

SAP最新C-AIG-2412考古題：SAP Certified Associate - SAP Generative AI Developer & 認證成功保證，簡單的培訓方式

P.S. KaoGuTi在Google Drive上分享了免費的2026 SAP C-AIG-2412考試題庫：https://drive.google.com/open?id=11vD_bbo2yCc04nAE7Sjny-UG9ElmFa

考古題網站在近幾年激增，這可能是導致你準備 SAP 的 C-AIG-2412 考試認證毫無頭緒。SAP C-AIG-2412 考試培訓資料是一些專業人士和通過了的考生用實踐證明瞭的有效的培訓資料，它可以幫助你通過考試認證。告訴各考生一個好消息：KaoGuTi C-AIG-2412 考古題已經更新，解除了考生的擔憂！現在購買考題將得到一定的優惠！每個考生在準備 SAP 認證考試時，都非常苦惱！希望各位考生順利通過考試！

SAP C-AIG-2412 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"> SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.
主題 2	<ul style="list-style-type: none"> Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.
主題 3	<ul style="list-style-type: none"> Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.
主題 4	<ul style="list-style-type: none"> SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.

全面的最新C-AIG-2412考古題，高質量的學習資料幫助妳快速通過C-AIG-2412考試

通過SAP C-AIG-2412認證考試可以給你帶來很多改變。比如工作，生活，都會有很大的提升，因為畢竟C-AIG-2412考試是一個SAP認證的相當重要的考試，但通過C-AIG-2412考試不是那麼簡單的。

最新的 SAP Certified Associate C-AIG-2412 免費考試真題 (Q18-Q23):

問題 #18

What is a part of LLM context optimization?

- A. Enhancing the computational speed of the model
- **B. Providing the model with domain-specific knowledge needed to solve a problem**
- C. Adjusting the model's output format and style
- D. Reducing the model's size to improve efficiency

答案： B

解題說明：

LLM context optimization involves tailoring a Large Language Model's (LLM) input context to enhance its performance on specific tasks, particularly by incorporating domain-specific knowledge.

1. Understanding LLM Context Optimization:

* **Definition:**Context optimization refers to the process of adjusting the input provided to an LLM to ensure it includes relevant information, thereby enabling the model to generate more accurate and contextually appropriate outputs.

* **Domain-Specific Knowledge Integration:**By embedding domain-specific information into the model's context, the LLM can better understand and address specialized queries, leading to improved problem-solving capabilities.

2. Importance of Domain-Specific Knowledge:

* **Enhanced Relevance:**Providing domain-specific context ensures that the model's responses are pertinent to the particular field or subject matter, increasing the utility of the generated content.

* **Improved Accuracy:**With access to specialized knowledge, the LLM is less likely to produce generic or incorrect answers, thereby enhancing the overall quality of its outputs.

3. Methods of Context Optimization:

* **Prompt Engineering:**Crafting prompts that include necessary domain-specific information to guide the model towards generating desired responses.

* **Retrieval-Augmented Generation (RAG):**Incorporating external data sources into the model's context to provide up-to-date and relevant information pertinent to the domain.

問題 #19

Where can you configure language models in generative AI hub?

- **A. The Configuration tab within ML Operations in SAP AI Launchpad**
- B. The Orchestration tab in SAP AI Launchpad
- C. The Models tab in Prompt Editor
- D. The Configuration tab of the SAP BTP cockpit

答案： A

解題說明：

In SAP's Generative AI Hub, configuring language models is a crucial step for integrating AI capabilities into applications.

1. Accessing the Configuration Interface:

* **ML Operations Section:**Within SAP AI Launchpad, navigate to the ML Operations section to manage machine learning models and operations.

* **Configuration Tab:**In the Configuration tab, you can set up and manage various aspects of language models, including selecting model providers, specifying model versions, and configuring deployment settings.

2. Steps to Configure Language Models:

* **Model Selection:**Choose the desired language model from the available options, such as GPT-4 or other large language models (LLMs) provided through the Generative AI Hub.

* **Parameter Configuration:**Set parameters like model version, input constraints, and performance settings to tailor the model's behavior to your application's requirements.

* Deployment Setup: Configure deployment details to ensure the model is accessible and integrated appropriately within your application's infrastructure.

問題 #20

What are some functionalities provided by SAP AI Core?

Note: There are 3 correct answers to this question.

- A. Integration of AI services with business applications using a standardized API
- B. Continuous delivery and tenant isolation for scalability
- C. Orchestration of AI workflows such as model training and inference
- D. Management of SAP S/4HANA cloud infrastructure
- E. Monitoring and retraining models in SAP AI Core

答案: A,B,C

問題 #21

Which technique is used to supply domain-specific knowledge to an LLM?

- A. Fine-tuning the model on general data
- B. Domain-adaptation training
- C. Prompt template expansion
- D. Retrieval-Augmented Generation

答案: B

問題 #22

What are some benefits of the SAP AI Launchpad? Note: There are 2 correct answers to this question.

- A. Direct deployment of AI models to SAP HANA.
- B. Simplified model retraining and performance improvement.
- C. Integration with non-SAP platforms like Azure and AWS.
- D. Centralized AI lifecycle management for all AI scenarios.

答案: B,D

問題 #23

.....

KaoGuTi就是一個專門為SAP專業人士提供相關C-AIG-2412認證考試的資訊來源的網站。通過很多使用過KaoGuTi的產品的人反映，KaoGuTi被證明是最好的資訊來源網站。KaoGuTi的產品是一個很可靠的培訓工具。KaoGuTi提供的C-AIG-2412考試練習題的答案是非常準確的。我們的KaoGuTi的資深專家正在不斷地提升我們的培訓資料的品質。
