

The Open Group - OGEA-101 High Hit-Rate Exam Braindumps

DOWNLOAD the newest TestsDumps OGEA-101 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1CAWmi-US6FIUkdGKQCHtQSy8dznqbTpc>

We know that consumers want to have a preliminary understanding of the product before buying it. So, before you buy our OGEA-101 exam braindumps, we will offer you three different versions of the trial. They are free demos. At the same time, the installation and use of our OGEA-101 Study Materials is very safe and you don't need to worry about viruses. We will also protect your personal privacy sufficiently. And we will give you the best service on our OGEA-101 practice engine.

Having a The Open Group OGEA-101 certification can enhance your employment prospects, and then you can have a lot of good jobs. TestsDumps is a website very suitable to candidates who participate in the The Open Group certification OGEA-101 exam. TestsDumps can not only provide all the information related to the The Open Group Certification OGEA-101 Exam for the candidates, but also provide a good learning opportunity for them. TestsDumps be able to help you pass The Open Group certification OGEA-101 exam successfully.

Vce OGEA-101 File, OGEA-101 Exam Success

Knowledge is defined as intangible asset that can offer valuable reward in future, so never give up on it and our OGEA-101 exam preparation can offer enough knowledge to cope with the exam effectively. To satisfy the needs of exam candidates, our experts wrote our OGEA-101 practice materials with perfect arrangement and scientific compilation of messages, so you do not need to study other OGEA-101 training questions to find the perfect one anymore.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which of the following best describes the need for the ADM process to be governed?

- A. To enable development of reference architectures
- B. To enable a fast response to market changes
- C. To verify that the method is being applied correctly
- D. To permit the architecture domains to be integrated

Answer: C

Explanation:

According to the TOGAF standard, the need for the ADM process to be governed is to ensure that the architecture development and implementation activities are conducted in a consistent, coherent, and compliant manner¹. Governance provides the means to verify that the method is being applied correctly and effectively, and that the architecture deliverables and artifacts meet the quality and standards criteria¹. Governance also enables the management of risks, issues, changes, and dependencies that may arise during the ADM process¹.

Some of the benefits of governing the ADM process are²:

- *Improved alignment of the architecture with the business strategy and objectives
 - *Enhanced stakeholder engagement and communication
 - *Increased reuse and integration of architecture assets and resources
 - *Reduced complexity and duplication of architecture efforts
 - *Increased agility and adaptability of the architecture to changing needs and requirements
 - *Improved compliance and auditability of the architecture outcomes and outputs
- References: 1: Architecture Governance 2: Architecture Governance Benefits

NEW QUESTION # 68

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission

The joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture.

A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle

A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.

Which deliverables match these descriptions?

- A. 1 Architecture Requirements Specification -2 Architecture Principles - 3 Architecture Vision - 4 Architecture Contracts
- B. 1 Architecture Principles -2 Architecture Contracts - 3 Architecture Requirements Specification-4 Request for Architecture Work Explanation:
- C. 1 Architecture Principles -2 Architecture Contracts - 3 Request for Architecture Work - 4 Architecture Requirements Specification
- D. 1 Architecture Contracts - 2 Architecture Requirements Specification - 3 Architecture Vision - 4 Architecture Principles

Answer: C

Explanation:

According to the TOGAF standard, the deliverables that match the descriptions are as follows:

1 Architecture Principles: These are general rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission¹. They reflect a level of consensus among the various elements of the enterprise, and form the basis for making future IT decisions¹.

2 Architecture Contracts: These are the joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture². They are used to ensure that the architecture is implemented and governed according to the agreed-upon specifications and standards².

3 Request for Architecture Work: This is a document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle³. It defines the scope, schedule, budget, deliverables, and stakeholders of the architecture project³.

4 Architecture Requirements Specification: This is a set of quantitative statements that outline what an implementation project must do in order to comply with the architecture⁴. It defines the requirements for each architecture domain, as well as the relationships and dependencies among them⁴.

1: Architecture Principles 2: Architecture Contracts 3: Request for Architecture Work 4: Architecture Requirements Specification

NEW QUESTION # 69

Within the Architecture Repository, what does the class of information known as the Architecture Capability include?

- A. The organization-specific architecture framework, including a method for architecture development and a metamodel for architecture content.
- **B. Parameters, structures, and processes to support governance of the repository.**
- C. A record of the governance activity across the enterprise.
- D. Patterns, templates, and guidelines used to create new architectures.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From documents:

The Architecture Repository in TOGAF provides a structured model for storing architectural output. It contains six classes of architectural information:

- * Architecture Metamodel - defines the structure of architectural content and relationships.
- * Architecture Capability - contains parameters, structures, and processes supporting the governance of the repository and the Architecture Board.
- * Architecture Landscape - architectural views at different levels (Strategic, Segment, Capability).
- * Standards Information Base (SIB) - standards to guide architecture development and solution building.
- * Reference Library - reference materials such as patterns, templates, guidelines.
- * Governance Log - record of governance activity, compliance assessments, waivers, and approvals.

Focusing on Architecture Capability:

- * Defined by TOGAF as: "The parameters, structures, and processes that support governance of the Architecture Repository."
- * It provides the framework for ensuring that the repository is managed, controlled, and aligned with the enterprise's architecture governance practices.
- * It includes organizational roles, responsibilities, and processes that ensure architecture practices are sustainable and repeatable.

Why the other options are incorrect:

- * B. This describes the Architecture Metamodel, not Architecture Capability.
- * C. This describes the Governance Log, which holds the record of governance activity.
- * D. This describes the Reference Library, which contains patterns, templates, and guidelines.

References (official TOGAF materials, no links):

- * The Open Group, TOGAF Standard, Version 9.2, Part V: Enterprise Continuum and Tools - Architecture Repository.
- * The Open Group, TOGAF 9 Certified Study Guide - detailed breakdown of the six classes in the Architecture Repository and their purpose.

NEW QUESTION # 70

What is defined as the effect of uncertainty on objectives?

- A. Vulnerability
- B. Continuity
- **C. Risk**
- D. Threat

Answer: C

Explanation:

Risk is defined as the effect of uncertainty on objectives, according to the ISO 31000 standard, which provides principles and guidelines for risk management¹. Risk can be positive or negative, depending on whether the uncertainty affects the achievement or the failure of the objectives. Risk can also be expressed in terms of likelihood and impact, which indicate the probability and the consequence of the risk occurrence. Risk management is the coordinated activities to direct and control an organization with regard to risk. Risk management is an integral part of the TOGAF standard, as it helps to identify, assess, and treat the risks that may affect the architecture development and implementation². Reference: 1: ISO 31000:2018, Risk management - Guidelines, Clause 3.1 2: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 32: Risk Management

NEW QUESTION # 71

Which statement best describes the main purpose of the TOGAF Content Framework?

- A. To prevent gaps in the target architecture deliverable set.
- B. To store the artifacts identified in the Architecture Repository.
- **C. To drive consistency in the outputs when following the ADM.**
- D. To address IT system concerns relevant to an enterprise.

Answer: C

Explanation:

The TOGAF Content Framework exists to give a detailed model of architectural work products-including deliverables, the artifacts within them, and the architectural building blocks those artifacts represent. The fundamental intent of embedding a Content Framework in TOGAF is to drive greater consistency in the outputs produced when following the Architecture Development Method (ADM). That means regardless of who is doing the architecture work, or in which phase of ADM, the types of outputs, their structure, classification (deliverable # artifact # building block), naming, and relationships remain consistent across the organisation. This structured model ensures that architecture work is systematic, standardised, and comparable across different projects or cycles. It is not primarily a mechanism for storage (that's the role of the repository), nor is it only about addressing IT concerns or preventing gaps - its primary purpose is standardising architecture outputs to support clear communication, reuse, and governance across the enterprise

NEW QUESTION # 72

.....

We offer money back guarantee if anyone fails but that doesn't happen if one uses our OGEA-101 dumps. These OGEA-101 exam dumps are authentic and help you in achieving success. Do not lose hope and only focus on your goal if you are using TestsDumps OGEA-101 PDF. It is a package of OGEA-101 braindumps that is prepared by the proficient experts. These OGEA-101 Exam Questions dumps are of high quality and are designed for the convenience of the candidates. These are based on the OGEA-101 Exam content that covers the entire syllabus. The OGEA-101 practice test content is very easy and simple to understand.

Vce OGEA-101 File: https://www.testsdumps.com/OGEA-101_real-exam-dumps.html

You will only spend dozens of money and 20-30 hours' preparation on our OGEA-101 test questions, passing exam is easy for you, With over ten years' dedication to research and development, our OGEA-101 exam study material is grounded on the realities of those candidates, concentrating on communication with our customers, Some customers might have the fear that the rapid development of information will infringe on the learning value of our The Open Group Vce OGEA-101 File Vce OGEA-101 File - TOGAF Enterprise Architecture Part 1 Exam valid study guide.

Our team of professionals is also well-versed with the standards of organizations OGEA-101 conducting and offering IT certification exams, You can mix all three kinds together in the same layout, and Easy CD Creator takes care of the rest.

In-depth of Questions The Open Group OGEA-101 Exam Braindumps

You will only spend dozens of money and 20-30 hours' preparation on our OGEA-101 Test Questions, passing exam is easy for you, With over ten years' dedication to research and development, our OGEA-101 exam study material is grounded on the realities of those candidates, concentrating on communication with our customers.

Some customers might have the fear that the rapid development of information OGEA-101 Reliable Exam Pdf will infringe on the learning value of our The Open Group TOGAF Enterprise Architecture Part 1 Exam valid study guide, If you have no choice, do the best.

We ensure you that our latest exam study guide will provide you the key points and the latest question types you need for the OGEA-101 exam files, and with these useful study materials, Reliable OGEA-101 Exam Practice only practice 20 to 30 hours, you can surely pass the IT exam and gain the IT certification.
