[2026] SAP C_S4CPB_2508 Questions: Tips to Get Results Effortlessly

We strongly recommend using our SAP C_S4CPB_2508 exam dumps to prepare for the SAP C_S4CPB_2508 certification. It is the best way to ensure success. With our SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2508) practice questions, you can get the most out of your studying and maximize your chances of passing your SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2508) exam.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q42-Q47):

NEW QUESTION # 42

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Private Cloud
- B. Infrastructure as a Service
- C. Software as a Service
- D. Platform as a Service
- E. On premise

Answer: A,D,E

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:

* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.

* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

NEW QUESTION # 43

Where is the initial list of known integrations documented?

- A. In the Digital Discovery Assessment
- B. In the Business Driven Configuration Questionnaire
- C. In SAP Cloud ALM
- D. In the Fit-to-Standard Workshops

Answer: A

NEW QUESTION # 44

Which embedded support offerings can you make use of in the SAP Fiori Launchpad? Note: There are 3 correct answers to this question.

- A. Video tutorials from the SAP Help Portal
- B. Digital assistance from generative AI (SAP Joule)
- C. Recorded system simulations from the Learning Center
- D. Assessment questions from the SAP Learning Hub
- E. Recorded webinars from the SAP Learning Website

Answer: A,B,C

Explanation:

The SAP Fiori Launchpad provides embedded support offerings that can help users learn and perform tasks more efficiently. These offerings include:

- * Digital assistance from generative AI (SAP Joule): This is a conversational AI assistant that can answer user questions, provide guidance, and execute tasks using natural language. SAP Joule can be accessed by selecting the headphones icon in the top right corner of the SAP Fiori Launchpad and choosing the chat option.
- * Recorded system simulations from the Learning Center: These are interactive tutorials that show users how to perform common tasks and scenarios in the SAP S/4HANA Cloud system. Users can access the simulations by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the graduation cap icon. The simulations are created with the SAP Enable Now tool and can be customized by customers if needed.
- * Video tutorials from the SAP Help Portal: These are short videos that explain the features and functionalities of the SAP S/4HANA Cloud system and the SAP Fiori Launchpad. Users can access the videos by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the megaphone icon. The videos are also available on the SAP Help Portal website.

The other options are not embedded support offerings in the SAP Fiori Launchpad. Recorded webinars from the SAP Learning Website and assessment questions from the SAP Learning Hub are external learning resources that users can access separately from the SAP Fiori Launchpad. NEW QUESTION # 45

Where is the initial list of known integrations documented?

- A. In the Fit-to-Standard Workshops
- B. In the Digital Discovery Assessment
- C. In the Business Driven Configuration Questionnaire
- D. In SAP Cloud ALM

Answer: C

Explanation:

The initial list of known integrations is documented in the Business Driven Configuration Questionnaire (BDCQ). The BDCQ is a tool that helps you to capture the business requirements and scope of your SAP S/4HANA Cloud Public Edition project. It contains a series of questions that cover different aspects of your business processes, such as organizational structure, master data, configuration settings, and integration scenarios. The BDCQ also provides guidance on the best practices and recommendations for your project.

One of the sections in the BDCQ is the Integration section, where you can document the initial list of known integrations that are relevant for your project. The Integration section contains questions about the integration scenarios that you want to enable, such as cross-system process integration, data replication, data migration, and third-party integration. The Integration section also provides

information on the available integration options, such as SAP Cloud Platform Integration, SAP API Business Hub, and SAP Cloud ALM13.

The initial list of known integrations is important for your project, as it helps you to identify the integration requirements, dependencies, and risks that need to be considered in the project planning and execution. The initial list of known integrations also helps you to select the appropriate integration tools and methods, and to align the integration scope with the SAP S/4HANA Cloud Public Edition roadmap and release cycles13.

Therefore, the correct answer is A, as the initial list of known integrations is documented in the BDCQ.
