Unsigned app
- C. Signed app
- D. SDK app

**Answer: C**

Explanation:
For a courier company requiring a mobile app to work in remote areas without internet access, a signed app is the best solution.

Signed apps are authorized by a certificate authority, ensuring their authenticity and integrity. These apps can be designed to operate in offline mode, storing data locally when there's no internet connection and syncing it back to the server once connectivity is restored. This capability is crucial for field operations in remote areas, ensuring uninterrupted app functionality and data collection.Reference: Pega Community documentation on mobile app development and offline capabilities.

**NEW QUESTION # 64**
......

DumpsTorrent offers 100% secure online purchase at all the time. We offer payments through Paypal-one of the most trusted payment providers which can ensure the safety shopping for PEGACPSSA23V1 study torrent. Besides, before you choose our material, you can try our PEGACPSSA23V1 free demo questions to check if it is valuable for you to buy our PEGACPSSA23V1 practice dumps. You will get the latest and updated study dumps within one year after your purchase. So, do not worry the update and change in the actual test, you will be confident in the real test with the help of our PEGACPSSA23V1 training torrent.
