Real SAP C_TS414_2023 Exam Questions with Accurate Answers

With the pass rate reaching 98.65%, our C_TS414_2023 training materials have gained popularity in the international market. If you

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q66-Q71):

NEW QUESTION # 66

A quality info record is released for the purchase of a material from a supplier. In what ways can you restrict the release? Note: There are 2 correct answers to this question.

- A. To a period of time, by supplying a release date
- B. To a quantity, by entering a release quantity
- C. Until the supplier quality score is better than a threshold, by entering the minimum threshold
- D. Until the supplier has provided a quality certificate, by entering a certificate type

Answer: B,D

Explanation:
The quality info record: Procurement (transaction QI01/QI02) manages supplier-material relationships and can impose release restrictions:
* To a Quantity, by Entering a Release Quantity (A): In the quality info record, you can set a "Release Quantity" field to limit the approved purchase quantity (e.g., 100 units). Once exceeded, further approval is needed, a standard feature.
* Until the Supplier Has Provided a Quality Certificate, by Entering a Certificate Type (B): You can specify a certificate type (e.g., "ISO 9001") in the "Certificate" field, blocking release until the supplier provides it, verified during goods receipt.
* To a Period of Time, by Supplying a Release Date (C): While validity dates exist, they define the record's lifespan, not a specific release restriction mechanism.
* Until the Supplier Quality Score is Better Than a Threshold (D): Quality scores influence supplier evaluation but aren't directly set as a release condition in the info record.
Thus, "A" and "B" are the correct answers, reflecting standard SAP QM functionality.References: SAP Help Portal - "Quality Info Record: Procurement"; SAP S/4HANA QM User Guide - "Supplier Release".

NEW QUESTION # 67

You want to use a purchasing process with release stages (for example, first-article, preliminary series, regular procurement) and different inspection plan: for each stage.How do you configure this process?
