Pass Guaranteed Oracle 1Z0-771 - Oracle APEX Cloud Developer Professional Marvelous Relevant Exam Dumps

DOWNLOAD the newest Dumpkiller 1Z0-771 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1PVa6tuAh3bDXFEfg5FYJcVdSfzWiUJ6T

Our 1Z0-771 study braindumps are comprehensive that include all knowledge you need to learn necessary knowledge, as well as cope with the test ahead of you. With convenient access to our website, you can have an experimental look of free demos before get your favorite 1Z0-771 prep guide downloaded. You can both learn useful knowledge and pass the exam with efficiency with our 1Z0-771 Real Questions easily. We are on the way of meeting our mission and purposes of helping exam candidates to consider the exam as a campaign of success and pass the exam successfully.

Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 2	• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 3	• Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Topic 4	• Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.

Topic 5	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 6	• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 7	• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Topic 8	• Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 9	• Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.

Valid Dumps 1Z0-771 Sheet - 1Z0-771 Certificate Exam

With the development of scientific and technological progress computer in our life play an increasingly important role. The job positions relating to internet are hot. Our 1Z0-771 test dumps files help people who have dreams of entering this field and make a great achievement. IT technology skills are universal, once you get a Oracle certification (1Z0-771 Test Dumps files), you can have an outstanding advantage while applying for a job no matter where you are.

Oracle APEX Cloud Developer Professional Sample Questions (Q47-Q52):

NEW QUESTION # 47
You must create a single master detail page where users can select a row in the master region and see the corresponding details in the detail region. Users must also interact with the master or the detail without leaving the page. Which type of master detail implementation should you use?

- A. Drill Down
- B. Stacked
- C. Side by Side

Answer: C

Explanation:
Master-detail pages in APEX link a master dataset (e.g., list of orders) to its details (e.g., order items). The requirements demand:
C . Side by Side: This layout places the master region (e.g., an Interactive Report) and detail region (e.g., a Form or Grid) horizontally on the same page. Selecting a master row updates the detail region via AJAX, allowing interaction with both regions without navigation. It's ideal for workflows needing simultaneous visibility (e.g., editing details while browsing masters).
A . Drill Down: Master links to a separate detail page, requiring navigation, which violates the "without leaving the page" condition.
B . Stacked: Master and detail are vertically stacked, but interaction is less fluid than side-by-side due to scrolling, though still on one page. Side-by-side is preferred for its clarity and accessibility.
Pitfall: Ensure the detail region's "Server-side Condition" uses the master's selected key (e.g., P1_ID).

NEW QUESTION # 48
Which three data types are supported by Oracle APEX Workflow parameters and item types?

- A. CLOB
- B. NUMBER
- C. Image
- D. VARCHAR

Answer: A,B,D

Explanation:
Workflow parameters and page items in APEX support:
B . NUMBER: For numeric values (e.g., 123.45), used in calculations or IDs.
C . CLOB: For large text (e.g., descriptions), stored as character large objects.
D . VARCHAR: For variable-length strings (e.g., EMPLOYEE_NAME), capped at 4000 characters in most cases.
A . Image: Not a supported data type for parameters or items; images are handled as BLOBs or file uploads, not directly as a Workflow parameter type.
These types align with Oracle Database, ensuring robust data handling in workflows.

NEW QUESTION # 49
Which two are valid evaluation points for Authorization Schemes?

- A. Once per page view
- B. Never
- C. Once per user
- D. Once per session

Answer: A,D

Explanation:
Authorization Schemes in APEX can be evaluated at:
Once per page view: Checks authorization each time a page is rendered.
Once per session: Checks once per user session, caching the result.
Once per user and Never are not valid evaluation points in the Authorization Scheme settings.

NEW QUESTION # 50
Which client credentials are used for authentication during the 'Check Syntax' process?

- A. Database schema credentials
- B. APEX Workspace Admin credentials
- C. APEX Developer credentials

Answer: A

Explanation:
The "Check Syntax" process in APEX, typically used in SQL Workshop or when validating code, authenticates using Database schema credentials. These are the credentials of the schema associated with the APEX workspace (e.g., username/password of the schema like "HR"). This ensures the process has access to parse and validate SQL or PL/SQL against the database objects in that schema.
APEX Workspace Admin credentials: These are for managing workspaces, not executing database-level syntax checks.
APEX Developer credentials: These authenticate developers into the APEX IDE, not the database runtime environment.
This design aligns with APEX's security model, where database operations are tied to the schema, ensuring accurate validation and error reporting (e.g., missing privileges or invalid objects).

NEW QUESTION # 51
Which search type in keywords do they represent in Oracle Text?

- A. Oracle Text
- B. List
- C. Standard

Answer: A

Explanation:
In Oracle APEX, when configuring search functionality (e.g., in reports or faceted search), "Oracle Text" refers to a specific search type leveraging the Oracle Text engine. This is a powerful full-text search capability built into Oracle Database, supporting keyword-based searches, fuzzy matching, and indexing.
Standard: A basic SQL-based search (e.g., LIKE), not tied to Oracle Text.
List: Not a search type; it might refer to a UI component or LOV, not a search mechanism.
Oracle Text: Explicitly uses the CONTAINS operator and text indexes (e.g., CONTEXT or CTXCAT) for advanced search features, ideal for large datasets or complex queries.
This choice impacts performance and accuracy, especially in text-heavy applications.

NEW QUESTION # 52

......

By focusing on how to help you more effectively, we encourage exam candidates to buy our 1Z0-771 study braindumps with high passing rate up to 98 to 100 percent all these years. Our experts designed three versions for you rather than simply congregate points of questions into 1Z0-771 real questions. Efforts conducted in an effort to relieve you of any losses or stress. So our activities are not just about profitable transactions to occur but enable exam candidates win this exam with the least time and get the most useful contents. We develop many reliable customers with our high quality 1Z0-771 Prep Guide. When they need the similar exam materials and they place the second even the third order because they are inclining to our 1Z0-771 study braindumps in preference to almost any other.
