P.S. Free 2026 NCLEX NCLEX-RN dumps are available on Google Drive shared by PassLeader: https://drive.google.com/open?id=1yf--86ie1hDLy8WTIv9NBbDu9E_B1Vvi

You may be upset about the too many questions in your NCLEX-RN test preview. Now, you will clear your worries. Our NCLEX-RN test engine can allow unlimited practice your exam. With the options to highlight the missed questions, you can know your mistakes in your NCLEX-RN test training, then, you can practice with purpose. If you want to have 100% confidence, you can practice until you get right. Besides, you can do marks where possible, so as to review and remember next time. Through effort and practice, you can get high scores in your NCLEX NCLEX-RN real test.

NCLEX-RN exam is computer-adaptive, which means that the difficulty level of the questions is adjusted based on the test-taker's performance. The test consists of multiple-choice questions, with some questions including multimedia components such as videos, charts, and graphics. NCLEX-RN exam covers four major categories: safe and effective care environment, health promotion and maintenance, psychosocial integrity, and physiological integrity.

NCLEX-RN exam is a critical step in the process of becoming a registered nurse. It is a comprehensive exam that assesses the candidate's knowledge and skills in various areas of nursing practice. Passing NCLEX-RN Exam is a requirement for licensure in the United States and Canada, and it is essential for ensuring that nurses provide safe and effective care to their patients.

Test NCLEX-RN Quiz, New NCLEX-RN Dumps Ebook

Our NCLEX-RN real exam helps you not only to avoid all the troubles of learning but also to provide you with higher learning quality than other students'. At the same time, our NCLEX-RN exam materials have been kind enough to prepare the App version for you, so that you can download our NCLEX-RN practice prep to any electronic device, and then you can take all the learning materials with you and review no matter where you are.

NCLEX-RN exam is a critical milestone in a registered nurse's career. Passing the exam is an essential step towards obtaining a nursing license and beginning a career in the healthcare industry. NCLEX-RN Exam is designed to ensure that nurses possess the necessary knowledge and skills to provide safe and effective care to patients, making it an essential component of the nursing profession.

NCLEX National Council Licensure Examination(NCLEX-RN) Sample Questions (Q654-Q659):

NEW QUESTION # 654

Based on your knowledge of genetic inheritance, which of these statements is true for autosomal recessive genetic disorders?

- A. Only females are affected.
- B. Heterozygotes are affected.
- C. The disorder is always carried on the X chromosome.
- **D. Two affected parents always have affected children.**

Answer: D

Explanation:

(A) The term heterozygote refers to an individual with one normal and one mutant allele at a given locus on a pair of homologous chromosomes. An individual who is heterozygous for the abnormal gene does not manifest obvious symptoms. (B) Disorders carried on either the X or Y sex chromosome are referred to as sex-linked recessive. (C) Either sex may be affected by autosomal recessive genetic disorders because the responsible allele can be on any one of the 46 chromosomes. (D) If both parents are affected by the disorder and are not just carriers, then all their children would manifest the same disorder.

NEW QUESTION # 655

The nurse would expect to include which of the following when planning the management of the client with Lyme disease?

- **A. Tetracycline treatment**
- B. High-protein diet with limited fluids
- C. IV amphotericin B
- D. Complete bed rest for 6-8 weeks

Answer: A

Explanation:

Explanation

(A) The client is not placed on complete bed rest for 6 weeks. (B) Tetracycline is the treatment of choice for children with Lyme disease who are over the age of 9. (C) IV amphotericin B is the treatment for histoplasmosis. (D) The client is not restricted to a high-protein diet with limited fluids.

NEW QUESTION # 656

Because a client is taking an MAO inhibitor, it is necessary to discuss the need for adherence to a low- tyramine diet. Which of the following are foods that she should avoid?

- A. Fresh vegetables
- B. Fresh fruit such as apples and oranges
- **C. Pickled, aged, smoked, and fermented foods**
- D. Broiled fresh fish and fowl

Answer: C

Explanation:

Explanation/Reference:

Explanation:

(A) These foods may produce elevation in blood pressure when consumed during MAO inhibition therapy.

(B) These foods have not been pickled, fermented, smoked, or aged. They contain very little, if any, tyramine or tryptophan. (C) As long as the meat has not been aged or smoked, it is within the dietary regimen. (D) Fresh fruits can be consumed as desired. However, the consumption of bananas is limited.

NEW QUESTION # 657

Assessment of severe depression in a client reveals feelings of hopelessness, worthlessness; inability to feel pleasure; sleep, psychomotor, and nutritional alterations; delusional thinking; negative view of self; and feelings of abandonment. These clinical features of the client's depression alert the nurse to prioritize problems and care by addressing which of the following problems first:

- A. Impaired thinking
- **B. Possible harm to self**
- C. Rest and activity impairment
- D. Nutritional status

Answer: B

Explanation:

Explanation

(A) Anorexia and weight loss are problems that need attention in severe depression, but they can be addressed secondary to immediate concerns. (B) Impaired thinking and confusion are problems in severe depression that are addressed with administration of medication, through group and individual psychotherapy, and through activity therapy as motivation and interest increase. (C) Possible harm to self as with suicidal ideation; a suicide plan, means to execute plan; and/or overt gestures or an attempt must be addressed as an immediate concern and safety measures implemented appropriate to the risk of suicide. (D) Rest and activity impairment may take time and further assessment to determine client's sleep pattern and amount of psychomotor retardation with the more immediate concern for safety present.

NEW QUESTION # 658

A female client at 30 weeks' gestation is brought into the emergency department after falling down a flight of stairs. On examination, the physician notes a rigid, boardlike abdomen; FHR in the 160s; and stable vital signs. Considering possible abdominal trauma, which obstetric emergency must be anticipated?

- **A. Abruptio placentae**
- B. Placenta previa
- C. Ectopic pregnancy
- D. Massive uterine rupture

Answer: A

Explanation:

(A) Abruptio placentae, the complete or partial separation of the placenta from the uterine wall, can be caused by external trauma. When hemorrhage is concealed, one sign is a rapid increase in uterine size with rigidity. (B) Ectopic pregnancy occurs when the embryo implants itself outside the uterine cavity. (C) Massive uterine rupture occurs during labor when the uterine contents are extruded through the uterine wall. It is usually due to weakness from a pre-existing uterine scar and trauma from instruments or an obstetrical intervention. (D) Placenta previa is the condition in which the placenta is implanted in the lower uterine segment and either completely or partially covers the cervical os.
