If you fail to get success in the Nutanix NCA-6.10 test, you can claim your money back according to some terms and conditions. If you want to practice offline, use our Nutanix NCA-6.10 desktop practice test software. Windows computers support this software. The NCA-6.10 web-based practice exam is compatible with all browsers and operating systems.

Nutanix Certified Associate v6.10 Sample Questions (Q15-Q20):

NEW QUESTION # 15

After logging into Prism Element, an administrator sees a red heart as shown in the exhibit.
Which dashboard will help the administrator isolate the cause of the issue?

- A. Tasks
- B. Analysis
- C. Alerts
- D. Health

Answer: C

Explanation:
In Nutanix Prism Element, the red heart icon at the top-right of the UI indicates that there is a critical alert affecting the cluster's health. This icon is part of the Alert Monitoring System, and clicking on it redirects the user to the Alerts dashboard, where all current active alerts-including their severity, source, and recommended remediation steps-are listed.
What to do:
* Navigate to the Alerts section.
* Review all critical alerts for further diagnosis.
* Cross-reference with the Health dashboard if deeper system component checks are needed.
Clarification of Other Options:
* A. Health: Summarizes system component states but does not provide detailed alert causes.
* B. Tasks: Tracks user-initiated jobs, unrelated to fault diagnosis.
* D. Analysis: Used for performance metrics and trends, not fault alerts.
Prism UI Navigation Path:
Click the red heart icon # Alerts Dashboard
Official Reference:
* Nutanix Administration Guide - Alerts and Monitoring
* Excerpt: "A red heart icon in Prism indicates a critical alert. Use the Alerts dashboard to identify and resolve the issue."

NEW QUESTION # 16
What is the benefit of configuring user-defined Alert Policies in Prism Central?

- A. It reduces the frequency of system updates.
- B. It automates VM migrations.
- C. It customizes alert thresholds.
- D. It restricts network access for administrators.

Answer: C

Explanation:
The correct answer is A. It customizes alert thresholds.
User-defined Alert Policies in Prism Central allow administrators to define custom alert conditions and threshold stailored to specific workload behaviors and operational requirements. This helps fine-tune monitoring by setting alert criteria for metrics such as CPU usage, memory utilization, IOPS, latency, etc., beyond the default system-generated alerts.
Key Capabilities Include:
* Define conditions using predefined metrics.
* Set thresholds and severity levels.
* Associate alerts with specific entities like VMs, hosts, or clusters.
* Integrate with email, SNMP, or third-party tools.
Prism Central UI Navigation Path:

Alerts & Monitoring > Alert Policies > Create Alert Policy
Official Reference:
* Nutanix Administration Guide - Alerts and Monitoring
* Excerpt: "User-defined alert policies in Prism Central allow administrators to define custom thresholds for system metrics, enabling more granular and proactive monitoring."
* Nutanix Prism Central Guide - Alert Policies Section
Conclusion:Custom alert policies donotautomate VM migrations (C), limit access (B), or control update frequency (D). Only optionAreflects the actual function.

NEW QUESTION # 17

When multiple Alert policies are applied to an entity, which will take precedence?

- A. Policy are applied to all entities of an entity type.
- B. Policy are applied to an entity type in a cluster.
- C. Policy are applied to an entity type in a category.
- D. Policy are applied to a specific entity type.

Answer: D

Explanation:
When multiple alert policies are applied to an entity, Nutanix uses a hierarchical approach. Policies applied to an entity type within a categorytake precedence. For example:
* If a category (e.g., "Production") has policies applied to entities like VMs, and the entity matches that category, the category-specific policy will override general policies.
* This prioritization allows administrators to fine-tune alert policies for specific workloads or environments.

NEW QUESTION # 18

Which Nutanix Support case priority level indicates that the system is available but experiencing issues that directly impact productivity?

- A. P3
- B. P1
- C. P2
- D. P4

Answer: C

Explanation:
Nutanix Support case priority levels are defined as follows:
* P1 (Critical):The system is down or severely impacted, requiring immediate attention.
* P2 (High):The system is available but experiencing issues that directly impact productivity or operations.
* P3 (Medium):The system is functioning, but there are non-critical issues or questions.
* P4 (Low):General questions or requests that do not impact system performance.
The scenario described matchesP2, where the system is available but productivity is directly affected by the issue.

NEW QUESTION # 19

What is the default admin session log out time?

- A. 15 minutes
- B. 10 minutes
- C. 20 minutes

- D. 5 minutes

Answer: A

Explanation:
The default admin session logout time in Nutanix is15 minutes. If no activity is detected within this time, the session is automatically logged out for security reasons. This timeout can be adjusted in the system settings if needed, depending on organizational requirements.
