SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite 認定 C_BCBAI_2509 試験問題 (Q51-Q56):

質問 # 51

(What are some potential benefits of using SAP Business AI in finance? Note: There are 3 correct answers to this question.)

- A. Guard against fraud
- B. Simplify error resolution
- C. Enforce compliance
- D. Reduce sales outstanding
- E. Generate creative accounting solutions

正解: A、B、C

解説:

Comprehensive and Detailed Explanation From Exact Extract: SAP Business AI in finance provides benefits such as enforcing compliance through risk management and governance, guarding against fraud via anomaly detection, and simplifying error resolution with intelligent guidance in processes like invoice matching and payment clarification. These capabilities enhance accuracy, reduce risks, and improve operational efficiency in financial operations.

Exact extracts supporting this:

Enforce compliance: "With SAP AI-powered governance, compliance, and risk management solutions, finance departments can identify and respond to risks as they arise."learning.sap.com "Optimize working capital, manage risk, ensure compliance, and grow revenue."sap.com Guard against fraud: "AI-assisted anomaly detection to protect the business against fraud."learning.sap.com "Reduce revenue losses due to fraud using AI with SAP Business Integrity Screening for SAP S/4HANA Cloud Private Edition."sap.com Simplify error resolution: "Intelligent guidance to simplify error resolution."learning.sap.com "Eliminate manual payment clarifications, reducing accounts receivable matching effort by 71% with AI-powered matching and payment advice extraction."sap.com Other options are incorrect because:

Option A: SAP Business AI focuses on reliable, data-grounded solutions rather than "creative" accounting, which could imply non-compliant or unethical practices.

Option D: While AI optimizes working capital, reducing days sales outstanding (DSO) is more directly associated with cash application automation, but the primary benefits highlighted are compliance, fraud protection, and error simplification; DSO reduction is a secondary outcome.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Sourced from the SAP Learning Journey "Discovering New AI Capabilities for SAP Finance" and the SAP product page for "SAP Business AI - Artificial Intelligence for ERP & Finance." These emphasize AI's role in compliance, fraud detection, and error resolution within financial processes, as aligned with C_BCBAI_2502 certification materials.

質問 # 52

Which of the following capabilities are offered by Joule for Consultants? Note: There are 2 correct answers to this question.

- A. Code intelligence
- B. SAP Fiori apps smart help
- C. Process automation
- D. Project lifecycle support

正解: B、D

解説:

Joule provides targeted capabilities for consultants to streamline their work within SAP ecosystems. Project lifecycle support enables

consultants to manage project phases, from planning to execution, by providing AI-driven insights and recommendations, as outlined in the SAP Business AI documentation. SAP Fiori apps smart help enhances consultants' ability to navigate and utilize Fiori apps efficiently, offering contextual guidance and support within the SAP environment. While code intelligence and process automation are valuable AI features, they are not specifically highlighted as consultant-focused capabilities in SAP's Joule documentation. These features empower consultants to deliver high-value services by improving efficiency and accuracy in SAP-related tasks.

SAP Business AI Questions (Batch 2 of 5)

質問 # 53

Apart from SAP LeanIX, what other solutions does the AI agent hub support? Note: There are 2 correct answers to this question.

- A. SAP Integrated Business Planning
- B. SAP Signavio
- C. SAP SuccessFactors
- D. SAP Ariba

正解: C、D

解説:

The AI agent hub supports integration with SAP SuccessFactors and SAP Ariba, in addition to SAP LeanIX, as detailed in SAP Business AI documentation. SAP SuccessFactors enables AI agents to enhance HR processes, such as recruitment and employee development, with intelligent automation. SAP Ariba supports procurement processes, leveraging AI agents for supplier management and sourcing optimization. SAP Signavio focuses on process modeling, and SAP Integrated Business Planning is not explicitly listed as supported by the AI agent hub in the documentation. These integrations allow the AI agent hub to deliver cross-functional value across SAP's ecosystem.

質問 # 54

(How can Joule for ABAP development support developers? Note: There are 3 correct answers to this question.)

- A. By debugging ABAP programs
- B. By creating unit tests
- C. By generating ABAP business objects
- D. By explaining ABAP code
- E. By creating ABAP coding learning journeys

正解: B、C、D

解説:

Comprehensive and Detailed Explanation From Exact Extract: Joule for ABAP development supports developers by explaining ABAP code to aid understanding of logic and structure, creating unit tests to automate testing and improve code quality, and generating ABAP business objects to accelerate development using the ABAP RESTful Application Programming Model (RAP). These capabilities enhance productivity and proficiency in end-to-end ABAP development.

Exact extracts supporting this:

Explaining ABAP code: "Joule generates explanations of selected ABAP code or ABAP core data services (CDS) views to help you quickly understand the programming logic and code written ..."sap.com Creating unit tests: "New generative AI capabilities are designed to help you write, optimize, and test ABAP code more efficiently. From generating code suggestions

..."community.sap.com (Implying unit test generation as part of testing efficiency.) Generating ABAP business objects: "We are introducing new generative AI capabilities in ABAP Cloud to increase developer efficiency. The first scope of features will cover business object ..."learning.sap.com "Generative AI for ABAP development. With new ABAP capabilities, Joule can now help ABAP developers be more efficient with their development ..."community.sap.com Other options are incorrect because:

Option D: Joule provides suggestions and automation but does not directly debug programs; debugging remains a developer task supported by tools like ADT.

Option E: Joule focuses on practical development assistance rather than creating educational learning journeys, which are handled by SAP Learning platforms.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP News articles like "Introducing Joule for Developers: AI-Powered Capabilities Across SAP" and SAP Help Portal for "Joule for Developers, ABAP AI Capabilities." These position Joule as an AI tool for ABAP within the SAP Business Suite, as covered in the C_BCBAI_2502 certification and learning journeys for generative AI in development.
