### Salesforce Health Cloud Accredited Professional Sample Questions (Q21-Q26):

#### NEW QUESTION # 21

An administrator is configuring security for a patient list.  
Health Cloud Accredited Professional

Which three considerations should the administrator take into account to ensure proper access to the list?

Choose 3 answers

- A. When a user's field-level security restricts access to a field used as a display column, the column does not appear in the list.
- B. Administrators can restrict access to patient or member lists using standard Salesforce sharing settings on the list.
- C. Administrators can create restriction rules to offset a private organization-wide default setting.
- D. Users with profile or permission sets that restrict access to an object cannot create a list using that object.
- E. Administrators can restrict access using HCPatientListSecurity custom setting.

Answer: A,B,D

#### NEW QUESTION # 22

A payer needs to work with plan members and medical providers to influence decisions through a case-by-case review of the appropriateness of care.

When gathering requirements for this use case, which two Utilization Management processes should a consultant discuss with the client?

Choose 2 answers

- A. Designing Next Best Action and Recommendations for the care management team
- B. Considering the number of intake agents who will be using Health Cloud
- C. Designing Care Requests to seek authorization from a health plan for drugs, services, and admissions
- D. Considering the Request Review Types; Prior Authorization Review, Concurrent Review, and Retrospective Review

Answer: C,D

Explanation:

Comprehensive Detailed Step by Step Explanation with exact Extracts from Salesforce Health Cloud documents that you have with Reference Request Review Types:

Utilization Management processes center around reviewing requests for appropriateness of care, with the three main types being Prior Authorization Review, Concurrent Review, and Retrospective Review.

Extract:

"Utilization Management supports prior authorization, concurrent, and retrospective reviews to evaluate care appropriateness case by case."

- Utilization Management in Health Cloud

Care Requests:

Care Requests are the mechanism for providers to seek authorization from payers for drugs, services, or admissions.

Extract:

"Design care request processes to support providers seeking health plan authorization for services, medications, or admissions."

- Health Cloud Utilization Management Data Model

Why not the other options?

A: Next Best Action is more for care management recommendations, not utilization review.

C: Intake agent count is an operational consideration, not a UM process.

Utilization Management Overview

Utilization Management Data Model

### NEW QUESTION # 23

A UX designer wants to change the formatting of an OmniStudio FlexCard field element to have a font of Times New Roman with a red color.

What are two ways the designer should make the changes?

Choose 2 answers

- A. Made edits to Setup Panel.
- B. Make edits to Field Properties.
- C. Make edits to Field Style.
- D. write custom CSS,

**Answer: C,D**

Explanation:

In OmniStudio FlexCards, when you want to change the visual styling of a field element (e.g., font type, font color, formatting), you have two main options:

A . Write custom CSS

OmniStudio FlexCards allow applying custom CSS classes for fine-grained control of styles.

This is how you can specify a font like Times New Roman or apply a red color.

B . Make edits to Field Style

The Field Style editor within the FlexCard Designer lets you directly configure basic styling properties (like text color, background, alignment, etc.) without needing custom CSS.

Why not the others?

C . Make edits to Setup Panel - The Setup Panel is for data source, conditions, and layout configuration, not for styling individual fields.

D . Make edits to Field Properties - Field Properties are used to configure which data is displayed and how it behaves (like label, formatting rules, or conditional display), but styling is handled through Field Style or CSS, not properties.

Salesforce OmniStudio Reference:

Salesforce OmniStudio FlexCard Designer Guide

"You can use the Field Style editor to set basic styles, such as font color and alignment."

"For advanced customization, apply custom CSS classes to field elements."

### NEW QUESTION # 24

An administrator for Health Cloud wants to ensure that the files in their full sandbox instance are encrypted.

Which encryption solution supports the encryption of files in this scenario?

- A. Salesforce Shield
- B. salesforce Data Mask
- C. Industry Data Security
- D. Classic Encryption

**Answer: A**

Explanation:

Step-by-Step Explanation:

Requirement:

Encrypt files in a full sandbox instance.

Salesforce Shield Platform Encryption:

Provides encryption of files and attachments at rest across Salesforce environments (including sandboxes).

"Use Shield Platform Encryption to encrypt files and attachments stored in Salesforce, including those in sandbox environments."

- Salesforce Shield Platform Encryption Guide

Other Options:

Classic Encryption: Only encrypts a limited set of standard fields, not files or attachments.

Salesforce Data Mask: Masks data for sandbox use, but does not encrypt files for runtime.

Industry Data Security: Not a Salesforce product for file encryption.
