

Microsoft AI-102 Pass4sure Pass Guide: Designing and Implementing a Microsoft Azure AI Solution - Braindumpsqa Free PDF

BONUS!!! Download part of Braindumpsqa AI-102 dumps for free: <https://drive.google.com/open?id=1xGnlHVyTku6AmDCvMFBEOgNxyfqe8fxZ>

These people who used our products have thought highly of our AI-102 study materials. If you decide to buy our products and take it seriously consideration, we can make sure that it will be very easy for you to simply pass your exam and get the AI-102 certification in a short time. We are also willing to help you achieve your dream. Now give me a chance to show you our AI-102 Study Materials. You will have no regret spending your valuable time on our introduction. Besides, our AI-102 study quiz is priced reasonably, so we do not overcharge you at all.

Earning the Microsoft AI-102 Certification validates the candidate's expertise in designing and implementing AI solutions on the Azure platform. Designing and Implementing a Microsoft Azure AI Solution certification also demonstrates the candidate's ability to leverage Azure services to create intelligent solutions that can help organizations make data-driven decisions. Additionally, earning this certification can help professionals advance their careers by demonstrating their proficiency in one of the fastest-growing fields in the technology industry.

AI-102 Dumps PDF: Designing and Implementing a Microsoft Azure AI Solution & AI-102 Test Questions & Designing and Implementing a Microsoft Azure AI Solution Dumps Torrent

Your privacy and personal right are protected by our company and corresponding laws and regulations on our AI-102 study guide. Whether you are purchasing our AI-102 training questions, installing or using them, we won't give away your information to other platforms, and the whole transaction process will be open and transparent. Therefore, let us be your long-term partner and we promise our AI-102 Preparation exam won't let down.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q220-Q225):

NEW QUESTION # 220

You have an Azure subscription that contains an Azure AI Search instance named `AIsearch1`. `AIsearch1` contains an index that includes a vector.

You need to perform the following actions:

- * Deploy a new agent by using the Azure AI Agent Service.
- * Connect the AI Search1 index to the new agent.
- * Validate the integration of the index and the agent.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 221

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Cognitive Search service.

During the past 12 months, query volume steadily increased.

You discover that some search query requests to the Cognitive Search service are being throttled.

You need to reduce the likelihood that search query requests are throttled.

Solution: You migrate to a Cognitive Search service that uses a higher tier.

Does this meet the goal?

- **A. Yes**
- B. No

Answer: A

Explanation:

You have an Azure Cognitive Search service. Query volume has increased, and some search requests are now being throttled. This means your current tier is no longer sufficient to handle the query traffic.

* Each Azure Cognitive Search pricing tier (Basic, Standard S1/S2/S3, Storage Optimized, etc.) provides different resource limits for queries per second (QPS), indexing throughput, and storage.

* Throttling occurs when query traffic exceeds the capacity limits of the current tier.

* Moving to a higher tier increases:

* The allowed query units (QUs),

* Maximum queries per second (QPS),

* and available compute resources.

* Therefore, migrating to a higher tier reduces the likelihood of throttling and supports the increased query volume.

* Simply adding replicas can help scale out query workloads, but the question specifically asks whether moving to a higher tier meets the goal-and it does.

* Using indexer scaling or adjusting query patterns might help, but they are not direct answers to the throttling caused by insufficient service tier capacity.

* Azure Cognitive Search service limits by tier

* Scale resources in Azure Cognitive Search

* Azure Cognitive Search pricing tiers

NEW QUESTION # 222

You are building a natural language model.

You need to enable active learning.

What should you do?

- **A. Add log=true to the prediction endpoint query.**
- B. Enable sentiment analysis.
- C. Add show-all-intents=true to the prediction endpoint query.
- D. Enable speech priming.

Answer: A

NEW QUESTION # 223

You are developing a text processing solution.

You develop the following method.

☐ You call the method by using the following code.

GetKeyPhrases(textAnalyticsClient, "the cat sat on the mat");

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
