Precise Certification 156-315.81 Exam Infor - Complete & Perfect 156-315.81 Materials Free Download for CheckPoint 156-315.81 Exam

Wanting to upgrade yourself, are there plans to take CheckPoint 156-315.81 exam? If you want to attend 156-315.81 exam, what should you do to prepare for the exam? Maybe you have found the reference materials that suit you. And then are what materials your worthwhile option? Do you have chosen Lead1Pass CheckPoint 156-315.81 Real Questions and answers? If so, you don't need to worry about the problem that can't pass the exam.

CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q182-Q187):

NEW QUESTION # 182

If you needed the Multicast MAC address of a cluster, what command would you run?

- A. cphaprof igmp

- B. cphaprof -a if
- C. cphaconf debug data
- D. cphaconf ccp multicast

Answer: A

Explanation:

The command cphaprof igmp can be used to display the Multicast MAC address of a cluster. This command shows the IGMP (Internet Group Management Protocol) information for each cluster interface, including the VRID (Virtual Router ID), the Multicast IP address, and the Multicast MAC address3. The other commands do not show the Multicast MAC address information.

NEW QUESTION # 183

Fill in the blank: _____ information is included in "Full Log" tracking option, but is not included in "Log" tracking option?

- A. Application
- B. File attributes
- C. Destination port
- D. Data type

Answer: D

Explanation:

Explanation

The Full Log tracking option includes more information than the Log tracking option, such as the data type of the traffic. The data type indicates the type of content that was transferred, such as text, image, video, or audio.

The data type can be used for filtering and reporting purposes. The Log tracking option only includes basic information, such as source, destination, service, action, and time.

NEW QUESTION # 184

Which statement is WRONG regarding the usage of the Central Deployment in SmartConsole?

- A. You can install Jumbo Hotfix accumulators with the Central Deployment in SmartConsole.
- B. You can upgrade your cluster without user intervention with the Central Deployment in SmartConsole from R80.40 to R81.20.
- C. You can install Hotfixes with the Central Deployment in SmartConsole
- D. Only be installed Hotfixes can with the Central Deployment in SmartConsole

Answer: D

Explanation:

The statement that is wrong regarding the usage of the Central Deployment in SmartConsole is that only be installed Hotfixes can with the Central Deployment in SmartConsole. This is wrong because Central Deployment can also be used to install Jumbo Hotfix accumulators, upgrade clusters, and perform other operations on multiple gateways simultaneously. Central Deployment simplifies and automates the deployment process and reduces human errors and downtime. Reference: [Check Point Security Expert R81 Administration Guide], page 23.

NEW QUESTION # 185

Which one of these features is NOT associated with the Check Point URL Filtering and Application Control Blade?

- A. Detects and blocks malware by correlating multiple detection engines before users are affected.
- B. Configure rules to limit the available network bandwidth for specified users or groups.
- C. Use UserCheck to help users understand that certain websites are against the company's security policy.
- D. Make rules to allow or block applications and Internet sites for individual applications, categories, and risk levels.

Answer: A

Explanation:

Detecting and blocking malware by correlating multiple detection engines before users are affected is not a feature associated with the Check Point URL Filtering and Application Control Blade. This feature is part of the Check Point SandBlast Network solution, which uses Threat Emulation and Threat Extraction technologies to prevent zero-day attacks. The other features are part of the URL Filtering and Application Control Blade, which allows you to control access to web applications and sites based on various criteria. NEW QUESTION # 186

You have enabled "Full Log" as a tracking option to a security rule. However, you are still not seeing any data type information. What is the MOST likely reason?

- A. Data Awareness is not enabled.
- B. Logs are arriving from Pre-R81 gateways.
- C. Logging has disk space issues. Change logging storage options on the logging server or Security Management Server properties and install database.
- D. Identity Awareness is not enabled.

Answer: A

Explanation:

Explanation

The most likely reason why you are not seeing any data type information in your logs even though you have enabled Full Log as a tracking option to a security rule is that Data Awareness is not enabled on your Security Gateway. Data Awareness is a feature that allows you to monitor and control data types that are transferred over HTTP, HTTPS, FTP, SMTP, POP3, or IMAP protocols. Data Awareness can identify over 700 data types, such as credit card numbers, social security numbers, bank account numbers, medical records, etc., and provide visibility into the data usage patterns of your users. Data Awareness can also enforce data loss prevention (DLP) policies to prevent sensitive data from leaving your network or entering your network from untrusted sources. To enable Data Awareness on your Security Gateway, you need to activate the Data Awareness Software Blade in SmartConsole and install the policy on the Security Gateway.

NEW QUESTION # 187

.....

As the saying goes, an inch of gold is an inch of time. The more efficient the study guide is, the more our candidates will love and benefit from it. It is no exaggeration to say that you can successfully pass your 156-315.81 exams with the help of our 156-315.81 learning torrent just for 20 to 30 hours even by your first attempt. And to cater to our customers' different study interests and hobbies, we have multiple choices on the 156-315.81 Exam Materials versions for you to choose: the PDF, the Software and the APP online.
