(continued on the next page)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) midrange storage systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring, and supporting Hitachi midrange storage systems at customer sites. This includes strong knowledge of the system hardware and a thorough understanding of installation and configuration procedures. The test also covers basic storage management activities and the tools, techniques and best practices related to supporting and servicing the Hitachi VSP midrange family.

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP midrange storage installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of Hitachi midrange storage solutions implementation. They perform pre-installation checks and install, configure, and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1 System architecture	
1.1	Describe the different VSP midrange storage systems models and their specifications.
1.2	Describe the VSP midrange storage systems architecture, internal components, and their functions.
Section 2 Back-end architecture	
2.1	Describe the back-end architecture of VSP midrange storage systems.
2.2	Describe the back-end hardware components of VSP midrange storage systems.
2.3	Describe the VSP midrange storage systems drive sparing technology and concepts.
Section 3 System installation	
3.1	Identify the VSP midrange storage systems documentation.
3.2	Describe the "New Installation" procedure for VSP midrange storage systems and when it is appropriate to use.
3.3	Describe the installation and initial configuration procedures for VSP midrange storage systems.
3.4	Describe how program products are enabled on VSP midrange storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.
