Adobe Experience Manager (AEM) is a powerful content management system that allows organizations to create and manage digital content across various channels. It is a critical tool for businesses that want to deliver seamless and personalized experiences to their customers. To become an expert in AEM, one needs to have a thorough understanding of its architecture, features, and functionalities. The Adobe AD0-E117 exam is designed to test this knowledge and validate the skills of AEM professionals.

Adobe AD0-E117 Exam is a challenging test that requires candidates to have practical experience in AEM. It is not a theoretical exam but rather a practical one, which means that candidates must have hands-on experience in designing and implementing AEM solutions. Candidates must be able to demonstrate their ability to solve complex problems and provide effective solutions using AEM.

The AD0-E117 Exam is a challenging test that requires candidates to demonstrate their expertise in AEM. AD0-E117 exam consists of multiple-choice questions and performance-based scenarios. Candidates must demonstrate their ability to design and deploy AEM solutions that meet the needs of their clients. They must show that they can configure AEM's features, integrate it with other systems, and optimize its performance.

Adobe Experience Manager Architect Master Sample Questions (Q28-Q33):

NEW QUESTION # 28

Refer to the exhibit.

A customer has SSO on its AEM Author environment using Adobe IMS, which is integrated with the customer's IDP using SAML. The customer plans to roll out a new secured website on AEM where SSO authentication is required for end users. The end user

accounts are also managed in the customer's existing IDP.
How should the Architect set up the authentication for the website?

- A. Integrate AEM Publisher using OAuth with Adobe IMS
- B. Set up CUG and use User Synchronisation from Author to Publisher
- C. Integrate AEM Publisher using SAML with Adobe IMS
- **D. Integrate AEM Publisher using SAML directly with the IDP**

Answer: D

Explanation:

SAML is a common and standard SSO handler that allows a user to access multiple systems after providing authentication credentials once. AEM ships with a SAML 2.0 Authentication Handler that supports signing and encryption of messages, automatic creation of users, and syncing groups to existing ones in AEM3. By integrating AEM Publisher using SAML directly with the IDP, the Architect can leverage the existing user accounts and authentication mechanism for the end users of the secured website.

NEW QUESTION # 29

An AEMaaS customer processes thousands of assets on a daily basis. A major business requirement is to push assets being published to various legacy external systems based on tagged asset metadata. Which solution would an architect choose?

- A. Use an external application server to offload AEM load and run batch processing using Assets HTTP API
- **B. Use custom workflow process to push assets conditionally via activation workflow for near real time transfer**
- C. Use a daily scheduler to distribute assets conditionally on top-up basis during least traffic hours
- D. Use headless application on App Builder to extend asset export using Event and Runtime

Answer: B

NEW QUESTION # 30

A client has a site that serves both authenticated and anonymous users. A subsection of the site, which is applicable for only logged-in users, is resource intensive. In order to have a scalable yet secured solution, using available features what would an architect choose for concerned hierarchy?

- A. Cache the concerned hierarchy at CDN but not on Dispatcher
- B. Cache the concerned hierarchy at CDN as well as Dispatcher level
- **C. Cache the concerned hierarchy at Dispatcher but not CDN**
- D. Cache the concerned hierarchy neither at CDN nor at Dispatcher

Answer: C

NEW QUESTION # 31

A client designs a new experience for one of their brand sites with the following parameters:

- * The new experience should behave like a desktop application
- * There is a lot of dynamic content in the app
- * SEO and initial page load are a top concern for the client
- * The client's marketing team needs to be able to author the content with a WYSIWYG editor Which approach should the Architect use to meet these requirements?

- A. Use the traditional server side components on the website
- **B. Create a set of API-driven components**
- C. Use the SPA Editor SDK with Server Side Rendering
- D. Use AEM as a headless CMS

Answer: B

NEW QUESTION # 32

During an optimization session, a client using AEM 6.5 mentions that they face challenges with their AEM Author setup. The client
