## L3M6 Real Exam, Reliable L3M6 Braindumps

We at TestSimulate give you the techniques and resources to make sure you get the most out of your exam study. We provide preparation material for the Socially Responsible Warehousing and Distribution exam that will guide you when you sit to study for it. L3M6 updated questions give you enough confidence to sit for the CIPS exam. If you take enough practice tests on L3M6 Practice Exam software by TestSimulate, you'll be more comfortable when you walk in on CIPS exam day. So, go with L3M6 exam questions that are prepared under the supervision of industry experts to expand your knowledge base and successfully pass the certification exam on the first attempt.

## CIPS L3M6 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• Understand Methods for the Storage and Movement of Inventory: This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Understand the Environmental Impact of Warehousing and Distribution: This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Understand the Environmental Impact of Procurement and Supply: This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction.</li> </ul>

## CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q208-Q213):

### NEW QUESTION # 208

What does CSR stand for?

- A. Company Social Responsibility
- B. Company Social Response
- C. Corporate Social Response
- **D. Corporate Social Responsibility**

**Answer: D**

Explanation:

CSR stands for Corporate Social Responsibility, a management concept where organizations integrate social, environmental, and economic concerns into their operations and stakeholder interactions. The CIPS L3M6 module defines CSR as a cornerstone of sustainable business practices, emphasizing its role in balancing profit with purpose.

Reference:

### NEW QUESTION # 209

Which of the following would you do to calculate a carbon footprint? Select all that apply.

- **A. Collect your data and identify and explain any gaps or assumptions you have made**
- B. Only collect the easy data and ignore the difficult data
- C. Ask an untrustworthy third party to audit and verify your data before making it public

- **D. Select your measurement method and be consistent**

**Answer: A,D**

Explanation:

Calculating a carbon footprint, per the CIPS L3M6 syllabus, requires robust methods: collecting comprehensive data with transparency about gaps/assumptions (B) and using a consistent measurement approach (D). Option A (untrustworthy auditing) undermines credibility, and option C (ignoring difficult data) invalidates accuracy. CSR emphasizes reliable carbon footprint monitoring.

---

#### **NEW QUESTION # 210**

The government needs to ensure their laws keep pace with economic, demographic, and technological change.

- A. FALSE
- **B. TRUE**

**Answer: B**

Explanation:

Governments must update laws to address economic shifts (e.g., green markets), demographic trends (e.g., urban growth), and tech advances (e.g., electric vehicles). The CIPS L3M6 module stresses this adaptability-e.g., new emissions standards for drones reflect tech change. This ensures relevance in regulating supply chains, a true statement central to LO2's governance focus.

Reference:

---

#### **NEW QUESTION # 211**

Using non-toxic materials that are ethically and sustainably sourced is an example of a way the construction sector can help with energy efficiency.

- A. FALSE
- **B. TRUE**

**Answer: B**

Explanation:

Using non-toxic, ethically, and sustainably sourced materials directly supports energy efficiency in construction. The CIPS L3M6 module notes that such materials (e.g., bamboo, recycled steel) often have lower embodied energy (energy used in production) compared to traditional options like concrete. Non-toxic properties reduce environmental harm during use, while ethical sourcing ensures minimal ecological disruption (e.g., avoiding deforestation). For instance, insulation from recycled materials improves thermal performance, cutting energy use for heating/cooling. This holistic approach aligns with LO2's focus on reducing construction's environmental footprint.

---

#### **NEW QUESTION # 212**

The CDP has identified 120 organizations that are leaders in climate change and in reducing carbon emissions.

- A. FALSE
- **B. TRUE**

**Answer: B**

Explanation:

The CDP annually recognizes organizations as leaders in climate action through its 'A List', which includes those excelling in reducing carbon emissions and addressing climate change. While the exact number varies yearly, the CIPS L3M6 module references the CDP's identification of around 120 organizations as a benchmark figure for leadership in this area, based on historical data. This

reflects their commitment to environmental management and leadership dimensions.
