Pdf 300-610 Dumps | Valid 300-610 Exam Tutorial

P.S. Free & New 300-610 dumps are available on Google Drive shared by DumpExam: https://drive.google.com/open?id=1XglL27KBDSf-o3i0b53l95dTsQmSbdjQ

Choosing our Cisco vce dumps means you can closer to success. We have rich experienced in the real questions of 300-610 actual test. Our 300-610 vce files are affordable, latest and best quality with detailed answers and explanations, which can overcome the difficulty of real exam. You will save lots of time and money with our 300-610 Braindumps Torrent.

Users who use our 300-610 study materials already have an advantage over those who don't prepare for the exam. Our study materials can let users the most closed to the actual test environment simulation training, let the user valuable practice effectively on 300-610 study materials, thus through the day-to-day practice, for users to develop the confidence to pass the exam. For examination, the power is part of pass the exam but also need the candidate has a strong heart to bear ability, so our 300-610 Study Materials through continuous simulation testing, let users less fear when the real test, better play out their usual test levels, can even let them photographed, the final pass exam.

Quiz 2026 The Best Cisco 300-610: Pdf Designing Cisco Data Center Infrastructure Dumps

This helps you save your money and time as the actual Designing Cisco Data Center Infrastructure 300-610 certification exam costs a high fee. Cisco also offers 365 days free updates if the 300-610 certification exam content changes after the purchase of the Cisco 300-610 Exam Dumps. We guarantee our valued customers that you will qualify for your Cisco 300-610 exam, hence this saves you time and money.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q21-Q26):

NEW QUESTION # 21
Which element is the main functional component of the architecture that separates the internal fabric and the external network that connects sites when VXLAN EVPN is deployed multisite?

- A. service gateway
- B. service leaf
- C. border gateway
- D. border leaf

Answer: C

Explanation:

The main functional component of the EVPN Multi-Site architecture is the border gateway, or BGW. BGWs separate the fabric-side (site-internal fabric) from the network that interconnects the sites (site-external DCI) and mask the site-internal VTEPs. link:https://www.cisco.com/c/en/us/products/collateral/switches/nexus-9000-series- switches/white-paper-c11-739942.html

NEW QUESTION # 22

What can be implemented on Cisco Nexus 5600 Series Switches for link redundancy within a Fibre Channel fabric?

- A. vPC+
- B. SAN port channel
- C. LACP port channel
- D. E-Trunk

Answer: B

Explanation:
https://www.cisco.com/c/en/us/td/docs/switches/datacenter/nexus5600/sw/san_switching/7x/b_56 00_SAN_Switching_Config_7x/configuring_san_port___channels.html
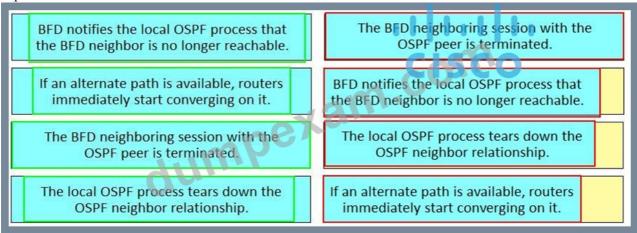

NEW QUESTION # 23

A failure occurs on the network between two BFD and OSPF neighbors. Drag and drop the protocol actions from the left into the correct order on the right.

Answer:

Explanation:

NEW QUESTION # 24

A data center with over 4000 VLANs must be stretched to a disaster recovery site. The solution must support the migration of virtual machines to a disaster recovery site. To support the scalability of the solution, the internal fabric of the main site must be from

the DCI network. The connecting network infrastructure uses a 10 Gbps link with PIM ASM supported, which will be replaced with a different overlay in the next 12 months. The solution must support head-end replication for broadcast, unknown unicast, and multicast traffic. Which solution must be used to meet these requirements?

- A. OTV
- B. MPLS over GRE
- C. VXLAN Multi-Site
- D. LISP

Answer: C

NEW QUESTION # 25

An engineer is implementing a storage area network where an NPV is used. The engineer notices that the servers in a storage farm are experiencing heavy traffic contention. The engineer needs to migrate traffic from heavily loaded server interfaces to interfaces with less load. When the new links are deployed, the existing traffic is not rebalanced as expected.
Which feature must be used to meet these requirements?

- A. DVM
- B. disruptive load balancing
- C. multiple VSAN support
- D. NPIV

Answer: B

Explanation:
In NPV mode, by default, a load-balancing algorithm assigns server interfaces to NPV core switch links upon initial login, but when new links are deployed, existing traffic is not automatically redistributed to achieve better load balance.
Disruptive load balancing is a feature that forces reinitialization of the server interfaces to rebalance traffic across the available NPV external (uplink) interfaces. This enables the migration of traffic away from heavily loaded interfaces to less busy ones.
Without disruptive load balancing enabled, traffic remains on the initial assigned uplink until manual intervention (such as manually flapping interfaces).

NEW QUESTION # 26

......

Therefore, if you have struggled for months to pass Designing Cisco Data Center Infrastructure 300-610 exam, be rest assured you will pass this time with the help of our Designing Cisco Data Center Infrastructure 300-610 exam dumps. Every Designing Cisco Data Center Infrastructure 300-610 candidate who has used our exam preparation material has passed the exam with flying colors. Availability in different formats is one of the advantages valued by Designing Cisco Data Center Infrastructure exam candidates. It allows them to choose the format of Designing Cisco Data Center Infrastructure 300-610 Dumps they want.
