Cisco 300-710 Braindumps | 300-710 New Practice Materials

We keep a close watch at the most advanced social views about the knowledge of the test Cisco certification. Our experts will renovate the test bank with the latest 300-710 study materials and compile the latest knowledge and information into the questions and answers. In the answers, our experts will provide the authorized verification and detailed demonstration so as to let the learners master the latest information timely and follow the trend of the times. All we do is to integrate the most advanced views into our 300-710 Study Materials.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q125-Q130):

NEW QUESTION # 125

What is the disadvantage of setting up a site-to-site VPN in a clustered-units environment?

- A. VPN connections must be re-established when a new master unit is elected.
- B. Smart License is required to maintain VPN connections simultaneously across all cluster units.
- C. VPN connections can be re-established only if the failed master unit recovers.
- D. Only established VPN connections are maintained when a new master unit is elected.

Answer: A

Explanation:

Section: Configuration

Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/security/firepower/foxos/clustering/ftd-cluster-solution.html#concept_g32_yml_y2b

NEW QUESTION # 126

An administrator is adding a new URL-based category feed to the Cisco FMC for use within the policies. The intelligence source does not use STIX, but instead uses a .txt file format. Which action ensures that regular updates are provided?

- A. Add a TAXII feed source and input the URL for the feed.
- B. Add a URL source and select the flat file type within Cisco FMC.
- C. Upload the .txt file and configure automatic updates using the embedded URL.
- D. Convert the .txt file to STIX and upload it to the Cisco FMC.

Answer: A

NEW QUESTION # 127

Which command should be used on the Cisco FTD CLI to capture all the packets that hit an interface?

- A. capture
- B. capture WORD
- C. capture-traffic
- D. configure coredump packet-engine enable

Answer: C

Explanation:

Section: Management and Troubleshooting

Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/security/firepower/command_ref/b_Command_Reference_for_Firepower_Threat_Defense/ac_1.html

NEW QUESTION # 128

What is a valid Cisco AMP file disposition?

- A. non-malicious
- B. known-good
- C. malware
- D. pristine

Answer: C

Explanation:

Section: Integration

Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/security/firepower/60/configuration/guide/fpmc-config-guide-v60/Reference_a_wrapper_Chapter_topic_here.html

NEW QUESTION # 129

A network administrator wants to configure a default policy to block malicious sites based on the requested URL lookup. Which feature meets the requirement?

- A. malware policies
- B. DNS policies
- C. URL filtering policies
- D. file policies

Answer: C

Explanation:

URL filtering allows control over website access based on the URL's category and reputation, which includes blocking malicious or risky sites by inspecting the requested URL.

This feature can use category and reputation-based filtering to automatically block URLs classified as malicious or high risk, fulfilling
