

# Updated Nutanix - Reliable NCP-US-6.10 Test Price

BTW, DOWNLOAD part of TestSimulate NCP-US-6.10 dumps from Cloud Storage: [https://drive.google.com/open?id=11\\_7n17ZMezQ-haiqEmaiOQB4d2iRmpJG](https://drive.google.com/open?id=11_7n17ZMezQ-haiqEmaiOQB4d2iRmpJG)

You only need 20-30 hours to learn our NCP-US-6.10 test torrents and prepare for the exam. After buying our NCP-US-6.10 exam questions you only need to spare several hours to learn our NCP-US-6.10 test torrents and commit yourselves mainly to the jobs, the family lives and the learning. Our answers and questions of NCP-US-6.10 Exam Questions are chosen elaborately and seize the focus of the exam so you can save much time to learn and prepare the exam. Because the passing rate is high as more than 98% you can reassure yourselves to buy our NCP-US-6.10 guide torrent.

We aim to leave no misgivings to our customers on our NCP-US-6.10 practice braindumps so that they are able to devote themselves fully to their studies on NCP-US-6.10 guide materials and they will find no distraction from us. I suggest that you strike while the iron is hot since time waits for no one. with the high pass rate as 98% to 100%, you will be sure to pass your NCP-US-6.10 Exam and achieve your certification easily.

## Unlimited NCP-US-6.10 Exam Practice - NCP-US-6.10 Reliable Exam Book

If you get the certificate of an exam, you can have more competitive force in hunting for job, and can double your salary. NCP-US-6.10 exam braindumps of us will help you pass the exam. We have a professional team to research NCP-US-6.10 exam dumps of the exam center, and we offer you free update for one year after purchasing, and the updated version will be sent to your email automatically. If you have any questions about the NCP-US-6.10 Exam Torrent, just contact us.

## Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 Sample Questions (Q92-Q97):

### NEW QUESTION # 92

An administrator has configured a corporate antivirus solution to place virus-infected files into quarantine where clients cannot read or write the files.

Which actions in addition to Rescan and Unquarantine can the administrator perform on the quarantined files?

- A. Alert
- **B. Delete**
- C. Reset
- D. Report

**Answer: B**

Explanation:

For quarantined files in Nutanix Files (via antivirus integration), administrators can:

- \* Rescan: Re-check the file for malware.
- \* Unquarantine: Restore the file if falsely flagged.
- \* Delete: Permanently remove infected files to prevent risks.

Options A/B/C are invalid:

- \* Alert (A): Not a file action; part of notification settings.
- \* Report (B): Generates summaries but doesn't act on files.
- \* Reset (C): No such quarantine function.

Reference:Nutanix Files Antivirus Administration Guide:

"In the quarantine dashboard, administrators can Delete, Rescan, or Unquarantine files. Deletion is irreversible and recommended for confirmed threats."(Chapter: "Managing Quarantined Files") Nutanix Unified Storage Administration (NUSA) Course:

"Critical quarantine actions include Rescan (verify), Unquarantine (restore), and Delete (eradicate)."(Module: "Files Security and Antivirus")

### NEW QUESTION # 93

An administrator has a Nutanix Files deployment hosted on an AHV-based Nutanix cluster, scaled out to four FSVs hosting several department shares. In the event of a ransomware attack, files need to be quickly recovered from a self-hosted snapshot. How can this be accomplished?

- A. Configure a DR Availability Zone.
- **B. Install NGT and enable self-service restore.**
- C. Configure an Async DR Protection Domain.
- D. Use File Analytics to enable self-service restore.

**Answer: B**

Explanation:

Self-Service Restore (SSR) requires Nutanix Guest Tools (NGT) installed on client VMs. SSR allows end users to directly restore files/folders from snapshots via Windows Previous Versions or macOS Time Machine, enabling rapid ransomware recovery without IT intervention.

- \* Option A/C: Async DR and Availability Zones are for disaster recovery (site-level), not granular file recovery.
- \* Option D: File Analytics provides insights but cannot enable restores.

Reference:Nutanix Files Administration Guide:

"Enable Self-Service Restore by installing NGT on client VMs and configuring SSR on SMB shares. Users access snapshots via 'Previous Versions' tab in Windows Explorer."(Chapter: "Self-Service Restore Configuration")Nutanix NCP-US Study Guide:"NGT-based SSR is the primary method for user-driven recovery of snapshots post-ransomware."(Section: "Files Data Protection")

### NEW QUESTION # 94

An administrator has configured two object store instances, one in New York and the other in London. Both object stores are managed by their own Prism Central instances running compatible versions. Availability zone pairing and IAM replication has been configured between Prism Central instances; the implementation requires a common namespace. Which action should the administrator take next?

- A. Create a File System Namespace
- **B. Create a Global Namespace**
- C. Create a Federated Namespace
- D. Create a Kubernetes Namespace

**Answer: B**

Explanation:

To meet the requirement of a common namespace for two Nutanix Objects instances located in New York and London, managed by separate Prism Central instances with availability zone pairing and IAM replication, the administrator should create a Global Namespace. A global namespace in Nutanix Objects allows multiple object store instances to share a unified namespace, enabling consistent access to buckets and objects across geographically distributed sites using a single naming convention.

The Nutanix Unified Storage Administration (NUSA) course explains that "Nutanix Objects supports a global namespace to provide a unified view of buckets across multiple object store instances, which is critical for distributed environments requiring consistent data access." This feature ensures that applications and users can access objects using the same bucket names and paths, regardless of the physical location of the object store (e.g., New York or London). The global namespace is particularly useful in scenarios involving availability zone pairing, where data consistency and accessibility across regions are required.

The Nutanix Certified Professional - Unified Storage (NCP-US) study guide further details that "enabling a global namespace in Nutanix Objects requires configuring the object stores to share a common namespace, which is supported when Prism Central instances are paired for availability zones and IAM replication is enabled." This configuration allows the New York and London object stores to present a unified namespace, meeting the requirement for a common namespace.

The other options are incorrect:

- \* Create a Federated Namespace: Nutanix Objects does not use the term "Federated Namespace." This concept is more relevant to other platforms or technologies and is not applicable to Nutanix Objects.

- \* Create a File System Namespace: A file system namespace is relevant to Nutanix Files (e.g., for SMB or NFS shares), not Nutanix Objects, which is an object storage solution.

- \* Create a Kubernetes Namespace: A Kubernetes namespace is used to organize resources in a Kubernetes cluster and is unrelated to Nutanix Objects or its namespace requirements.

The NUSA course documentation notes that "a global namespace in Nutanix Objects is configured through Prism Central, leveraging availability zone pairing and IAM replication to ensure consistent bucket naming and access across distributed object stores." The administrator should configure the global namespace in the Nutanix Objects settings for both the New York and London instances, ensuring that the Prism Central instances are properly paired and IAM replication is active.

### NEW QUESTION # 95

An administrator would like to load balance an SMB share across multiple FSVMs.

What feature should the administrator enable to accomplish this?

- A. Disaster Recovery
- B. Multiple Copies
- C. High Availability
- **D. Distributed**

**Answer: D**

Explanation:

In Nutanix Files, SMB load balancing across multiple File Server VMs (FSVMs) is achieved by enabling the Distributed configuration. When the distributed option is enabled for a share, the file service can actively balance the load across multiple FSVMs, optimizing performance and client access.

The NUSA course states:

"The Distributed option for SMB shares allows load balancing of client connections across multiple FSVMs.

This improves performance and ensures more efficient use of resources." The other options (Disaster Recovery, Multiple Copies, High Availability) are related to resilience and data protection but not directly to load balancing of SMB shares.

### NEW QUESTION # 96

Refer to the exhibit:

...

```
192.168.5.1> get-smbclient configuration
ConnectionCountPerRssNetworkInterface: 4
DirectoryCacheEntriesMax: 16
DirectoryCacheEntrySizeMax: 65536
```

```
DirectoryCacheLifetime: 10
EnableBandwidthThrottling: True
EnableByteRangeLockingOnReadOnlyFiles: True
EnableLargeMtu: True
EnableMultiChannel: True
DormantFileLimit: 1023
EnableSecuritySignature: True
ExtendedSessionTimeout: 1000
EnableSecuritySignature: True
ExtendedSessionTimeout: 1000
FileInfoCacheEntriesMax: 64
FileInfoCacheLifetime: 10
FileNotFoundCacheEntriesMax: 128
FileNotFoundCacheLifetime: 5
KeepConn: 600
MaxCmds: 50
MaximumConnectionCountPerServer: 32
OplocksDisabled: False
RequireSecuritySignature: True
SessionTimeout: 60
UseOpportunisticLocking: True
WindowSizeThreshold: 1
...
```

An administrator is unable to browse a share and runs the `'get-smbclient configuration'` command. What is a possible cause of the problem indicated by the `'RequireSecuritySignature'` line?

- A. AD is enabled
- **B. Kerberos is enabled**
- C. TLS is enabled
- D. CHAP is enabled

**Answer: B**

Explanation:

The exhibit shows the output of the `'get-smbclient configuration'` command on a Nutanix Files system, with the line `'RequireSecuritySignature: True'` highlighted as a potential cause for the administrator's inability to browse an SMB share. The setting `'RequireSecuritySignature: True'` indicates that the SMB client requires security signatures (also known as SMB signing) for all SMB communications, which ensures data integrity and authenticity. A possible cause of the browsing issue related to this setting is that **Kerberos is enabled**, as Kerberos authentication is often required when SMB signing is enforced, especially in Active Directory (AD) environments.

The **Nutanix Unified Storage Administration (NUSA)** course explains that "in Nutanix Files, when `'RequireSecuritySignature'` is set to True, SMB signing is mandatory, and this often relies on Kerberos authentication to provide the necessary security tokens for signing SMB packets." Kerberos is the default authentication protocol in AD environments, and Nutanix Files integrates with AD for SMB share access. If the client attempting to browse the share does not support Kerberos or has issues with Kerberos authentication (e.g., misconfigured AD, time sync issues, or lack of domain credentials), the SMB connection may fail, resulting in the inability to browse the share.

The **Nutanix Certified Professional - Unified Storage (NCP-US)** study guide further elaborates that "enabling `'RequireSecuritySignature'` in Nutanix Files often requires Kerberos authentication to be properly configured, as SMB signing uses Kerberos tickets to secure communication, and mismatches in Kerberos settings can prevent share access." The administrator should verify that the client is domain-joined, Kerberos is functioning correctly (e.g., by checking time sync between the client, Nutanix Files, and the AD domain controller), and that the necessary Kerberos tickets are available.

The other options are incorrect:

- **AD is enabled**: While AD is typically enabled in environments where SMB signing and Kerberos are used, simply enabling AD does not directly cause the issue. The problem is more specifically tied to Kerberos, which is the authentication mechanism AD uses.
- **TLS is enabled**: TLS (Transport Layer Security) is not directly related to SMB signing. SMB signing operates at the SMB protocol level, while TLS would apply to network-layer encryption, which is not indicated in the configuration output.
- **CHAP is enabled**: CHAP (Challenge-Handshake Authentication Protocol) is used for protocols like iSCSI or PPP, not SMB, and is irrelevant to this issue.

The NUSA course documentation emphasizes that "if `'RequireSecuritySignature'` is enabled and users cannot browse SMB shares, administrators should check Kerberos authentication settings, as mismatches or failures in Kerberos can prevent successful SMB

connections." References:

- Nutanix Unified Storage Administration (NUSA) Course, Section on Nutanix Files: "Troubleshooting SMB share access with security signatures."
- Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Topic 4: Troubleshoot Nutanix Unified Storage, Subtopic: "Diagnosing SMB connection issues with 'RequireSecuritySignature'."
- Nutanix Documentation (<https://www.nutanix.com>), Nutanix Files Administration Guide: "SMB signing and Kerberos authentication requirements."

## NEW QUESTION # 97

.....

As the captioned description said, our NCP-US-6.10 practice materials are filled with the newest points of knowledge about the exam. With many years of experience in this line, we not only compile real test content into our NCP-US-6.10 practice materials, but the newest in to them. Allowing for there is a steady and growing demand for our NCP-US-6.10 practice materials with high quality at moderate prices, we never stop the pace of doing better. All newly supplementary updates will be sent to your mailbox one year long. And we shall appreciate it if you choose any version of our NCP-US-6.10 practice materials for exam and related tests in the future.

**Unlimited NCP-US-6.10 Exam Practice:** <https://www.testsimulate.com/NCP-US-6.10-study-materials.html>

Once you get the Nutanix Unlimited NCP-US-6.10 Exam Practice Unlimited NCP-US-6.10 Exam Practice - Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 dump torrent certification, your life and your career will be bright, If examinees pay close attention to our latest NCP-US-6.10 training materials our high-quality products assist you to master more about real test and keep good mood in real test, You will need authentic Nutanix NCP-US-6.10 exam preparation material if you want to take the Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 exam to expand your career opportunities.

This lesson walks you through some advanced scripts that are used in real NCP-US-6.10 production environments to reach specific results, TestSimulate is an IT exam practice training provider with good reputation in IT industry.

## Quiz 2026 The Best Nutanix NCP-US-6.10: Reliable Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 Test Price

Once you get the Nutanix Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 dump torrent NCP-US-6.10 Reliable Exam Book certification, your life and your career will be bright, If examinees pay close attention to our latest NCP-US-6.10 Training Materials our high-quality products assist you to master more about real test and keep good mood in real test.

You will need authentic Nutanix NCP-US-6.10 exam preparation material if you want to take the Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 exam to expand your career opportunities, With the Nutanix NCP-US-6.10 pdf questions you can experience the type and pattern of the final NCP-US-6.10 exam.

We believe that variety is key when it comes to Nutanix NCP-US-6.10 exam preparation, and that's why we offer three formats that cater to different learning styles and preferences.
