ISACA Certified Information Security Manager Sample Questions (Q381-Q386):

NEW QUESTION # 381
Which of the following is the BEST strategy when determining an organization's approach to risk treatment?

- A. Implementing risk mitigation controls that are considered quick wins
- B. Prioritizing controls that directly mitigate the organization's most critical risks
- C. Advancing the maturity of existing controls based on risk tolerance
- D. Implementing a one-size-fits-all set of controls across all organizational units

Answer: B

Explanation:
The best strategy for risk treatment is to prioritize controls that directly mitigate the organization's most critical risks. This aligns with a risk-based approach, where limited resources are directed toward areas with the highest business impact.
"Effective risk treatment involves prioritizing actions that address the most critical risks to the organization, considering impact and likelihood."
- CISM Review Manual 15th Edition, Chapter 2: Risk Response and Mitigation* Advancing maturity or applying quick wins may help, but they are not as strategic or impactful as targeting top-priority risks.

NEW QUESTION # 382
An organization's outsourced firewall was poorly configured and allowed unauthorized access that resulted in downtime of 48 hours. Which of the following should be the information security manager's NEXT course of action?

- A. Seek damages from the service provider.
- B. Obtain supporting evidence that the problem has been corrected.
- C. Revisit the contract and improve accountability of the service provider.
- D. Reconfigure the firewall in accordance with best practices.

Answer: B

Explanation:
Section: INFORMATION SECURITY PROGRAM DEVELOPMENT

NEW QUESTION # 383
A validated patch to address a new vulnerability that may affect a mission-critical server has been released. What should be done immediately?

- A. Add mitigating controls.
- B. Take the server off-line and install the patch.
- C. Conduct an impact analysis.
- D. Check the server s security and install the patch.

Answer: C

NEW QUESTION # 384
Which of the following MUST be established to maintain an effective information security governance framework?

- A. Security controls automation
- B. Change management processes
- C. Defined security metrics
- D. Security policy provisions

Answer: D

Explanation:

Security policy provisions are the statements or rules that define the information security objectives, principles, roles and responsibilities, and requirements for the organization. Security policy provisions must be established to maintain an effective information security governance framework, as they provide the foundation and direction for the information security activities and processes within the organization. Security policy provisions also help to align the information security governance framework with the business strategy and objectives, and ensure compliance with relevant laws and regulations. The other options, such as security controls automation, defined security metrics, or change management processes, are important components of an information security governance framework, but they are not essential to establish it.
