Best PTC-AMCA Preparation Materials & PTC-AMCA Reliable Test Blueprint

The client can try out and download our PTC-AMCA training materials freely before their purchase so as to have an understanding of our product and then decide whether to buy them or not. The website pages of our product provide the details of our PTC-AMCA learning questions. You can see the demos which are part of the all titles selected from the test bank and the forms of the questions and answers and know the form of our software on the website pages of our PTC-AMCA study materials.

Medical Technology AMCA Phlebotomy Technician Certification Exam Sample Questions (Q128-Q133):

NEW QUESTION # 128

Which of the following is NOT a cause of vein collapse?

- A. Stoppage of blood flow on tourniquet removal
- B. Vacuum draw of the tube
- C. Frequent venipunctures
- D. Tourniquet too close to the venipuncture site

Answer: A

Explanation:

A collapsed vein may result from the vacuum draw of the tube, pressure from pulling on the syringe, or if the tourniquet is too tight or too close to the venipuncture site. Frequent venipunctures, whether to draw blood or inject medications, can also cause veins to collapse. Stoppage of blood flow when the tourniquet is removed may simply indicate that the needle is not positioned properly slightly adjusting the needle usually reestablishes blood flow.

NEW QUESTION # 129

The abbreviation for the thyroid hormone triiodothyronine is:

- A. TSH
- B. T3
- C. T4
- D. TBG

Answer: B

Explanation:

The abbreviation for the thyroid hormone triiodothyronine is T3. It is the active form of thyroxine. The T₃ level increases with hyperthyroidism and decreases with hypothyroidism. T4 is the abbreviation for thyroxine; TSH is thyroid stimulating hormone; and TBG is thyroxine-binding globulin. Orders for tests with similar abbreviations should always be double-checked to ensure that the correct blood sample is obtained and the correct test is conducted.

NEW QUESTION # 130

When carrying out a rapid test for group A streptococci from a throat swab, if there is no blue control line on the dipstick at 5 minutes, the test is:

- A. Positive
- B. Invalid
- C. Inconclusive
- D. Negative

Answer: B

Explanation:

When carrying out a rapid test for group A streptococci from a throat swab, if there is no blue control line on the dipstick at 5 minutes, the test is invalid, possibly because the dipstick is outdated. For the test a tube is filled with three drops each of reagents A and B and the swab is placed into the tube for 1 minute and rotated at least five times before removal. The dipstick is then placed in the tube for 5 minutes. The blue control line must appear within 5 minutes for a valid test. A positive finding is a pink or purple test line.

NEW QUESTION # 131

Which pattern of antecubital veins is predominant in most populations?

- A. The Y pattern

- **B. The H pattern**
- C. An atypical pattern
- D. The M pattern

Answer: B

Explanation:

The pattern of antecubital veins that is predominant in most populations is the H pattern, also known as the N pattern. The veins that are most prominent in the H pattern include the cephalic, median cubital, and basilic veins. The veins that are most prominent in the M pattern, also known as the Y pattern, include the cephalic, median cephalic, median basilic, and basilic veins. Although these two patterns are the most common, some patients have atypical patterns of veins rather than the H or M configuration.

NEW QUESTION # 132

A blood specimen for a CBC should be collected in a tube that contains:

- **A. EDTA**
- B. ACD
- C. No additive
- D. Clot activator

Answer: A

Explanation:

A blood specimen for a CBC should be collected in a tube that contains EDTA (an anticoagulant). The CBC is performed on whole blood. The evacuated collection tube is lavender-capped and should be inverted at least 8 times after the specimen is collected to ensure that the sample is adequately anticoagulated because even small clots render the specimen unusable. The CBC includes Hgb (hemoglobin), Hct (hematocrit), RBC, RBC indices, WBC count and differential, and platelet count.

NEW QUESTION # 133

.....

There may be customers who are concerned about the installation or use of our PTC-AMCA training questions. You don't have to worry about this. In addition to high quality and high efficiency, considerate service is also a big advantage of our company. We will provide 24 - hour online after-sales service to every customer. If you have any questions about installing or using our PTC-AMCA Real Exam, our professional after-sales service staff will provide you with warm remote service. As long as it is about our PTC-AMCA learning materials, we will be able to solve. Whether you're emailing or contacting us online, we'll help you solve the problem as quickly as possible. You don't need any worries at all.
