Actual 010-160 Exam Prep Materials is The Best Choice for You

It is well known that Lpi certification plays a big part in the IT field and obtaining it means you have access to the big companies and recognized by the authority. But the reality is that the 010-160 Braindumps torrents are very difficult and the pass rate of 010-160 practice test is low. So choosing our exam training materials are very necessary to every candidate.

Lpi Linux Essentials Certificate Exam - version 1.6 Sample Questions (Q48-Q53):

NEW QUESTION # 48
Which of the following permissions are set on the /tmp/ directory?

- A. rwSrw-rw-
- B. rwxrwxrwt
- C. r-xr-X--t

- D. ------rwX
- E. rwxrwS---

Answer: B

Explanation:
Explanation
The correct permissions for the /tmp directory are rwxrwxrwt, which means that the owner, group, and others have read, write, and execute permissions, and that the sticky bit is set. The sticky bit is a special permission that prevents users from deleting or renaming files that they do not own in a shared directory. The /tmp directory is used for storing temporary files that may be created by different users and processes, so it needs to be accessible and writable by all, but also protected from unauthorized deletion or modification of files. The rwxrwxrwt permissions can be set by using the chmod command with either the octal mode 1777 or the symbolic mode a+trwx. References: : [File system permissions] : [Sticky bit] : [chmod]

NEW QUESTION # 49
What is the preferred source for the installation of new applications in a Linux based operating system?

- A. A CD-ROM disk
- B. The vendor's website
- C. A retail store
- D. The distribution's package repository
- E. The vendor's version management system

Answer: D

Explanation:

NEW QUESTION # 50
Which of the following commands will search for the filefoo.txtunder the directory/home?

- A. find /home -name foo.txt
- B. search/home foo. txt
- C. find /home - file foo.txt
- D. search /home -file foo.txt
- E. find /home foo.txt

Answer: A

NEW QUESTION # 51
Which of the following commands creates an archive file work.tarfrom the contents of the directory ./
work/?

- A. tar -create work.tgz -content ./work/
- B. tar -cf work.tar ./work/
- C. tar --new work.tar ./work/
- D. tar work > work.tar
- E. tar work.tar < ./work/

Answer: B

NEW QUESTION # 52
What parameter of ls prints a recursive listing of a directory's content? (Specify ONLY the option name without any values or parameters.)

Answer:

Explanation:

lsR

Explanation:

The -R parameter of the ls command prints a recursive listing of a directory's content, meaning that it will list not only the files and directories in the current directory, but also the files and directories in all the subdirectories12. For example, if you have a directory structure like this:

/home/user/ ├── dir1 │ ├── file1 │ └── file2 └── dir2 ├── file3 └── file4 You can use the command ls -R /home/user/ to list all the files and directories recursively, and the output will look like this:

/home/user/: dir1 dir2

/home/user/dir1: file1 file2

/home/user/dir2: file3 file4

The -R parameter is also known as the --recursive option, which is the long form of the same parameter12. You can use either -R or --recursive to achieve the same result.
