현재Fortinet FCSS\_SASE\_AD-25인증시험을 위하여 노력하고 있습니까? 빠르게Fortinet인증 FCSS\_SASE\_AD-25시험자격을 취득하고 싶으시다면 우리 Itexamdump 의 덤프를 선택하시면 됩니다., Itexamdump를 선택함으로Fortinet FCSS\_SASE\_AD-25인증시험패스는 꿈이 아닌 현실로 다가올 것입니다,

## Fortinet FCSS\_SASE\_AD-25 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.</li> </ul>

주제 2	<ul style="list-style-type: none"> <li>• SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>• Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>• Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.</li> </ul>

## FCSS\_SASE\_AD-25인증시험대비 덤프공부 덤프 FCSS - FortiSASE 25 Administrator 시험대비자료

Fortinet인증 FCSS\_SASE\_AD-25시험을 어떻게 공부하면 패스할 수 있을지 고민중이시면 근심걱정 버리시고 Itexamdump 의 Fortinet인증 FCSS\_SASE\_AD-25덤프로 가보세요. 문항수가 적고 적응율이 높은 세련된Fortinet인증 FCSS\_SASE\_AD-25시험준비 공부자료는 Itexamdump제품이 최고입니다.

### 최신 Secure Access Service Edge FCSS\_SASE\_AD-25 무료 샘플문제 (Q39-Q44):

#### 질문 # 39

Refer to the exhibits.

The screenshot displays the Fortinet FortiSASE management console. The top section, 'Managed Endpoints', shows a table with the following data:

Endpoint	VPN Username	Management Connection	ZTNA Tags (Simple)	FortiClient Version	Vulnerabilities Detected
Win10-Pro	use2@fortinettraining.lab	Online	FortiSASE-Compliant	7.0.10.0538	140
Win7-Pro	use1@fortinettraining.lab	Online	FortiSASE-Non-Compliant, FortiSASE-Compliant	7.0.8.0427	176

The bottom section, 'Secure Internet Access Policy', shows a table with the following data:

Name	Profile Group	Source	User	Destination	Action
Botnet Deny		all	All VPN Users	Botnet-C&C.Server	Deny
Non-Compliant		FortiSASE-Non-Compliant	All VPN Users	All Internet Traffic	Deny
Web Traffic	SIA	FortiSASE-Compliant	VPN_Users	All Internet Traffic	Accept
Allow-All	Default		All VPN Users	All Internet Traffic	Accept
Implicit Deny		all	All VPN Users	All Internet Traffic	Deny

Win10-Pro and Win7-Pro are endpoints from the same remote location. Win10-Pro can access the internet through FortiSASE, while Win7-Pro can no longer access the internet. Given the exhibits, which reason explains the outage on Win7-Pro?

- A. Win7-Pro cannot reach the FortiSASE SSL VPN gateway
- B. Win-7 Pro has exceeded the total vulnerability detected threshold.
- C. The Win7-Pro FortiClient version does not match the FortiSASE endpoint requirement.

- D. The Win7-Pro device posture has changed.

**정답: B**

**설명:**

Based on the provided exhibits, the reason why the Win7-Pro endpoint can no longer access the internet through FortiSASE is due to exceeding the total vulnerability detected threshold. This threshold is used to determine if a device is compliant with the security requirements to access the network.

**Endpoint Compliance:**

FortiSASE monitors endpoint compliance by assessing various security parameters, including the number of vulnerabilities detected on the device.

The compliance status is indicated by the ZTNA tags and the vulnerabilities detected.

**Vulnerability Threshold:**

The exhibit shows that Win7-Pro has 176 vulnerabilities detected, whereas Win10-Pro has 140 vulnerabilities.

If the endpoint exceeds a predefined vulnerability threshold, it may be restricted from accessing the network to ensure overall network security.

**Impact on Network Access:**

Since Win7-Pro has exceeded the vulnerability threshold, it is marked as non-compliant and subsequently loses internet access through FortiSASE.

The FortiSASE endpoint profile enforces this compliance check to prevent potentially vulnerable devices from accessing the internet.

FortiOS 7.2 Administration Guide: Provides information on endpoint compliance and vulnerability management.

FortiSASE 23.2 Documentation: Explains how vulnerability thresholds are used to determine endpoint compliance and access control.

**질문 # 40**

In a FortiSASE secure web gateway (SWG) deployment, which two features protect against web-based threats? (Choose two.)

- A. web application firewall (WAF) for web applications
- **B. malware protection with sandboxing capabilities**
- C. intrusion prevention system (IPS) for web traffic
- **D. SSL deep inspection for encrypted web traffic**

**정답: B,D**

**설명:**

SSL deep inspection allows FortiSASE to analyze encrypted web traffic for threats, while malware protection with sandboxing detects and blocks malicious files delivered through web channels.

**질문 # 41**

How can FortiView be utilized to enhance security posture within an organization?

- A. By broadcasting system updates
- B. By displaying ads relevant to the IT department
- **C. By providing detailed insights into application usage**
- D. By tracking the physical locations of network devices

**정답: C**

**질문 # 42**

A customer wants to upgrade their legacy on-premises proxy to a cloud-based proxy for a hybrid network. Which FortiSASE features would help the customer to achieve this outcome?

- A. SD-WAN and inline-CASB
- B. zero trust network access (ZTNA) and next generation firewall (NGFW)
- C. SD-WAN and NGFW
- **D. secure web gateway (SWG) and inline-CASB**

**정답: D**

**설명:**

For a customer looking to upgrade their legacy on-premises proxy to a cloud-based proxy for a hybrid network, the combination of Secure Web Gateway (SWG) and Inline Cloud Access Security Broker (CASB) features in FortiSASE will provide the necessary capabilities.

Secure Web Gateway (SWG):

SWG provides comprehensive web security by inspecting and filtering web traffic to protect against web-based threats.

It ensures that all web traffic, whether originating from on-premises or remote locations, is inspected and secured by the cloud-based proxy.

Inline Cloud Access Security Broker (CASB):

CASB enhances security by providing visibility and control over cloud applications and services.

Inline CASB integrates with SWG to enforce security policies for cloud application usage, preventing unauthorized access and data leakage.

FortiOS 7.2 Administration Guide: Details on SWG and CASB features.

FortiSASE 23.2 Documentation: Explains how SWG and inline-CASB are used in cloud-based proxy solutions.

**질문 # 43**

An administrator must restrict endpoints from certain countries from connecting to FortiSASE. Which configuration can achieve this?

- A. Configure source IP anchoring to restrict access from the specified countries.
- B. Configure a network lockdown policy on the endpoint profiles.
- **C. Configure geofencing to restrict access from the required countries.**
- D. Configure a geography address object as the source for a deny policy.

**정답: C**

**설명:**

Geofencing allows the administrator to restrict or allow access to FortiSASE services based on the geographic location of the endpoints, effectively blocking connections from specified countries.

**질문 # 44**
