ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q91-Q96):

NEW QUESTION # 91
To set up a group for selection in a resource plan, the group record needs to include which role?

- A. it_project_user
- B. itil
- C. resource_manager
- D. pps_resource

Answer: D

Explanation:
According to the Assigning Resource Roles document, to set up a group for selection in a resource plan, the group record needs to include the pps_resource role. This role grants access to the Resource Management application and allows the group members to view and update their resource allocations. The other options are not correct, as they are not required for a group to be selected in a resource plan. The it_project_user role grants access to the Project Portfolio Management application and allows the user to create and update projects. The itil role grants access to the ITIL application and allows the user to manage incidents, problems, and changes. The resource_manager role grants access to the Resource Management application and allows the user to manage resource plans and allocations.

NEW QUESTION # 92
If a sub-project and parent project have different project currencies, this property should be set to true for cost roll-ups.

- A. com.snc.project.rollup_project_start_date
- B. com.snc.project.multicurrency.rollup_if_different

- C. com.snc.project.calculate_roi
- D. com.snc.project.copy.additional_attributes

Answer: B

Explanation:
According to the ServiceNow documentation1, this property controls whether the cost roll-ups are performed when a sub-project and parent project have different project currencies. If this property is set to true, then the system converts the sub-project currency to the parent project currency using the exchange rate table and performs the cost roll-ups. If this property is set to false, then the system does not perform the cost roll-ups for sub-projects with different currencies.

NEW QUESTION # 93
Use this table to configure the parameters displayed on a project card on the My Projects Space page of the Project Workspace.

- A. pm_project
- B. pm_home_page_config
- C. project_template_config
- D. pm_toplevel_project

Answer: B

Explanation:
According to the ServiceNow documentation1, the pm_home_page_config table is used to configure the parameters displayed on a project card on the My Projects Space page of the Project Workspace. The other tables are used for different purposes:
pm_project: Stores information about projects2.
pm_toplevel_project: Stores information about top-level projects3.
project_template_config: Stores information about project templates.

NEW QUESTION # 94
Which statement defines the Project Workspace?

- A. A central location for viewing and assessing business demands
- B. A central location to view of all projects in a portfolio to prioritize work
- C. A central location transform the navigation of lists and forms into an interactive graphical experience
- D. A central location for creating and managing projects

Answer: D

Explanation:
Explanation
According to the ServiceNow documentation1, the Project Workspace is a central location for creating and managing projects. It provides a graphical interface that allows users to view and edit project information, such as tasks, resources, risks, issues, and dependencies. The Project Workspace also enables users to collaborate with team members and stakeholders, track project progress, and generate reports.
The other options are incorrect because:
A: A central location to view of all projects in a portfolio to prioritize work: This describes the Portfolio Workbench, not the Project Workspace2.
C: A central location transform the navigation of lists and forms into an interactive graphical experience: This describes the Lens, not the Project Workspace3.
D: A central location for viewing and assessing business demands: This describes the Demand Workbench, not the Project Workspace.

NEW QUESTION # 95

A program is a container for the following except for:

- A. Issues
- B. Program tasks
- C. Cost plans
- D. Portfolios

Answer: D

Explanation:
According to the ServiceNow documentation1, a program is a container for the following:
Program tasks: Tasks that define the scope and deliverables of the program2.
Issues: Problems that affect the program or its outcome3.
Cost plans: Plans that estimate the cost of the program and its components4.
A portfolio is not a part of a program, but rather a collection of programs and projects that are aligned with a strategic goal or objective.
